SERIAL NUMBER 126

## "The Coin Machines Merry-Go-Round"

By Bill Gersh

### DANGER-HOT PEEPS BLACK EYE

Once again greediness enters into the coin machines picture. The greediness of a very few people that can easily endanger the businesses of all engaged in an industry that is trying in every possible way to prove to the American public that it is a most entertaining, relaxing and therefore a necessary industry. This is the greediness of those few who have taken an opportunistic advantage of the newest revamp to enter the market - the Panoram Peep Show conversion.

Instead of following along regular business lines, for there is no doubt that the Panoram Peep Show conversion has proven itself mighty profitable, there are a certain few here and there thruout the country who would like to speed up the cash intake process and to do so are using questionable and filthy film, even to the point of nudes, to capture a few extra dimes.

It is well known to the industry that The Cash Box has fought with all its might against anything which would in any fashion whatsoever hurt this business. It has always been the policy of The Cash Box to instantly jump down on the sort of people who are only in this industry for a quick grab and by so doing hurt instead of better this business in the eyes of this nation's public. This business has before it the greatest future in its history. It should and can enter into the American post-war scene more greatly complimented, more highly accepted and more pleasing to parents, to officials and to all business men.

Those few men who are using questionable and lewd films in their Panoram conversions gain absolutely nothing for themselves. Sooner or later they will find themselves in serious trouble with their local authorities and perhaps even with the Federal authorities. But at the same time, because of using such film, they endanger an entire industry of men who are working hard to obtain a decent livelihood and to insure their family future. Not only will these few bring about possible police action but all the industry as well, because of them, will suddenly find itself with a bewildered expression and a terrible black eye that may take years to clear.

Those firms who introduced the Panoram Peep Show conversion had no such film in mind. They are most definitely against it from every standpoint. They have always warned the trade that any questionable film would cause great injury. But there are those few who seek to outsmart even themselves and adopt the sort of tactics which injure all concerned with this business.

Every decent man in this industry is against such film. From many territories and from many leaders reports have come thru that a certain unscrupulous few people have seen fit to use questionable, filthy films. Tho most of these films cannot be classified as absolutely off color, yet they are sufficiently enough over to the other side of the line that any parent seeing his son or daughter peeking into such a machine will, without a moment's hesitation, and rightfully so, phone his nearest police station and perhaps ignite the spark that will blow an entire territory to bits.

Not only that, but because the press is always ready to yell "racketeer" and "slot machine king" and "demoralizers-of-the-youth-of-our-nation" on the slightest provocation - the nation's news wires would carry the story from coast to coast and give some "blue-noses" and others of like ilk an opportunity to shout their fool heads off so that the black eye which would result would affect this business in every territory in this nation.

The Panoram is so closely identified with the automatic phonograph that this simply cannot be allowed. The music machines men should worry, to say the least. It is therefore up to them, in their individual territories, to cure this curse. If they can't do it quietly and without fanfare, they, themselves, should proceed to wipe it out, for they, too, are parents and do not desire to see their children viewing anything which would add further to the tremendous national problem of juvenile delinquency which is now ravaging the nation.

## "The Coin Machines Merry-Go-Round"

Only The Cash Box, because it is solely and exclusively read by coin machines people and does not circulate to any but active coin machines men, can bring problems of this kind into the open and apprise all coin machines people of such facts for their own future, better welfare. This was the one big reason that The Cash Box believed there was a need for a real trade medium. A medium that would be able to talk out loud and know that no police chief or blue-nose or crusading politico could obtain a copy by plunking down 15 cents on a newsstand.

Here is a problem that arises at one of the most crucial moments in the history of this industry. A problem that must be met with immediately and dealt with as harshly as possible. This is the sort of cancer that must be cut out of this business wherever and whenever it is found. The type of man who will call himself a true coin machines man and then will turn around and allow one of his own machines, which is probably doing an amazingly profitable earning job already, to feature questionable films, so as to earn ten dimes more during the week, does not only play a dangerous game himself - but he endangers the entire industry.

He is giving it a black eye at a time when it positively cannot afford it. And the kind of black eye that, because of the terrible juvenile delinquency problem, can actually set this industry back more than 50 years, as well as pull away from it the kind of people who are planning to enter into it after the war, and the sort of financial firms who already have entered into it.

### PAT-ON-THE-BACK DEPT.

"To tell you that I am surprised at the number of inquiries which I have received from my initial ad in last week's issue of The Cash Box is putting it mildly. Ever since this ad went in we have had a continuous stream of mail. We are enclosing our ad for next week's issue." Joe Huber, Automatic Games Supply Co., St. Paul, Minn.

"Enclosed find check for \$48.00. I think The Cash Box is great for everyone in the music and machine business. I paid for a year's subscription through having The Cash Box sample copy. I saved that much on some merchandise I bought." Hugh Hannum, H.N.S. Sales Co., Hanover, Pa.

"We have been so flooded with replies offering us used games to the \$20.00 ad we carried in The Cash Box that we are extremely sorry to have to tell you that it will not be necessary to run this ad any longer." Joe Rubin, Rubin Sales Co., Utica, N. Y.

### POST-WAR INDUSTRY

It is believed by a great many in the trade that the first full year's production of coin operated equipment, after the war, may surpass the \$100,000,000.00 mark. This is considered a conservative estimate. It is based on the belief that machines of all types, ranging from the small bulk merchandisers to phonographs and other large and expensive machines will be manufactured. There is also a belief that as the industry once again gets going into full speed production, even this figure will be surpassed during the second full production year.

There is a backlog demand at this time that far exceeds 1,000,000 machines of all types. It is expected that the merchandise machines, music equipment, arcade machines and every type of already known and many new amusement devices that will be introduced, will have to be in top speed production for many years to cover this present backlog demand. This is based on the belief that approximately 500,000 locations throughout the country can each use 2 new machines of various types. This is not considered a high figure. It is well known that the average location can use a new phono, a few new merchandising machines, a new pin game or console or slot or other amusement machine. Many locations are also seeking for something new in arcade machines, scales and service machines.

This means that those manufacturers who are already known to the industry and the new manufacturers who are popping up here and there as well as the many others who are expected to enter into the field, attracted by its great possibilities, are certain to create a new high production mark their first full production year. This first full production year may actually start about three to six months after the war is over. This production figure is based on the 12 months that will follow after this initial reconversion period.

Many in the trade who have made a study of the first year's production possibilities present other extremely high figures. This will no doubt be plausible after the first year's production is out of the way and the manufacturing division of the industry has settled down somewhat so that the complete production and sales picture becomes more clarified. There will then be no doubt that this \$100,000,000.00 will be accomplished.

At the present time the growing backlog demand for machines has excited a great many inventive minds. Many of these have started in small and somewhat crude fashion to get into the manufacturing picture. Many well known to the industry have already reported their desire to enter into manufacturing after the war is over. Some have even sold off routes and generally cleared the way to enter into manufacturing.

### POST-WAR INDUSTRY

It is believed by a great many in the trade that the first full year's production of coin operated equipment, after the war, may surpass the \$100,000,000.00 mark. This is considered a conservative estimate. It is based on the belief that machines of all types, ranging from the small bulk merchandisers to phonographs and other large and expensive machines will be manufactured. There is also a belief that as the industry once again gets going into full speed production, even this figure will be surpassed during the second full production year.

There is a backlog demand at this time that far exceeds 1,000,000 machines of all types. It is expected that the merchandise machines, music equipment, arcade machines and every type of already known and many new amusement devices that will be introduced, will have to be in top speed production for many years to cover this present backlog demand. This is based on the belief that approximately 500,000 locations throughout the country can each use 2 new machines of various types. This is not considered a high figure. It is well known that the average location can use a new phono, a few new merchandising machines, a new pin game or console or slot or other amusement machine. Many locations are also seeking for something new in arcade machines, scales and service machines.

This means that those manufacturers who are already known to the industry and the new manufacturers who are popping up here and there as well as the many others who are expected to enter into the field, attracted by its great possibilities, are certain to create a new high production mark their first full production year. This first full production year may actually start about three to six months after the war is over. This production figure is based on the 12 months that will follow after this initial reconversion period.

Many in the trade who have made a study of the first year's production possibilities present other extremely high figures. This will no doubt be plausible after the first year's production is out of the way and the manufacturing division of the industry has settled down somewhat so that the complete production and sales picture becomes more clarified. There will then be no doubt that this \$100,000,000.00 will be accomplished.

At the present time the growing backlog demand for machines has excited a great many inventive minds. Many of these have started in small and somewhat crude fashion to get into the manufacturing picture. Many well known to the industry have already reported their desire to enter into manufacturing after the war is over. Some have even sold off routes and generally cleared the way to enter into manufacturing.

## "The Coin Machines Merry-Go-Round"

Whatever the resultant effect as to the eventual number engaged in manufacturing when the war is over, and this should of itself prove stimulating to all the trade, there is no doubt that obtaining part of that first production is an extremely great temptation for the average man who knows something of manufacturing processes as far as coin operated machines are concerned. The facts have already excited a great many people in this trade and are also bringing in many others who formerly had little or no connection with this business.

### MUSIC MACHINE LOCATIONS

An enthusiastic and intimate gathering of a few noted music machines men, discussing the future possibilities of their division of the industry, came to the conclusion that there were going to be at least 1,000,000 music locations in these United States within 5 years after music equipment production again starts in this industry.

During the pre-war years the figure of music equipment locations came very close to the 450,000 mark from all reports. The belief is general that this mark would have gone higher if the war hadn't come about to stop production of music equipment.

These men believe that the new styles of music machines which will be produced within 3 to 5 years after the war will open a great many new types of locations. They point to the fact that hundreds of factories everywhere in the country have learned the music lesson. These factories, as is well known to the trade, are using music to help stimulate production. And music has helped to increase production, according to one outstanding university professor, better than 11.4 percent in the average factory location.

Many music machines men have been making installations in factories. In most cases they have sold these outright. The belief of these leading automatic music men is to the effect that certain special types of equipment with remote control operational features will be developed which will open the manufactory field to the operators after the war on an operating basis never before known or enjoyed.

These men also explain that a great many class locations which formerly felt that automatic music was beneath their dignity have now taken this type of business stimulation to their bosoms. They believe that equipment will surely be developed that will meet with the approval of such locations and that perhaps no coin chutes will be used and a rental basis instead will be featured which will bring many thousands of locations thruout the country to the trade.

Also discussed was the fact that certain music equipment manufacturers were already prepared to enter into the large apartment house field when the war came along to halt this promotion. This apartment house field will open many thousands of good paying locations to automatic music on a regular monthly rental basis - with the apartment resident paying along the same lines he now pays his telephone and light bills. It will require specialists to handle this sort of operation. The type of music equipment which will be developed for private home consumption of this kind is sure to open the field to such acceptance that eventually this type of music will become second nature to be requested by the home owner or apartment resident.

Other locations, too, are sure to accept automatic music as a very necessary part of their businesses. It is the general belief of music machines men that almost every type of business, including department stores, railroad and bus stations, etc., can be approached on music today, playing on a continuous, no coin chute, rental basis, especially with the lessons learned during this war about the fine effects music has made on the public. The belief therefore that over 1,000,000 music locations will be a surety 5 years or so after the war is a conservative estimate. New types of automatic music equipment may be developed eventually which will cause even this locations figure to seem mighty small potatoes.

The vastness of such a network gives some idea of what the music machines division of this industry can look forward to in the post-war era. Never before in all the history of this industry have the possibilities for expansion and development been as great as they are at this time. The development of the automatic musical instrument from its early days to its present stage, is significant of the possible growth of this business after the war.

**NOW FLYING OVER HOME**  
**OF FAMOUS *Bally***  
**GAMES AND VENDERS**

Production at the "Bally" plant is one hundred per cent for Uncle Sam. Night and day, seven days a week, the "Bally" organization is building battle equipment for the Army and the Navy, proving that the skill developed in peace-time design and construction of coin-operated games and venders is a valuable asset to America in time of war.

Plans of the "Bally" organization call for quick production of new games and venders immediately after victory . . . and for exploitation of the marvelous new electronic principles developed by war-time technology. In the post-war era, as in the past, "you can bank on Bally" for the newest in money-making equipment.

Lion Manufacturing Corporation, manufacturers of "Bally" games and venders, distributed by Bally Manufacturing Company, 2640 Belmont Avenue, Chicago, 18, Illinois.

# BUY WAR BONDS

# THE CONFIDENTIAL PRICE LISTS

AN EXCLUSIVE MERCHANDISING SERVICE FOR THE COIN MACHINES INDUSTRY  
ISSUED EVERY WEEK BY: THE CASH BOX, 381 FOURTH AVE., NEW YORK 16, N.Y.

## FOREWORD

Many times, wide differences appear in the high and low prices of certain equipment. Like any true reporter The Confidential Price Lists can only feature the market prices as they are quoted. The Confidential Price Lists act exactly the same as the market quotation board at the Stock Exchange—posting the prices exactly as they are quoted for each week, regardless of how much they may seem to be out of line. Some machine prices do not change for months. The Confidential Price Lists, rather than show no price for the week, retain the last known quotations for such equipment so that the subscriber at least has the last known quoted prices as a basis to work with. Prices continue to be very widely divergent these days. Someone on the West Coast may feel a certain machine worth \$150.00 whereas someone on the East Coast may think it worth but \$75.00. Of course, condition, serial, appearance, demand, territory, quantity, etc., must all be taken into consideration. The Confidential Price Lists report each quotation exactly as it is made and depend on the subscriber to make average price adjustment to fit the peculiarities of his own territory.

## METHOD

The Confidential Price Lists are to be read as follows: First price listed is lowest price for the week; Second price listed is highest price for the week; Where only one price appears this should be considered lowest price.

## CODE

CHECK THIS CODE CAREFULLY. BECOME ACQUAINTED WITH EACH ONE OF THE CODE NUMBERS AND WHAT THEY SIGNIFY. THESE CODE NUMBERS APPEAR IN FRONT OF THE NAME OF EACH MACHINE.

1. MEANS PRICE WENT UP.
2. MEANS PRICE WENT DOWN.
3. MEANS MACHINE JUST ADDED TO LIST.
4. MEANS PRICES WENT UP AND DOWN  
SAME WEEK.
5. MEANS PRICES REMAINED SAME AS IN  
PAST WEEK'S ISSUE.
6. MEANS NO PRICES QUOTED FOR  
PAST TWO WEEKS.
7. MEANS NO PRICES QUOTED FOR  
PAST THREE WEEKS.
8. MEANS NO PRICES QUOTED FOR  
PAST FOUR WEEKS OR LONGER.

---

## IMPORTANT

Machines underlined mean these were most active  
in trading this past week.

---

**NOTICE!** March, 1942, Market Prices for Wholesalers as per GMPR of OPA appeared in September 7, 1943 issue. Reprints are available.
