From the Publisher

Dear Reader:

Billboard's involvement in the record and tape industry goes far beyond the reporting and charting of the new releases on record, tape, CD, video and/or laser disc.

Each and every day we talk with duplicators, replicators, blank tape manufacturers, chemical and compound manufacturers, packaging companies, service and supply organizations who using the latest technologies are responsible for the production and manufacture of the end product purchased by the consumer.

Manufacturers throughout the world are in constant need of information concerning the latest technology and machinery to mass produce pre-recorded product more efficiently, with the best sound, so as to give their clients quality and reliable products.

With that in mind, Billboard has published the 1989 edition of the INTERNATIONAL MANUFACTURING & PACKAGING DIRECTORY which lists over 2,500 of the above-mentioned organizations that you, the buyer, require for the production and manufacture of pre-recorded music and videocassettes.

Our directory staff has spent many months in the gathering process, in an effort to guarantee the most accurate information possible in any directory that is published today.

We know this directory will be an aid to your purchasing and buying needs in the marketplace. We desire that you keep us informed about your activities, changes in address, additions of new personnel or any listing that you feel should be updated, for any reason.

Please also be aware that Billboard publishes four other directories during the year, they are as follows: INTERNATIONAL BUYERS GUIDE, INTERNATIONAL TALENT & TOURING DIRECTORY, COUNTRY MUSIC SOURCEBOOK & DIRECTORY, and the INTERNATIONAL RECORDING EQUIPMENT AND STUDIO DIRECTORY.

Please contact us for information regarding these directories if you are unfamiliar with their content.

Cordially yours,

Did you know Abbey Road Studios uses

Ken Townsend
General Manager
Abbey Road Studios

Abbey Road Studios—the name evokes a time, an era—the Beatles.

Ken Townsend, Abbey Road general manager, has heard it all—from the record that put the street on the map to Pink Floyd's "Dark Side of the Moon".

Today, in a very modern state-of-the-art facility, Ken hears it on AGFA PEM 469. It's bias compatible and... "It simply sounds better," he says.

Townsend has helped keep Abbey Road on the leading edge for 35 years. He knows that it takes a quality tape to capture a quality performance.

He also knows that Abbey Road makes more than just music.

It makes music history.

AGFA magnetic tape—from research and development, through manufacturing, to delivery and service—we care!

NOT ALL DISC MANUFACTURERS ARE CREATED EQUAL.

Finding a company that has the experience and flexibility to master *and* replicate CD's, CD-V's and Videodiscs isn't easy. Everyone claims to be the biggest. And the best. The promises never end.

But there is *one* disc manufacturer that stands out. Technidisc. Our people have been involved in the research and development of disc technology since 1976. In fact, they were one of the pioneers of disc manufacturing and replicating in North America.

That's why Technidisc excels in quality and service today. And of course, experience.

Our full service manufac-

turing plant in Michigan is a reliable source for CD's, CD-V's and Videodiscs. For mastering. Replicating. Printing. Packaging. And distribution.

Our clients include many of the premier names in entertainment. Companies who demand brilliant quality. Superb service. Competitive pricing. And a U.S. location to maintain direct communications and cost effective distribution of their order.

You expect your titles to be tops in entertainment.

So call Technidisc. We'd like to show you how to get the best results in entertainment discs.

We've Come A Long Way To Get Here

The most talked about CD replicator in Europe and Canada now brings world-class Compact Disc replication to the U.S.

Born of European parents. Raised and thriving in Canada. Eyes focused on an exciting U.S. market. That's the story behind Americ Disc.

Americ Disc is the North American arm of one of Europe's leading optical disc replicators, MPO. As part of this multi-national company, Americ Disc has access to the most sophisticated research and production techniques in the world.

With the major share of the Canadian CD replication market in our corner, Americ Disc is now opening a sales office in New York.

Our proven track record is backed by quality,

dependability, and capacity. From quality control to personalized service to assured turn-around time, we make the difference.

Our high-performance plant in Quebec has capabilities for:

COMPACT DISCS: 3", 5" and 5" Maxi-singles

CD VIDEO: 5", 8" and 12" discs

CD-PIC: Picture discs

CD-ROM and CD-TEL

Call Americ Disc. We'll show you what the rest of the world has been hearing.

FALL IN LOVE
WHEN THEY HEAR IT
ON BASF CHROME.**

Emotional impact. That's what music is all about. And what BASF Chrome is all about. In a nationally representative sample of the U.S., 8 out of 10 listeners heard more, responded more, were moved more by music recorded on BASF Chrome than on ordinary cassette tape. 8 out of 10.

An impressive figure that can mean

impressive sales. Because when you release on BASF Chrome, there's less tape hiss, greater music clarity, greater overall sound quality—greater emotional impact! All of which adds up to a tape that gives greater consumer satisfaction.

If you want them to fall in love. If you want to make them cry. If you want them

JEFF BAXTER AND DIC//DAT

TAKE MUSIC TO THE Nth DEGREE.

THE DIC//DAT Musician's Musicians Series #1

PHOTOGRAPH: KOPITCHINSKI
LOCATION: SOUNDTRACK NY

The title on the album read "Can't Buy a Thrill." But the music inside proved just the opposite. Steely Dan gave the world a thrill for the price of a record. And the guitar player that gave Steely Dan its thrills through three gold albums was Jeff "Skunk" Baxter.

Behind the console or in front of the mike, Skunk Baxter lets nothing get between him and his music. That's why his trademark clear plexi guitar synthesizer clearly isn't just for show. Its thermoplastic body means virtually zero resonance. Which means virtually zero interference. The purest sound. Music to the Nth Degree.

Like DIC//DAT. The definitive digital audio tape. The surface: Ultra-high density metal particles. The dispersion: Ultra-uniform. The result: Unsurpassed digital signal receptivity. And an unbelievable range and clarity way beyond vinyl. Beyond analog cassette. Beyond any way you've ever heard recorded music before.

The sound of the future. Available now to discerning pros.

Now there's much more to chrome than meets the eye.

The unmistakable new sound of UCR pure chrome audio tape from Sunkyong.

UCR's optimum magnetic and mechanical properties result in digital sound quality on cassettes duplicated

What chrome once did for your eyes, it's finally doing for your ears.

at 64 to 1. If that sounds good to you, you'll be relieved to hear that you probably won't even need to readjust slaves when you switch.

You'll also appreciate the quality control you get from Sunkyong's vertical integration. From our own

natural resources and refineries to our manufacturing plant and Technical Center in Los Angeles.

That means if you've heard one tape, you've heard them all. They're absolutely consistent.

If you can't wait to hear our

pure chrome tape, you're not alone.

Consumers can't either. Our SKC audio cassettes are a big hit, too.

It just goes to show. Chrome was never meant to be seen and not heard. Sunkyong. Nobody carries a tune like we do.

SUNKYONG

Digital sound from analog tape.

State of the Art Is Our State of Mind

We're thinking about your future. By applying tomorrow's technology today, West Coast Video Duplicating, Inc. guarantees quality-controlled duplication at a competitive price.

The latest in professional recording equipment, Panasonic 6810, 6820 series VHS and Sony Betamax SLO 1800s, includes Hi-Fi Stereo, digital audio, Dolby decoding and Macrovision encoding. Excellent quality-control duplication in all formats is assured by our computerized system of in-line testing. With one of the nation's largest mass duplication capacities of over 2,000,000 dubs monthly, we can quickly turn around any quantity. These capabilities mean cost-efficiency, no matter the size of your order.

We provide complete fulfillment services with computerized reporting. Inventory is maintained to your specifications for immediate order processing. And we store your master free, to duplicate on demand.

Every detail of duplication and fulfillment is personally coordinated to satisfy your needs. With our state of the art advantage, West Coast Video Duplicating meets the challenge of today's video industry... and tomorrow's.

PERFECT IMPRESSIONS

From the Masters of Custom Video Duplication

There are many tape duplication companies, but only one will leave a perfect impression... protecting the quality of your best work without compromise. From state of the art duplication to innovative packaging to precisely controlled, dependable delivery. Our experience sets us above all the rest... in fact we are one of a select few in the industry who is **LICENSED BY JVC** to display the VHS logo trademark on all its custom loaded video cassettes.

Our service program begins with quality assurance... but we also extend it into the marketplace where we can protect your product by applying such anti-piracy technologies as Macrovision, customized shrink film, and the newly introduced **ROTO-SCREEN LABELING PROCESS™**

We have likewise integrated an entire support service program which includes new release scheduling, order fulfillment, advanced inventory management services, and the most responsive customer service in the industry.

Find out how you can obtain your **PERFECT IMPRESSIONS**. Write or call **Premiere Video** today.

Sound choice.

Makrolon CD-2000 polycarbonate from Mobay is the ideal material for the revolutionary new CD-ROM technology.

The plastic laser-read compact disk is rapidly becoming the digital information storage medium of choice for everything from music to masses of computer data. And the plastic material of choice for this exciting new development is Mobay's Makrolon CD-2000 polycarbonate.

Makrolon CD-2000 is the special super-clean polycarbonate resin designed to provide outstanding transparency and optical purity to assure a high transmission factor for the laser beam; minimal water absorption to help prevent warpage and possible read-out errors; high impact resistance; stiffness; and heat deflection temperature.

Makrolon CD-2000 resin also accurately

reproduces the intricate mold surface, can be molded with the extremely low stress level required for minimal optical distortion, and achieves extremely high flowability while maintaining polycarbonate's excellent mechanical properties.

For more information in the USA, contact R.M. Pisipati at 412-777-7618. Or write Mobay Corporation, Plastics & Rubber Division, Mobay Road, Pittsburgh, PA 15205-9741.

We make compact discs. Quality discs. We make them in a state-of-the-art facility. The facility is new, but we're not new to technology. The alliance of two professionals from different, but integral, fields gives us our clear advantage. The optical molding expert meets the audio engineering expert. We've designed our operation from the ground up to be highly automated. This approach means we'll stay on the cutting edge of technology and innovation continually. And, this same automation technology allows us to be cost competitive.

Compact Disc Project Managers

Not all of our clients come to us with a finished digital tape. There are projects which create questions about such subjects as marketing, licensing, production and packaging. We'll answer those questions and pose our own. As compact disc project managers providing these services, we'll work with you and eliminate the confusion. Our team will listen. Evaluate. And, offer solutions.

AmericanHelix™

Remember when people actually did what they said they'd do? And, they did it well? And, for a fair price? We remember. That belief in American tradition is inherent in our philosophy. Our plan is not to be the largest but to be around the longest.

If you've gone elsewhere in the past, you'll appreciate us most. If we're the first CD makers you'll come to know, you'll feel no need to explore further.

We actually enjoy what we're doing. It's gratifying when we meet people who feel the same.

True. We make compact discs, but we also enjoy making friends.

Sprinter Does It Better.

With one Sprinter® high-speed video duplicator, one Sony customer has turned out over a million video cassettes in two years—in real-time that's 137 years.

The Sprinter system assures consistent quality for every tape. With virtually no tracking errors or wow and flutter. It prints the exact pattern of magnetic information from the master onto the copy. And a magnetic footprint on each tape reduces labeling errors.

Sprinter systems require only one-sixth the labor, power and floor space of equivalent real-time equipment. And deliver the reliability and uptime performance you expect from Sony, the world leader in video technology.

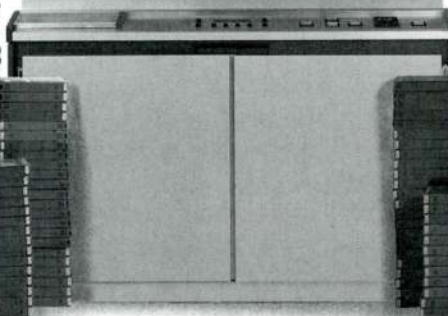

So Sprinter systems turn out a lot more tapes with a lot less work. Save time and make money. And improve the quality of every tape you duplicate, seven days a week, year in, year out.

Want to see for yourself? Call the Sprinter group at (201) 930-6292 for an in-person or video-tape demonstration.

No dropouts in Russia.

Tape dropouts mean trouble for videotape professionals. No wonder so many of them choose to work with Sony Professional Videotape. Including the producers of two recent documentaries shot in Russia, who minimized dropouts by shooting with Sony Videocassettes.

Sony cassettes were never at a loss for picture, whether covering sub-zero, Northern Russia nights or getting impromptu interviews with people on the street in Moscow.

Not that this surprises those of us at Sony Professional Videotape. After all, we've designed all our products around one basic premise: durability. To be frank, the demanding shooting conditions of Russia aren't as tough on our tape as we are.

XBR U-matic® cassettes, for instance, feature a molded-in anti-static cassette shell and components to reduce transient dropout potential by neutralizing static charges. Combine this with base film that's been given Sony's exclusive Carbonmirror™ back coating and dropout potential is reduced even further.

No matter which Sony Professional Videotape you're working with, there's one thing you know for sure. Its greatest ability is durability. Whether it's U-matic, Betacam®, I¹ or Digital tape. So take on the world. With Sony Videotape. On location in Moscow, Russia or in a studio in Moscow, Idaho, you need a tape that's tough as Sony. After all, there's no better way to lower the dropout rate.

SONY
THE ONE AND ONLY.
