A Zomba Company

Battery Studios

OPENING
IN NEW YORK CITY
SUMMER '89

Over 35,000,000 albums sold!*

London's premier recording & mixing facility consistently racks up gold, platinum & multi-platinum sales for our studio clients across a wide musical spectrum.

We're opening our *all* new custom-designed state-of-the-art studio complex in Manhattan in the Summer of '89.

Our watchword: Innovative recording, mixing & engineering *plus* the very latest Programming & Sampling technology & specialists.

Studio clients include:

Bryan Adams
Art of Noise
Boogie Down Prods
Jonathan Butler
Julian Cope
The Cars
Def Leppard
Samantha Fox

Hall & Oates
Iron Maiden
DJ Jazzy Jeff & The Fresh Prince
Marshall Jefferson
Howard Jones
Tom Jones
Holly Johnson

Kool Moe Dee
Billy Ocean
Pet Shop Boys
Scorpions
The Men They Couldn't Hang
Voice of the Beehive
Zodiac Mindwarp

Resident studio specialists include:

Nigel Green, Bryan "Chuck" New, Jerry Peal, Paul Schroeder

New York City

Studio A 48-track Mixing Room

64-input SSL 4000G Series console – one of the largest in NYC • Lex 480L, Publison, Pultec, Focusrite • AMS, Neve outboard & much much more • CRM 100 (E.M. Long) Custom Monitors

Studio B Tracking Room

Modified & Re-fitted 40-input Neve 8068 console • 1000 sq. ft. studio space with isolation booth • 'Mirror-image' acoustic design of mix room

Studio C Keyboard/Midi-Room

The newest & best keyboard processors available including hard disk, multiple computer stations & in-house programmers

ADVERTISERS INDEX 126

About Dolby SR...

Guy Charbonneau

producer and owner of Le Mobile, Hollywood

It gives one the sound as if it's not on tape, that it's the live performance

Pro Sound News, April 1987

John Cutler

producer for Grateful Dead

SR could save the analog business for many years. It is transparent...

Mix, July 1987

William Hoekstra

recording engineer, Saint Louis Symphony Orchestra

In some ways, SR is better than digital... the 15ips Dolby actually has a better capability for handling peaks

Pro Sound News, April 1987

Brian Masterson

director, Windmill Lane, Dublin

We have bought 76 channels of Dolby SR which is terrific

Eq, June 1988

Hugh Padgham

producer

I'm quite happy with a good analogue machine and Dolby SR

Sound on Sound, May 1988

Simon Phillips

drummer and studio owner

I've done an album with it and I think it's brilliant

Studio Sound, May 1988

Pete Townshend

musician, The Who

Dolby SR has lengthened the life of analog by 10 years

Pro Sound News, August 1988

John Williams

guitarist

Wherever possible I will do all my recordings with Dolby SR

Hi Fi News and Record Review, May 1988

...unsolicited statements, in print

From the Publisher

Dear Reader:

You're holding in your hands the 1989 edition of **Billboard's International Recording Equipment & Studio Directory**.

All recipients of this directory have the latest and most updated information regarding equipment manufacturers and recording studios throughout the world.

Billboard is extremely proud to have been the leader in studio directory publishing during the past twenty years. Our research staff and directory central operations have spent long hours in an effort to guarantee the accuracy of the information contained within this directory. Compiling directories is never an easy task. However, we always request users and advertisers to keep in touch with our Nashville Directories Central operation with regard to any and all listing errors or changes throughout the year.

In the 1989 edition, you will find a new Brand Usage Study covering 1,167 U.S. studios who have responded to us about equipment and tape use for over a dozen categories.

Although, the growth of the recording industry is in your hands, Billboard offers you a weekly voice, and in addition to this directory, we also publish the following: International Buyer's Guide, International Manufacturing & Packaging Directory, International Talent & Touring Directory, and Country Music Sourcebook & Directory.

We greatly appreciate your continued support and welcome your comments and views throughout the year.

Cordially yours,

Ronald E. Willman

THE LATEST TECHNOLOGY IN 24 TRACK PRODUCTION MAY COST YOU SOME OF YOUR FAVORITE PRECONCEPTIONS.

You may think you know which 24 track gives you the most advanced technology and design. But you're probably in for a surprise.

It's the ATR-80.

The ATR-80 is a production dream come true. It's got features that make audio-for-video editing faster and easier than it's ever been before in a 2-inch, 24 track format.

Look at the speed. Unique samarium-cobalt motors in the ATR-80 start the capstans quicker and then shuttle at a lightning-fast 380 ips. Lockup time is limited only by your other equipment.

Tascam's proprietary head technology allows you even more production speed, with head quality so uniform that EQing decisions can be made right in sync without rewinding to repro. Special circuitry provides transparent punch-ins for completely gapless and seamless edits.

But there's only so much of the ATR-80 that can be described in features. For the rest you must sit down in front of it and lay your hands on the controls. That's when you'll sense the craftsmanship and quality of its design. The power, the speed, the smooth response of the transport.

See your Tascam ATR-80 dealer. After you use it, you won't miss those preconceptions one bit.

TASCAM

Brand Usage Response Survey (U.S.)

This special Billboard survey of recording studio equipment usage was compiled from questionnaires returned by 1,167 U.S. recording and mastering studios from November-December 1988. Not necessarily reflecting the exact total situation in studios, the calculation shows the percentage of studios using each brand and the percentage of brand responses attained by each brand.

Listed below each category heading are the number of studios reporting information for the particular category and the number of brand responses reported by the studios. Since a studio could list more than one brand, the number of brand responses always will be greater than the number of studios.

The percentage of studios figure, which measures the strength of a brand independent of the other brands, typically will have a total percentage figure per category that far exceeds 100%. The percentage of brand responses figure, which accounts for a particular brand's position relative to the other brands, will total 100% per category. Note that the percentage of brand responses does not account for the number of items of equipment used by each studio. Thus, this percentage is not a market share percentage of actual equipment pieces used.

To expand upon the difference between the two percentages, consider the following example. Assume that a category has 500 studios reporting an average of two brand responses each or a total of 1,000 brand responses (500 x 2). If 250 studios report that they use a particular brand, then it has 50% of the studios (250/500) and 25% of the brand responses (250/1,000).

AMR (Audio Media Research) (AMR 10 inputs; 4 outputs)
 ANT Telecommunications, Inc.

Introducing the DAT recorder a professional can't afford to ignore.

The future of audio lies in the all-digital facility. And Panasonic's new SV-3500 DAT recorder/player answers the need for a fully-professional digital audio tape machine.

The SV-3500 is a full-function studio DAT machine from a company committed to servicing and supporting the demanding needs of audio professionals. It features:

- Dual 18-bit ADCs for encoding, and twin 18-bit DACs per channel for playback.
- Industry standard sampling and replay frequencies.
- Interface for digital-to-digital transfers.
- XLR inputs and outputs.
- Switchable +4/-10dB output level.
- Full-feature wired remote.
- 200-times high speed search mode.
- Comprehensive programming and loop functions.
- High-precision peak-reading meters.
- Erasure and re-recording of Start and Skip IDs.

Drop by a Panasonic dealer and ask to see the SV-3500. Because without a DAT recorder with these features, you never know who might ignore *you*. For the name of your nearest dealer, call 714-895-7278. Or, write to Panasonic AVSG, 6550 Katella Avenue, Cypress, CA 90630.

AGFA

Professionals know the best choice is

Whether they're duplicating a smash movie or a chart-breaking audio cassette, mastering a superstar's new song or sweetening a sound track, audio and video professionals want a tape that delivers.

They choose AGFA.

Producing magnetic tapes for production and duplication, AGFA's consistency makes it the best choice for the audio-video professional.

But you know that—you're a pro.

AGFA magnetic tape — from research and development, through manufacturing, to delivery and service—we care!

JEFF BAXTER AND DIC//DAT

TAKE MUSIC TO THE Nth DEGREE.

THE DIC//DAT Musician's Musicians Series #1

PHOTOGRAPH: KOFITCHINSKI
LOCATION: SOUNDTRACK NY.

The title on the album read "Can't Buy a Thrill." But the music inside proved just the opposite. Steely Dan gave the world a thrill for the price of a record. And the guitar player that gave Steely Dan its thrills through three gold albums was Jeff "Skunk" Baxter.

Behind the console or in front of the mike, Skunk Baxter lets nothing get between him and his music. That's why his trademark clear plexi guitar synthesizer clearly isn't just for show. Its thermoplastic body means virtually zero resonance. Which means virtually zero interference. The purest sound. Music to the Nth Degree.

Like DIC//DAT. The definitive digital audio tape. The surface: Ultra-high density metal particles. The dispersion: Ultra-uniform. The result: Unsurpassed digital signal receptivity. And an unbelievable range and clarity way beyond vinyl. Beyond analog cassette. Beyond any way you've ever heard recorded music before.

The sound of the future. Available now to discerning pros.

DIC//DAT™
TAKING MUSIC TO THE Nth DEGREE

2 University Plaza, Hackensack, NJ 07601

**College for Recording Arts**

665 HARRISON STREET • SAN FRANCISCO, CALIFORNIA 94107 • [415] 781-6306

To save you time and money we've just spent over 546 hours training your next employee!

When money and time are tight, you can't afford to train an employee from scratch. Our graduates have spent a full year in an intensive study of Audio Engineering, Music Production, Studio Electronics, Music Business and Finance, Copyright Laws and Entertainment Contracts. They're young, knowledgeable, and—because they're well trained—effective from the start. Graduates and referrals among the Majors!

If you are in need of someone already possessing the basic knowledge and skills of the industry, we might just have the person to fit your situation. If you know a promising and talented person that you'd like to help along, why not let us train them for you!

The school is accredited by the Accrediting Commission of the National Association of Trade and Technical Schools (NATTS), approved by the Calif. Superintendent of Public Instruction, approved for Veteran training, and is authorized under Federal law to enroll non-immigrant alien students. It is also endorsed by the National Academy for Recording Arts and Sciences Training Institute.

Room Service

Our computers aren't the only things with a good menu.

Your table is ready at Plat-

inum Post. Cooking in the main room is a Neve™ V-60

with Flying Faders™ to make your mix a piece of cake.

In the deli there's 3 Synclavier™ suites (for the sweet)

to create your own MegaByte sandwich with

a generous helping of Direct-to-Disk™. Our 48-track mobile

delivers to your room any time day or night. There's a spicy uplink-

downlink sausage served on our own satellite

dishes. And seriously, we have a five-

star menu in our kitchen to go with our five-

star studios (9 of them in all). The only thing we

spoils is you. Because even when you've

got the gear, the service is what counts.

Streeterville is

"This is the best studio in Chicago for rock n' roll. I'm very happy with the way the studio met my equipment needs for digital, Synclavier, Dolby SR, outboard EQ and other devices that are typically provided in the London studios where I primarily work."

**Alan Shacklock, Producer/Arranger
(D. DeYoung/R. Daltry/Jeff Beck)**

"The biggest thing I love about Streeterville is that I never have a question that can't be answered or a request that cannot be met. In addition to an earnest attempt to stay state-of-the-art, the staff and services are, to me, unmatched."

**Alan Moore,
Moore Music Group**

*"Streeterville people are real nice people who **really** are very good at what they do. We love working at Streeterville. We can track on the Neve, with its warm EQ, and mix on SSLs using computer memory."*

**Jim Tullio, Bob Rans,
Tullio & Rans Music**

"An artist has a responsibility to communicate emotions and ideas to the listener. Streeterville provides a conducive atmosphere through technical excellence, a very helpful staff and very talented engineers. All of which makes Streeterville deserving of doing more of this type of work."

**Dennis DeYoung (Styx)
"Boomchild" '88 MCA solo LP**

"I love records that have the sound and feel of live recordings but with the flexibility and sophistication that a world class facility provides. Streeterville, with its SSL boards and wide selection of outboard gear—and especially it's roster of top notch engineers, gives me everything I need. That's why so many of Alligator's Grammy nominated and Grammy winning albums have been recorded at Streeterville."

**Bruce Iglauer,
President/Producer,
Alligator Records**

"We owe a large part of our success to everyone at Streeterville. No matter what we ask we can always depend on them. The staff is superb, facilities first rate and the engineers never skip a beat. We're at home and it feels great."

**Bobby Francavillo, Larry Pecorella &
Melanie Hagopian, Intuition Music**

"As far as I'm concerned this is my "first" record. They got exactly the sound I make in person. It's the best studio that I've ever recorded in."

Roy Buchanan, Alligator Artist

"One of the great pleasures of recording at Streeterville is knowing that I will always be working with very talented and extremely cooperative people. By now I take for granted the state-of-the-art technology, the dependable post-production follow-up and the unflagging energy of everyone in the company. Whether we're working on music for the stage, scoring film, doing record demos or recording music for commercials Streeterville has always shown the resources to do whatever it takes to make the project succeed. No one can ask for more than that."

**Alan Barcus,
Opus III Music**

Basic Tools For Success

Billboard Directories are what you might call Basic Tools. They are, in fact, the main sources of vital information for the entire Music/Record/Tape and Video industries.

Order any one or all of the directories by filling in the coupon below today.

International Buyer's Guide - 1989 edition. The Worldwide Music and Video Business to Business Directory. Listings include name, key people, address, phone number and marketing information of record and video companies, music publishers, distributors, accessory manufacturers and suppliers. Also manufacturers and wholesalers of hardware, software and accessories for Compact Disc, Video Disc, Video Cassettes and Video Games. **30th Year of Publication. \$68.00**

International Talent & Touring Directory - 1989 edition. The source for U.S. and international talent, booking agencies, facilities, services and products. Used by everyone who buys and books talent - promotes and manages tours. **\$62.00**

International Recording Equipment and Studio Directory - 1989 edition. All the information you need on professional recording equipment, recording studios and recording studio equipment. **\$35.00**

International Manufacturing & Packaging Directory for the CD, Record and Audio/Video Tape Industries. 1988-89 edition. Professional services and supplies for record and video manufacturers, audio and video manufacturers, audio and video tape manufacturers, video program suppliers and buyers, video music producers and production facilities. **\$29.00**

Country Music Sourcebook - 1988-89 edition. Radio stations, performing artists, booking agents, personal managers—everyone involved in Country Music. **\$29.00**

1988 Year-End Awards Issue - Billboard "The Year In Music And Video" year-end special double issue offers more charts and more editorial features than ever before. These charts represent the most comprehensive statistical revue of the year in home entertainment of any survey in print. **\$9.95**

(All prices include postage & handling)

The Sweetest Mix...

The Neve V Series

If you haven't tried the Neve V Series console, you should know what you're missing:

- Only console with 48 balanced multitrack busses and 48 track monitoring
- Famous Neve four-band parametric EQ with $\pm 18\text{dB}$ on all bands
- Powerful Dynamics section with limiter/compressor and gate/expander
- Revolutionary Flying Faders – the fastest automation system available
- Incomparable Grouping and Linking for absolute control

TRUTH...

OR
CONSEQUENCES.

If you haven't heard JBL's new generation of Studio Monitors, you haven't heard the "truth" about your sound.

TRUTH: A lot of monitors "color" their sound. They don't deliver truly flat response. Their technology is full of compromises. Their components are from a variety of sources, and not designed to precisely integrate with each other.

CONSEQUENCES: Bad mixes. Re-mixes. Having to "trash" an entire session. Or worst of all, no mixes because clients simply don't come back.

TRUTH: JBL eliminates these consequences by achieving a new "truth" in sound: JBL's remarkable new 4400 Series. The design, size, and materials have been specifically tailored to each monitor's function. For example, the 2-way 4406 6" Monitor is ideally designed for console or close-in listening. While the 2-way 8" 4408 is ideal for broadcast applications. The 3-way 10" 4410 Monitor captures maximum spatial detail at greater listening distances. And the 3-way 12" 4412 Monitor is mounted with a tight-cluster arrangement for close-in monitoring.

CONSEQUENCES: "Universal" monitors, those not specifically designed for a precise application or environment, invariably compromise technology, with inferior sound the result.

TRUTH: JBL's 4400 Series Studio Monitors achieve a new "truth" in sound with

an extended high frequency response that remains effortlessly smooth through the critical 3,000 to 20,000 Hz range. And even extends beyond audibility to 27 kHz, reducing phase shift within the audible band for a more open and natural sound. The 4400 Series' incomparable high end clarity is the result of JBL's use of pure titanium for its unique ribbed-dome tweeter and diamond surround, capable of withstanding forces surpassing a phenomenal 1000 G's.

CONSEQUENCES: When pushed hard, most tweeters simply fail. Transient detail blurs, and the material itself deforms and breaks down. Other materials can't take the stress, and crack under pressure.

TRUTH: The Frequency Dividing Network in each 4400 Series monitor allows optimum transitions between drivers in both amplitude and phase. The precisely calibrated reference controls let you adjust for personal preferences, room variations, and specific equalization.

CONSEQUENCES: When the interaction between drivers is not carefully orchestrated, the results can be edgy, indistinctive, or simply "false" sound.

TRUTH: All 4400 Studio Monitors feature JBL's exclusive Symmetrical Field Geometry magnetic structure, which dramatically reduces second harmonic

distortion, and is key in producing the 4400's deep, powerful, clean bass.

CONSEQUENCES: Conventional magnetic structures utilize non-symmetrical magnetic fields, which add significantly to distortion due to a nonlinear pull on the voice coil.

TRUTH: 4400 Series monitors also feature special low diffraction grill frame designs, which reduce time delay distortion. Extra-large voice coils and ultra-rigid cast frames result in both mechanical and thermal stability under heavy professional use.

CONSEQUENCES: For reasons of economics, monitors will often use stamped rather than cast frames, resulting in both mechanical distortion and power compression.

TRUTH: The JBL 4400 Studio Monitor Series captures the full dynamic range, extended high frequency, and precise character of your sound as no other monitors in the business. Experience the 4400 Series Studio Monitors at your JBL dealer's today.

CONSEQUENCES: You'll never know the "truth" until you do.
