**WAR LOAN**

A graphic illustration for a War Loan. It features a large, bold number '7'. The top horizontal bar of the '7' is replaced by the American flag. Two stylized figures are shown at the base of the number, appearing to hold it up. The text 'THE MIGHTY' is positioned above the number, and 'WAR LOAN' is below it. A small 'th' is visible at the bottom of the number's stem.

# RECONVERSION

Perhaps the most discussed topic in this industry today is "reconversion", and how this is applicable to the products of this trade. Everywhere in the nation coin-men, whenever and wherever they meet, instantly open discussions on when they can expect to see new machines.

So many different versions have been offered, and so many different guesses made, as to when new equipment can be expected, that it is perhaps time for some of these views to be presented for general digest.

WPB

For example, WPB (War Production Board) has revoked one limitation order after another. These revocations seem to have opened the possibility for immediate domestic products manufacture.

In addition to the revoking of these limitation orders and restrictions of all kinds, WPB has also issued priority ratings for industry to help manufacturers get under way. Some of these, like PR-27 will, without any doubt, prove of tremendous worth to the smaller manufacturers who produce less than \$50,000 worth of goods quarterly.

Yet, with all the revocations of these limitation orders, and the elimination of many restrictions, no new equipment seems to be getting under way. In fact, no one seems to be too excited about reconversion. As one noted manufacturer put it, "WPB has told us we can again go swimming back in the old swimming hole of pre-war days, but not to get wet so doing."

What he actually meant was that regardless of all these revocations, which have come out of Washington at such a frantic rate, there has been no one order issued which makes possible the actual obtaining of materials for the manufacture of domestic products. L-81, L-27 and L-21, for example, were suddenly revoked, and a big, big "but" inserted in these revoked orders.

This was the fact that copper, lead, zinc, tin, plastic, nickel, chromic acid, steel and rubber could not be used. It seems hardly possible that any manufacturer could build a game, or juke box, or parking meter, or vending machine, without these vital metals.

In short, the coin machine manufacturers can make all the machines they want to provided some hidden, unknown method for manufacture can be invented, or discovered, eliminating the use of the vital metals which are still restricted.

WMC

The same is true in the case of WMC (War Manpower Commission). Here, it seems, after reading first releases, manpower would be made instantly available. In fact, there are reports from some veterans' organizations that returned servicemen who seek work are unemployed. Over 28,000 such men in one district alone.

Yet, after carefully going over the announcements which have been so far issued it definitely seems that the present method of employment will continue, and that manpower in war plants is still tied down to those war plants, whether they like the jobs or not.

WPB

And, just as this was being realized, out comes another statement from WPB that they have decided to maintain their control over metals so that they will be able to assure those factories still at work on materials for the war with Japan, that they will be the first to get all they need.

They will then allow the "most essential" users to get what is left over. The balance to go to whoever shall ask for it. It is a surety that there will be very little left over after the "essential" industries get thru claiming what they need for manufacture.

## "The Coin Machines Merry-Go-Round"

WLB

WLB (War Labor Board) also issues statement after statement and advises that they have come to a formula which will make things easier for all manufacturers. Manufacturers can now bargain with employees and arrange for a contract, and if this is agreeable with the employees, they can go right ahead with it. They must report it to WLB and send a copy, but they need not have WLB in the picture while the agreement is being thrashed out with the employees.

WLB realizes that present wartime wages may be too high for the average factory to pay for former products production and that some wage adjustments will have to be made so that manufacturers can meet competition.

Almost instantly after this notification, which pleased a great many manufacturers, came reports from labor that they will not stand for it, and WLB again steps into the picture with a new formula which is practically back to the original method of bargaining.

OPA

Then OPA, too, must appear in the picture for, after all, price ceilings are important and inflation must be curtailed if at all possible. This is admirable. And agreeable to everyone. There is also no doubt that every man and woman in the nation wants to avoid the type of inflation now rampant in China.

OPA sets up a plan whereby the manufacturer can base himself either on his 1942 prices or go back to his 1941 prices, adding on materials and labor increases and the same profit margin as of 1936 to 1939, and apply this to his new product. He can then set his own price on his product and send that price to OPA who, unless they believe it to be too high, will allow it to remain. This certainly sounds like a very good formula.

None of the manufacturers in this industry manufactured during '42 and therefore they will have to go back to their 1941 prices and make the proper additions and adjustments as per OPA's formula.

VMR

In addition to all this, Fred M. Vinson, Director of War Mobilization and Reconversion, enters into the picture to urge instant reconversion to domestic production. This sounds great. The only trouble with it is - how can a manufacturer revert to his former products production if he isn't going to be given the necessary materials with which to make such reconversion possible?

MUD

Therefore the picture becomes less and less clear each day. In fact, at this very stage, it is muddier than the Mississippi, and getting more muddy with each new announcement that comes out of Washington.

Generally, it is hoped that the Government agencies will all get together and for once issue uniform statements to industry which will allow for the proper sort of reconversion to go into effect. Simply revoking a limitation order, which instantly elates, uplifts and excites, and then placing restrictions on the materials which were in that order, does not make for reconversion.

This industry is much puzzled, as are all other industries. Its members listen to their radios with great care, they scan their morning newspapers with eagle eyes, they even go out of their way to buy important business papers and magazines. They do everything they possibly can to get information, and when they are finished, they are more puzzled and more perplexed than when they started.

END

The average coinman does not believe that there will be new equipment in any quantity to speak of during 1945. He does believe that some machines will be shipped to distributors within six months or so, but that actual volume production is as yet very far off.

In fact, he is also of the belief that it will be anywhere from 18 to 24 months before the trade will actually see any real coverage of this market, for the backlog demand for new equipment is so great that it will take that much time, even with greatly speeded and more efficient production, to somewhat, and very thinly, cover this demand.

He is also convinced that even should the manufacturers get back into production sooner than this six months period, that the difficulties they will encounter in getting sufficient materials to continue production will greatly cut down on any volume schedule which they have in mind. The result, they believe, will be that just a few machines will appear on the market in certain high spots in the nation.

## "The Coin Machines Merry-Go-Round"

The few coinmen want to get caught short with purchases of used equipment at extremely high prices, they are all of the belief that even if they did buy more machines, even at present prices, that they simply couldn't get hurt too much, because of the fact that they will have greatly amortized whatever they will have purchased, before any real volume of new machines appear on the market.

They also point to the export market (which they believe will be greater than ever before in history) as a buyer for almost every type of used machine they can present. Some of the smaller coinmen, who have had little experience exporting equipment, feel that export pools should be created in the larger export centers, such as New York and San Francisco. They suggest that these pools act for all coinmen interested in selling their equipment abroad.

The general concensus is, therefore, that the trade had best continue along on its present basis. At least until the restrictions are lifted on the materials necessary to manufacture new equipment.

Every success in this industry hinges on the locations, and not so much on the machines that will be produced. Tho all want new machines, and need new equipment very much, they believe that the best thing to do is to continue to buy and sell on the used machines market to keep their locations completely satisfied with whatever equipment they can now obtain, and to also thereby keep these locations at the highest possible earning peak.

When the new machines do appear, they will then move them into their locations and arrange for the gradual sale or trade-in of their older equipment, until their routes are completely re-equipped with new machines. But this, they are certain, will not be the case for sometime yet to come.

Oddly enough, almost every coinman seems to be in agreement that the period of transition and adjustment for this industry will come about 18 months to two years after V-J day.

At that time, they believe, there will be new machines of revolutionary types coming off the production lines at a speedier rate than during pre-war days. And that selling will once again become the art that it is supposed to be. Many new faces, they also believe, will appear in the trade at that time and many new sales and operating methods will be popular. Of course, all this is highly visionary, but proves that the men in this industry are thinking far enough ahead for their own future welfare.

The average coinman feels that anything produced with a coin chute will sell during this first production period. They feel that salesmanship will not prove necessary. All that will be needed, they claim, will be delivery of the machines to the members of this trade who are so eagerly looking forward to again buying new equipment.

The adjustment period, then, at least to their way of thinking, will arrive after the first complete sales coverage period. But from present indications, the orders and revocations which are being issued by the Government agencies have the members of this trade all at sea.

All are trying to get more clearly defined information from Government branch offices, as well as directly from Washington. And all seem to be, instead, wallowing deeper and still deeper into the mire of a puzzle that grows greater with each announcement that comes out of Washington.

There is no doubt that all this confusion will soon be cleared up, and that this industry will get some definite idea as to just where it actually stands for reconversion to its former products production.

In the meantime, The Cash Box once again repeats, that it will pay each and everyone of the members of this industry to continue to remain cool, calm and collected and not to fly off the handle at each news announcement that comes out of Washington these days. The manufacturers, themselves, will be more than happy to make an "official announcement" the very moment they feel that they can do so and thereby eliminate confusion.

## INDUSTRY SETTLES DOWN TO WAITING PERIOD

**Revoked L-21 Ferment Cools. Industry Waiting for Restrictions to be Lifted. General Belief Few New Machines in '45. Distributors Ask Territories be Designated. Used Prices Holding Up Well.**

NEW YORK — The boiling ferment which was apparent in the industry this past week has somewhat cooled and the members of the trade are settling down to a waiting period when restrictions on use of vital materials will be lifted by the War Production Board so that the manufacturers can get into instant action.

Generally the trade does not believe that new machines, in any quantity whatsoever, will be seen this year. All are more or less agreed that some machines will come off production lines, but that these can be placed in the category of samples for distributors and jobbers throughout the nation.

As one noted coinman put it, "If the auto manufacturers do not believe that they will get started until very late of the Fall of this year, there is no reason to believe that the coin machine manufacturer will get started any sooner. And even when the coin machine manufacturer does get started there is no doubt that he will only be able to produce just whatever his inventory is at that time. He certainly would not rush out a first batch of machines on the market without a steady production schedule to back this up."

In the meantime distributors are rushing on to Chicago where they are attempting to arrange to get their territories clarified and also have manufacturers announce their choice for distribution. It is generally believed, among the distributors, that this is the best way to get set for the opening of the post-war production period.

The wait, they claim, will not be long enough for them to get set for this period. They believe that they should have their sales and service forces in good action weeks before the new machines start coming off the production lines.

In the meantime the most important division of this industry, the division on which all business was based during this wartime period, the used machines market, is still holding up very well. There has been no sudden price avalanche in this field. Some prices have shown a tendency to go down but the average of the market is such that the claim can be made that the entire used machines field has held up very well.

From all present indications it seems that this will continue to be the case until machines start coming off manufacturers' production lines in real quantity. Even then many are of the belief that the used prices will continue to hold up for more than 18 months or so to come. They cannot foresee this market being affected by the first year's production.

## EXPECT BIGGEST SUMMER SEASON

**Arcade and Resort Operators Believe This Summer Season Will Be Biggest Yet.**

NEW YORK — Arcade and resort operators, everywhere in the country, look to the 1945 Summer season as the best yet.

Many believe that because of labor layoffs, which will come about as more war work is cutback, the resorts will be more crowded than ever before.

Others also point to the fact that with more gasoline sure to become available soon, and also with tire rationing relaxing to a great extent, that travel to the summer spots will be greater than it has been since Pearl Harbor.

Already many arcade men have opened their spots, ahead of the season, and report that the resort hotels in their localities are jammed with reservations.

Some arcade men have also opened new spots at the shore resorts and also in the mountains in the belief that play action this Summer will exceed anything as yet known.

The greater majority also claim that the play will go to the more liberal machines this year. Many are eliminating packs of cigarettes as awards. Others are also featuring larger coin play, as for example 25c poker roll down games. Some are planning to adopt complete group game action wherever possible, they claim that these will prove the best moneymakers this season.

Arcades have been renovated and dressed up to meet the expected large crowds this year. Such outstanding resort spots as Atlantic City arcades expect to look their best this year.

Regardless of the fact that many soldiers and sailors have returned to civilian life resort operators claim that the manpower shortage continues, and that this will be their biggest problem this year, just as it was this past year.

They are of the hope that they will be able to hire more service and repairmen this summer to help them make this '45 season the greatest in coin machine history.

### ED and AL RAVREBY OPEN ASSOCIATED AMUSEMENTS IN BOSTON, MASS.

BOSTON, MASS. — Ed and Al Ravreby, catering to the New England coin machine trade for the past 23 years, open their new distributing organization in June under the name of Associated Amusements, Inc. at 72 Brookline Ave., Boston, Mass.

The building at Brookline Avenue is ideally located, and renovations will be completed by June. The ultra modern design of store front, show rooms, offices and repair departments combines to make this one of the most outstanding distributor and jobbing layouts in the country. The 8,000 square feet of space has been carefully allocated to the various departments, and permits plenty of space for display of used equipment and showrooms for new equipment (when available). Special provisions have been made for coinmen to drive their cars right into the building.

At this time, Associated will carry a complete line of all types of used equipment, and foremost importance is placed on the expert repair and renovation by mechanics of long experience. "Right at this time" says Ed Ravreby, "the most important service a distributor can give his customers is to see that they get the most perfect working used equipment so that they can conduct their business profitably. As far as new equipment is concerned, we shall be in a position to make a very important announcement to the trade in the very near future."

### AL STERN SEVERS CONNECTION AT MONARCH

CHICAGO — Al Stern, recognized as one of the outstanding coinmen in the country for many years, announced that he has severed his connection with Monarch Coin Machine Co. of Chicago, Ill., although still retaining his interests in the Pacific Coast Distributors at Los Angeles, Calif., and the Coin Machine Service Co. of Chicago.

Stern has not as yet formulated his future plans, as he has just recovered from a recent operation. However, he claims he will make an announcement to the trade very shortly.

Due to his close interest in the problems of the industry, Al has won an outstanding reputation with operators, distributors and manufacturers. In recent months, he has spent considerable time in assisting to alleviate a pressing problem involving all in the industry.

At the present time, Stern may be reached at 6038 North Washenaw Ave., Chicago, Ill. or by phone at Sheldrake 9136.

### APPELLATE COURT RULES GAMBLING EQUIPMENT SEIZED ILLEGALLY

CHICAGO, ILL. — The Appellate court in Illinois ruled this week that there is no such thing as gambling paraphernalia that could of itself be considered such and be deemed contraband. Decision was handed down in a case where equipment was seized in a raid at Rock Gardens, a gambling house at Cicero.

The judges ruled that no statutes define gambling paraphernalia unless it were shown that "money was staked, wagered, won or lost" upon the equipment. The court pointed out that cards, poker chips and other equipment frequently associated with gambling was sold openly in stores, and that no law is violated by such sale.

## ONE-BALLS SUFFER REVERSE IN SAVANNAH, GA.

SAVANNAH, GA. - Operations of 1-balls, here, which have been having a tough time for the past months, seem definitely down now. Recent circumstances have brought the machines before the eye of the court and it appears as if they will be withdrawn from operating.

## WARNING - BE CAREFUL

NEW YORK CITY - Every once in a while we receive a flood of wires and phone calls on the same day requesting information about some concern or individual who gets in touch with coin machines companies by telephone and offers equipment for sale at good prices. Usually this party insists on deposits being wired to him. Many firms, without stopping to investigate, wire money.

We suggest that, in instances like this, when the seller is unknown, coin machine firms check carefully before wiring deposits.

# Bally

IS BACKING  
THIS JUNGLE FIGHTER

Steady, ever-increasing production of vital war products, already acknowledged three times by our government, tells the story of Bally in this great war. It means that Bally is helping to arm our fighters on far flung battle fronts. And too, it demonstrates that in the future as in the past, you can bank on Bally games and venders.

# C. M. I. BLUE BOOK

The "Coin Machine Industry Blue Book" for new and used coin operated equipment is issued every week. It is a review and digest of all selling prices based upon the market quotations for the week. Copyrighted 1945 by The Cash Box, 381 Fourth Avenue, New York 16, N. Y.

## FOREWORD

Many times, wide differences appear in the high and low prices of certain equipment. Like any true reporter The C.M.I. Blue Book can only feature the market prices as they are quoted. The C.M.I. Blue Book acts exactly the same as the market quotation board at the Stock Exchange—posting the prices exactly as they are quoted for the past week, regardless of how much they may seem to be out of line. Some machine prices do not change for months. The C.M.I. Blue Book, rather than show no price, retains the last known quotations for such equipment so that the subscriber at least has the last known quoted prices as a basis to work with. Prices continue to be very widely divergent these days. Someone on the West Coast may feel a certain machine worth \$150.00 whereas someone on the East Coast may think it worth but \$75.00. Of course, condition, serial, appearance, demand, territory, quantity, etc., must all be taken into consideration. The C.M.I. Blue Book reports each quotation exactly as it is made and depend on the subscriber to make average price adjustment to fit the peculiarities of his own territory.

## METHOD

The C.M.I. Blue Book is to be read as follows: First price listed is lowest price for the week; Second price listed is highest price for the past week. Where only one price appears this should be considered lowest price.

## CODE

CHECK THIS CODE CAREFULLY. BECOME ACQUAINTED WITH EACH ONE OF THE CODE NUMBERS AND WHAT THEY SIGNIFY. THESE CODE NUMBERS APPEAR IN FRONT OF THE NAME OF EACH MACHINE.

1. MEANS PRICE WENT UP.
2. MEANS PRICE WENT DOWN.
3. MEANS MACHINE JUST ADDED TO LIST.
4. MEANS PRICES WENT UP AND DOWN DURING THE PAST WEEK
5. MEANS PRICES REMAINED SAME AS IN LAST PRICE LISTS.
6. MEANS NO PRICES QUOTED FOR PAST TWO WEEKS
7. MEANS NO PRICES QUOTED FOR PAST THREE WEEKS
8. MEANS NO PRICES QUOTED FOR PAST FOUR WEEKS OR LONGER

## IMPORTANT

Machines underlined mean these were most active in trading the past week.

**NOTICE!** March, 1942. Market Prices for Wholesalers as per GMPR of OPA appeared in September 7, 1943 issue. Reprints are available.
