§73.126 Definitions.—(a) A "legally qualified candidate" means any person who has publicly announced that he is a candidate for nomination by a convention of a political party or for nomination or election in a primary, special, or general election municipal, county, state or national, and who meets the qualifications prescribed by the applicable laws to hold the office for which he is a candidate, so that he may be voted for by the electorate directly or by means of delegates or electors, and who

(1) has qualified for a place on the ballot or
 (2) is eligible under the applicable law to be voted by sticker, by writing in his name on the ballot, or other method, and (1) has been duly nominated by a political party which is commonly known and regarded as such, or (2) make a substantial showing that he is a bona fide candidate for nomination or office, as the case may be.

(b) General requirements.—No station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any such candidate to use its facilities,

it shall afford equal opportunities to all other such facilities: Provided, that such licensee shall have no power of censorship over the material broadcast by any such candidate.

(c) Rates and Practices.—(1) The rates, if any, charged all such candidates for the same office shall be uniform and shall not be rebated by any means direct or indirect. A candidate shall, in each case, be charged no more than the rate the station would charge if the candidate were a commercial advertiser whose advertising was directed to promoting its business within the same area as that encompassed by the particular office for which such person is a candidate. All discount privileges otherwise offered by a station to commercial advertisers shall be available upon equal terms to all candidates for public office.

(2) In making time available to candidates for public office no licensee shall make any discrimination between candidates in charges, practices, regulations, facilities, or services for or in connection with the service rendered pursuant to this part, or make or give any preference to any candidate for public office or subject any such candidate to any prejudice or disadvantage; nor shall any licensee make any contract or other agreement which shall have the effect of permitting any legally qualified candidate for any public office to broadcast to the exclusion of other legally qualified candidates for the same public office.

(d) Records: Inspections.—Every licensee shall keep and permit public inspection of a complete record of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such request, and the charges made. If any, if request is granted. Such records shall be retained for a period of two years.

NOTE: See §1.526 of this chapter.

(e) A request for equal opportunities must be submitted to the licensee within one week of the day on which the prior use occurred.

(f) A candidate requesting such equal opportunities of the licensee, or complaining of non-compliance to the Commission, shall have the burden of providing that he and his opponent are legally qualified candidates for the same public office.

REBROADCASTS

In AM rules . . .

§73.121 Rebroadcast.—(a) The term "rebroadcast" means reception by radio of the program of a radio station, and the simultaneous or subsequent retransmission of such program by a broadcast station.

NOTE: As used in §73.121, program includes any complete program or part thereof, or any signals if other than A-3 emission. In case a program is transmitted from its point of origin to a broadcast station entirely by telephone facilities in which a section of such transmission is by radio, the broadcasting of this program is not considered a rebroadcast.

(b) Standard broadcast stations may, without further authority from the Commission, rebroadcast programs originated by other United States standard and FM broadcast stations, provided that the Commission is notified in writing of the call letters of each station rebroadcast, together with certification that the originating station(s) has consented to the rebroadcast(s). However, the requirements of this paragraph do not apply to emergency rebroadcasting conducted pursuant to §73.971(b) of this part, which provides unrestricted AM/FM/TV rebroadcast privileges for stations utilizing the facilities, systems, and procedures of a Detailed State EBS Operational Plan.

NOTE: The notice and certification of consent shall be given within three (3) days of any single rebroadcast, but in case of the programs of a standard broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for renewal of license, or at the beginning of such rebroadcast practice if begun during a license period.

(c) (1) The licensee of a standard broadcast station located within a state or the District of Columbia may, without further authority of the Commission, rebroadcast on a noncommercial basis a noncommercial program of a United States international broadcast station.

(2) The licensee of a standard broadcast station located in any territory or insular possession of the United States may, without further authority of the Commission, rebroadcast any program of a United States international broadcast station.

(3) In the case of any rebroadcast under the provisions of this paragraph (c), the Commission shall be notified of the call letters of each station whose programs are rebroadcast and the licensee shall certify that express authority has been received from the licensee of the station originating the program.

(d) No licensee of a standard or high frequency broadcast station shall rebroadcast the program of any other class of United States radio station without written authority having first been obtained from the Commission upon application accompanied by written consent or certification of consent of the licensee of the station originating the program.

NOTE 1: The broadcasting of a program relayed by a remote pick-up broadcast station (§74.401 of this chapter) is not considered a rebroadcast.

NOTE 2: Informal applications may be employed.

NOTE 3: By order No. 82, dated and effective June 24, 1941, until further order of the Commission, §73.121(d) is suspended only insofar as it requires prior written authority of the Commission for the rebroadcasting of programs originated for that express purpose by United States Government radio stations.

(e) In case of a program rebroadcast by several standard broadcast stations, such as a chain broadcast, the person legally responsible for distributing the program or the network facilities may obtain the necessary authorization for the entire rebroadcasts both from the Commission and from the person or licensee of the station originating the program.

(f) Attention is directed to section 325 (b) of the Communications Act of 1934, which reads as follows (see also §1.545 of this chapter):

No person shall be permitted to locate, use, or maintain a radio broadcast studio or other place or apparatus from which or whereby sound waves are converted into electrical energy, or mechanical or physical reproduction of sound waves produced, and caused to be transmitted or delivered to a radio station in a foreign country for the purpose of being broadcast from any radio station there, having a power output of sufficient intensity, and/or being so located geographically that its emissions may be received consistently in the United States, without first obtaining a permit from the Commission, upon proper application therefore.

§73.124 Fraudulent billing practices.—No licensee of a standard broadcast station shall knowingly issue to any local, regional or national advertiser, advertising agency, station representative, manufacturer, distributor, jobber or any other party, any bill, invoice, affidavit or other document which contains false information concerning the amount actually charged by the licensee for the broadcast advertising for which such bill, invoice, affidavit or other document is issued, or which misrepresents the nature, content or quantity of such advertising. Licensees shall exercise reasonable diligence to see that their agents and employees do not issue any documents which would violate this section if issued by the licensee.

NOTE: Commission interpretations in connection with this Rule may be found in a separate Public Notice issued October 22, 1965 entitled "Applicability of Fraudulent Billing Rule" (FCC 65-952).

[EDITOR'S NOTE: Substantially identical rules apply to FM licensees (§73.299) and television licensees (§73.678).]

In TV rules . . .

§73.655 Rebroadcast.—(a) The term "rebroadcast" as used below means reception by radio of the program of a television broadcast station, and the simultaneous or subsequent retransmission of such programs by a broadcast station. The broadcasting of a program relayed by an auxiliary broadcast station licensed to the television broadcast station is not considered rebroadcast. (As used in this section, program includes any complete program or part thereof.)

(b) Television broadcast stations may, without further authority from the Commission, rebroadcast programs originated by other United States television stations, provided that the Commission is notified in writing of the call letters of each station rebroadcast, together with certification that the originating station(s) has consented to the rebroadcast(s). However, the requirements of this paragraph do not apply to emergency rebroadcasting conducted pursuant to §73.971(b) of this part, which pro-

FCC Rules

vides unrestricted AM/FM/TV rebroadcast privileges for stations utilizing the facilities, systems, and procedures of a Detailed State EBS Operational Plan.

NOTE: The notice and certification of consent shall be given within 3 days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain programs of a television broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for renewal of license, or at the beginning of such rebroadcast practice. If begun during a license period.

(c) No licensee of a television broadcast station shall rebroadcast the program of any United States radio station not designated in paragraph (b) of this section without written authority having first been obtained from the Commission upon application (informal) accompanied by written consent or certification of consent of the licensee of the station originating the program. The foregoing requirements concerning notification of call letters and certification of authority shall not apply to a station when rebroadcasting Defense Network (FM) programs. Blanket authorizations for the rebroadcast of such programs have been filed with the Commission by all Defense Network (FM) stations.

REVOCATIONS, MODIFICATIONS, SUSPENSIONS

(All Classes of Station Licenses)

§1.87 Modification of license or construction permit on motion of the Commission.—(a) Whenever it appears that a station license or construction permit should be modified, the Commission will notify the licensee or permittee in writing of the proposed action and the grounds and reasons therefor and direct him to show cause why an order modifying the license or construction permit in the manner proposed by the Commission should not be issued.

(b) Any order to show cause issued in accordance with paragraph (a) of this section will notify the licensee or permittee that he may request within a period of time to be stated in the order to show cause, that a hearing be held on the proposed modification. In case of timely request, a hearing will be held on the proposed modification, in no event less than 30 days after the receipt of the order to show cause, unless the Commission finds that safety of life or property require the fixing of a shorter period.

(c) In order to avail himself of the right to request a hearing and of the opportunity to appear and give evidence upon the matters specified in the order to show cause, the licensee or permittee, in person or by his attorney shall, within the period of time as may be specified in the order to show cause, file with the Commission a written statement stating that he request a hearing and will appear at the hearing and present evidence on the matter specified in the order to show cause. Such written statement must contain a detailed response to the matter specified in the order to show cause and the permittee or licensee shall be limited in the hearing to matters fairly encompassed within the issues raised by the response.

(d) The right to request a hearing shall, unless a good cause is shown in a petition to be filed not later than 5 days before the lapse of the time specified in paragraph (c) of this section, be deemed waived:

(1) In case of failure to timely file a written statement as required by paragraph (c) of this section.

(2) In case of filing the written statement provided for in paragraph (c) of this section but failure to appear at the hearing, either in person or by counsel.

(e) Where the right to request a hearing is waived and no written statement has been filed within the period of time specified in the order to show cause, the licensee or permittee will be deemed to consent to the modification as proposed in the order to show cause and a final decision will be issued by the Commission accordingly.

(f) Where the right to request a hearing has been waived, a written statement may be filed within the period of time to be specified in the order to show cause, showing with particularity why the license or construction permit should not be modified or not so modified as proposed in the order to show cause. In this case, the Commission may, depending upon the facts alleged and proof offered, either call upon the submitting party to furnish additional information under oath, designate the proceeding for hearing, or issue without further proceedings an order modifying the

construction permit or license as proposed in the order to show cause or in said written statement. The order to show cause will advise the person against whom it is directed of Procedure set forth in this paragraph.

(g) Any order of modification issued pursuant to this section shall include a statement of the findings and the grounds and reasons therefor, shall specify the effective date of the order and shall be served on the licensee or permittee.

§1.89 Notice of violations.—(a) Any licensee who appears to have violated any provision of the Communications Act or any provision of this chapter shall be served with a written notice calling the facts to his attention and requesting a statement concerning the matter. FCC Form 793 may be used for this purpose.

(b) Within 10 days from receipt of notice or such other period as may be specified, the licensee shall send a written answer, in duplicate, direct to the office of the Commission originating the official notice. If an answer cannot be sent nor an acknowledgment made within such 10-day period by reason of illness or other unavoidable circumstances, acknowledgment and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay.

(c) The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. In every instance the answer shall contain a statement of action taken to correct the condition or omission complained of and to preclude its recurrence. In addition:

(1) If the notice relates to violations that may be due to the physical or electrical characteristics of transmitting apparatus and any new apparatus is to be installed, the answer shall state the date such apparatus was ordered, the name of the manufacturer, and the promised date of delivery. If the installation of such apparatus requires a construction permit, the file number of the application shall be given, or if a file number has not been assigned by the Commission, such identification shall be given as will permit ready identification of the application.

(2) If the notice of violation relates to lack of attention to or improper operation of the transmitter, the name and license number of the operator in charge shall be given.

§1.91 Revocation and/or cease and desist Proceedings: hearings.—(a) If it appears that a station license or construction permit should be revoked and/or that a cease and desist order should be issued, the Commission will issue an order directing the person to show cause why an order of revocation and/or a cease and desist order, as the facts may warrant, should not be issued.

(b) An order to show cause why an order of revocation and/or a cease and desist order should not be issued will contain a statement of the matters with respect to which the Commission is inquiring and will call upon the person to whom it is directed (the respondent) to appear before the Commission at a hearing, at a time and place stated in the order, but not less than thirty days after the receipt of such order, and give evidence upon the matters specified in the order to show cause. However, if safety of life or property is involved, the order to show cause may specify a hearing date less than thirty days from the receipt of such order.

(c) To avail himself of such opportunity for hearing, the respondent, personally or by his attorney, shall file with the Commission, within thirty days of the service of the order or such shorter period as may be specified therein, a written appearance stating that he will appear at the hearing and present evidence on the matters specified in the order. The Commission in its discretion may accept a late appearance. However, an appearance tendered after the specified time has expired will not be accepted unless accompanied by a petition stating with particularity the facts and reasons relied on to justify such late filing. Such petition for acceptance of late appearance will be granted only if the Commission determines that the facts and reasons stated therein constitute good cause for failure to file on time.

(d) Hearings on the matters specified in such orders to show cause shall accord with the practice and procedure prescribed in this subpart and Subpart B of this part, with the following exceptions: (1) In all such revocation and/or cease and desist hearings, the burden of proceeding with the introduction of evidence and the burden of proof shall be upon the Commission; and (2) the Commission may specify in a show cause order, when the circumstances of the pro-

ceeding require expedition, a time less than that prescribed in §§1.276 and 1.277 within which the initial decision in the proceeding shall become effective, exceptions to such initial decision must be filed. Parties must file requests for oral argument, and parties must file notice of intention to participate in oral argument.

(e) Correction or promise to correct the conditions or matters complained of in a show cause order shall not preclude the issuance of a cease and desist order. Corrections or promises to correct the conditions or matters complained of, and the past record of the licensee, may, however, be considered in determining whether a revocation and/or cease and desist order should be issued.

(f) Any order of revocation and/or cease and desist order issued after hearing pursuant to this section shall include a statement of findings and the grounds therefor, shall specify the effective date of the order, and shall be served on the person to whom such order is directed.

§1.92 Revocation and/or cease and desist Proceedings: after waiver of hearing.—(a) After the issuance of an order to show cause, pursuant to §1.91, calling upon a person to appear at a hearing before the Commission, the occurrence of any one of the following events or circumstances will constitute a waiver of such hearing and the proceeding thereafter will be conducted in accordance with the provisions of this section:

(1) The respondent fails to file a timely written appearance as prescribed in §1.91(c) indicating that he will appear at a hearing and present evidence on the matters specified in the order.

(2) The respondent, having filed a timely written appearance as prescribed in §1.91(c), fails in fact to appear in person or by his attorney at the time and place of the duly scheduled hearing.

(3) The respondent files with the Commission, within the time specified for a written appearance in §1.91(c), a written statement expressly waiving his rights to a hearing.

(b) When a hearing is waived under the provisions of paragraph (a) (1) or (3) of this section, a written statement signed by the respondent denying or seeking to mitigate or justify the circumstances or conduct complained of in the order to show cause may be submitted within the time specified in §1.91(c). The Commission in its discretion may accept a late statement. However, a statement tendered after the specified time has expired will not be accepted unless accompanied by a petition stating with particularity the facts and reasons relied on to justify such late filing. Such petitions for acceptance of a late statement will be granted only if the Commission determines that the facts and reasons stated therein constitute good cause for failure to file on time.

(c) Whenever a hearing is waived by the occurrence of any of the events or circumstances listed in Paragraph (a) of this section, the Chief Hearing Examiner (or the presiding officer if one has been designated) shall, at the earliest practicable date, issue an order reciting the events or circumstances constituting a waiver of hearing, terminating the hearing proceeding, and certifying the case to the Commission. Such order shall be served upon the respondent.

(d) After a hearing proceeding has been terminated pursuant to paragraph (c) of this section, the Commission will act upon the matters specified in the order to show cause in the regular course of business. The Commission will determine on the basis of all the information available to it from any source, including such further proceedings as may be warranted, if a revocation order and/or a cease and desist order should issue, and if so, will issue such order. Otherwise, the Commission will issue an order dismissing the proceeding. All orders specified in this paragraph will include a statement of the findings of the Commission and the grounds and reasons therefor, will specify the effective date thereof, and will be served upon the respondent.

(e) Corrections or promise to correct the conditions or matters complained of in a show cause order shall not preclude the issuance of a cease and desist order. Corrections or promises to correct the conditions or matters complained of, and the past record of the licensee, may, however, be considered in determining whether a revocation and/or cease and desist order should be issued.

(Of Operator Licenses)

§1.85 Suspension of operator licenses.—Whenever grounds exist for suspension of an operator license, as provided in Section 303(m) of the Communications Act, the Chief of the Safety and Special Radio Services Bureau, with respect to amateur

operator licenses, or the Chief of the Field Engineering and Monitoring Bureau, with respect to commercial operator licenses, may issue an order suspending the operator license. No order of suspension in any operators' license shall take effect until 15 days' notice in writing of the cause for the proposed suspension has been given to the operator licensee, who may make written application to the Commission at any time within said 15 days for a hearing upon such order. The notice to the operator licensee shall not be effective until actually received by him, and from that time he shall have 15 days in which to mail the said application. In the event that physical conditions prevent mailing of the application before the expiration of the 15-day period, the application shall then be mailed as soon as possible thereafter, accompanied by a satisfactory explanation of the delay. Upon receipt by the Commission of such application for hearing, said order of suspension shall be designated for hearing by the Chief, Safety and Special Radio Services Bureau or the Chief, Field Engineering Bureau, as the case may be, and said order of suspension shall be held in abeyance until the conclusion of the hearing. Upon the conclusion of said hearing, the Commission may affirm, modify or revoke said order of suspension. If the license is ordered suspended, the operator shall send his operator license to the office of the Commission in Washington, D.C. on or before the effective date of the order, or, if the effective date has passed at the time notice is received, the license shall be sent to the Commission forthwith.

LOGS AND RECORDS

§1.6 Availability of station logs and records for Commission inspection.—(a) Station records and logs shall be made available for inspection or duplication at the request of the Commission or its representative. Such logs or records may be removed from the licensee's possession by a Commission representative or, upon request, shall be mailed by the licensee to the Commission by either registered mail, return receipt requested, or certified mail, return receipt requested. The return receipt shall be retained by the licensee as part of the station records until such records or logs are returned to the licensee. A receipt shall be furnished when the logs or records are removed from the licensee's possession by a Commission representative and this receipt shall be retained by the licensee as part of the station records until such records or logs are returned to the licensee. When the Commission has no further need for such records or logs, they shall be returned to the licensee. The provisions of this rule shall apply solely to those station logs and records which are required to be maintained by the provisions of this chapter.

(b) Where records or logs are maintained as the official records of a recognized law enforcement agency and the removal of the records from the possession of the law enforcement agency will hinder its law enforcement activities, such records will not be removed pursuant to this section if the Chief of the law enforcement agency shall promptly certify in writing to the Federal Communications Commission that the removal of the logs or records will hinder law enforcement activities of the agency, and stating insofar as feasible the basis for his decision and the date when it can reasonably be expected that such records may be released to the Federal Communications Commission.

LOTTERIES

§1.122 Lotteries.—(a) An application for construction permit, license, renewal of license, or any other authorization for the operation of a broadcast station, will not be granted where the applicant proposes to follow or continue to follow a policy or practice of broadcasting or permitting "the broadcasting of any advertisement or of information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise, or scheme, whether said list contains any part or all such prizes." (See 18 U.S.C. §1304.)

(b) The determination whether a particular program comes within the provisions of paragraph (a) of this section depends on the facts of each case. However, the Commission will in any event consider that a program comes within the provisions of paragraph (a) of this section if in connection with such program a prize consisting of money or thing of value is awarded, to any person whose selection is dependent in whole or in part upon lot or chance, if as a condition of winning or competing for such prize, such winner or winners, are required to furnish any money, or thing of value or are re-

quired to have in their possession any product sold, manufactured, furnished or distributed by a sponsor of a program broadcast on the station in question.

§1304 (of U.S. Criminal Code) Broadcasting Lottery Information.—Whoever broadcasts by means of any radio station for which a license is required by any law of the U.S. or whoever, operating any such station, knowingly permits the broadcasting of any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise of scheme, whether said list contains any part or all of such prizes, shall be fined not more than \$1,000 or imprisoned not more than one year, or both.

Each day's broadcasting shall constitute a separate offense.

CENSORSHIP

§326 (of Communications Act).—Nothing in this Act shall be understood to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication.

INDECENT LANGUAGE

§1464 (of U.S. Criminal Code) Broadcasting obscene language.—Whoever utters any obscene, indecent, or profane language by means of radio communication shall be fined not more than \$10,000 or imprisoned not more than two years, or both.

TRANSFERS AND ASSIGNMENTS

§1.540 Application for voluntary assignment or transfer of control.—(a) Application for consent to the assignment of construction permit or license, or for consent to the transfer, of control or a corporation holding such a construction permit or license, shall be filed with the Commission on FCC Form 314 (Assignment of License), FCC Form 315 (Transfer of Control), or FCC Form 316 (Short Form). Such application should be filed with the commission at least 45 days prior to the contemplated effective date of assignment or transfer of control.

(b) The following assignment or transfer applications may be filed on Form 316.

(1) Assignment from individual or individuals (including partnerships) to a corporation owned and controlled by such individuals or partnerships without any substantial change in their relative interests; (2) Assignment from a corporation to its individual stockholders without effecting any substantial change in the disposition of their interests; (3) Assignment or transfer by which certain stockholders retire and interest transferred is not a controlling one; (4) Corporate reorganization which involves no substantial change in beneficial ownership; (5) Assignment or transfer from corporation to wholly owned subsidiary thereof or vice versa, or where there is assignment owned or controlled by assignor stockholders without substantial change in their interests; or (6) Assignment of less than a controlling interest in a partnership.

§1.541 Application for involuntary assignment of license or transfer of control.—(a) The Commission shall be notified in writing promptly of the death or legal disability of an individual permittee or licensee, a member of a partnership, or a person directly or indirectly in control of a corporation which is a permittee or licensee.

(b) Within 30 days after the occurrence of such death or legal disability, an application on FCC Form 316 shall be filed requesting consent to involuntary assignment of such permit or license or for involuntary transfer of control of such corporation to a person or entity legally qualified to succeed to the foregoing interests under the laws of the place having jurisdiction over the estate involved.

Station Application Procedure

How to Apply for a Broadcasting Station (AM/FM/TV)

(Updated to October 1968)

Any qualified citizen, firm, or group may apply to the Federal Communications Commission for authority to construct a standard (AM), frequency modulation (FM), or television (TV) broadcast station.

Licensing of these facilities is prescribed by the Communications Act of 1934, as amended, which sets up certain basic requirements. In general, applicants must satisfy the commission that they are legally, technically and financially qualified, and

that operation of the proposed station would be in the public interest.

The licensing procedure is detailed in Part 1 of the commission's rules of "Practice and Procedure." Station operation is covered by Part 73 (formerly Part 3) "Radio Broadcast Services." The latter includes technical standards for AM, FM and TV stations, and TV and FM channel (frequency) assignments by states and communities. Copies of these rules are not supplied by the commission but are available from the Government Printing Office.

Most applicants employ engineering and legal services in preparing their applications. The commission does not make technical or other special studies for prospective applicants nor does it recommend individual lawyers or engineers. Names of firms and individuals practicing before the commission are listed in various trade publications.

Following is a summary of the consecutive steps to be followed in applying for authorization to build and operate a broadcast station. The application procedure is substantially the same whether the facility sought is AM, FM or TV.

Selecting a Facility

An AM applicant must make his own search for a frequency on which he could operate without causing or receiving interference from existing stations and stations proposed in pending applications. AM broadcast stations operate on "local," "regional," or "clear" channels. Stations of 250 watts power nighttime and up to 1 kilowatt daytime serve small communities; stations of 500 watts to 5 kilowatts power cover centers of population and surrounding areas; stations of 10 to 50 kilowatts power are for large area coverage, particularly at night.

An FM station applicant must request an FM channel assigned to the community in which he proposes to operate, or a place within a 10-mile radius (for Class A FM stations) or a 15-mile radius (for Class B or Class C FM stations), which has no FM channel assignment. Power, antenna height and station separation are governed by which of three zones the station is to be located. There are three classes of commercial FM stations. Class A stations use power of from 100 watts to 3 kilowatts to cover a radius of about 15 miles; Class B stations, 5 kilowatts to 50 kilowatts for 40-mile service and Class C, 25 kilowatts to 100 kilowatts for 65-mile range. Noncommercial educational FM stations are in a separate category and may operate with power as low as 10 watts. Commercial and educational FM stations may apply for a "Subsidiary Communications Authorization" (Form 318) to furnish certain supplemental services. FM stations may engage in stereophonic broadcasting for which no special application is required.

An applicant for a TV station must request a VHF (very high frequency) or a UHF (ultra high frequency) channel assigned to the community in which he proposes to operate, or a place having no channel assignment within 15 miles of that community. Power depends upon the kind of channels used (VHF or UHF) and station separation is determined by three zones. TV "translator" stations serve remote communities by picking up and rebroadcasting the programs of outside stations, with latter's permission. They operate on VHF or the upper 14 UHF channels. Booster stations fill in the shadows of UHF station service areas. Certain channels are assigned for noncommercial educational TV operation. There is a "Community Antenna Relay Service" for non-common carrier microwave facilities to relay TV signals to community antenna television (CATV) systems.

Applying for a Construction Permit

After a prospective broadcaster has decided upon the type of station he desires, and the place where it would be located, he should ascertain and plan to meet the programming needs of the locality he intends to serve. The next step is to apply for a construction permit. This is done on FCC Form 301, "Application for Authority to Construct a New Broadcast Station or Make Changes in an Existing Broadcast Station," which covers AM, FM, or TV broadcast, except educational applicants who use FCC Form 340, TV translators (Form 346), and booster stations (Form 343). These forms require information about the citizenship and character of the applicant, as well as his financial, technical and other qualifications, plus details about the transmitting apparatus to be used, antenna and studio locations, and the service proposed. Commercial broadcast applicants are required to show their financial ability to operate for one year after construction of the station. Triplicate copies are required. Nonprofit educational institutions apply for new or changed instructional fixed TV stations on

Form 330P.

Applicants Must Give Local Notice

Applicants for new broadcast stations, license renewals, station sales or major changes in existing stations must give local public notice of such intent and also of any subsequent designation of their applications for hearing. This is done over the applicant's local station (if any) and by advertising in the local newspaper. It affords interested persons an opportunity to comment on these applications to the commission. Applicants and stations must also maintain public reference files in their respective localities.

Application Processing

All broadcast applications are reported twice by the commission—when first tendered (received) and, again, when formally accepted for filing. An application is not acted upon until at least 30 days after the commission gives public notice of its acceptance. During that time objecting petitions may be filed.

Competing AM applications may be filed up to a date specified (about 30 days subsequent to) in a notice of AM applications ready for processing. Competing FM and TV applications may be filed up to the day the initial application is ready for commission consideration.

Applications are, in general, processed in the order in which accepted. They are reviewed in their engineering, legal and financial aspects by the Broadcast Bureau, which, under delegated authority, can act on routine applications and report to the commission applications involving policy or other particular considerations. If an application has no engineering or other conflicts, has no valid protests, the applicant is found qualified. Assuming all other requirements are met, the application may be granted without hearing and a construction permit is issued. All such grants are announced by the commission. Petitions for reconsideration of grants without hearing made without hearing can be filed within 30 days thereafter but must show good cause why the objections were not raised before the grant.

Hearing Procedure

Where it appears that an application does not conform to the commission's rules and regulations, that serious interference would be caused, if there is protest of merit, or if other serious questions of a technical, legal or financial character develop, a hearing is usually required. The commission must accord a hearing to competing applications filed within specified time limits.

In designating an application for hearing, the commission gives public notice of the issues for the information of the applicant and others concerned. The hearing notice generally allows the applicant 60 days or more in which to prepare. Even after the hearing has been set, an applicant may amend his application to resolve engineering or other problems. (Commission approval is required for all mergers or situations in which a competing applicant withdraws on payment of expenses.)

Hearings on competing applications are normally held at the commission's Washington offices. Hearings on license revocations and renewals are held in the communities affected.

Hearings are customarily conducted by an examiner. He has authority to administer oaths, examine witnesses and rule upon the admission of evidence. A prehearing conference is held to reach agreement on procedural matters.

Within 20 days after the close of a record by the hearing examiner, each party and the chief of the Broadcast Bureau of the commission can file proposed findings of fact and conclusions to support their contentions. After review of the evidence and statements, the hearing examiner issues an initial decision.

If he wishes to contest the initial decision, the applicant or any other party in interest has 30 days from the date on which the initial decision was issued to file exceptions. In all cases heard by an examiner, the commission or its review board may hear oral argument on timely request of any party. After oral argument, the commission or the review board, as the case may be, may adopt, modify or reverse the hearing examiner's initial decision. In cases where the review board has acted on the exceptions, an appeal from its decision may be taken to the commission within 30 days. The commission may, however, deny the appeal for review without stating reasons for such action.

Court appeals can be taken within 30 days following release of the final decision, in which case the commission's action is stayed pending court determination.

Construction Permit

When an application is granted, a construction permit is issued. The new permittee may then request call letters which, if

available and conforming to the rules, are issued. A period of 60 days from date of the construction permit is provided in which construction shall begin, and a maximum of six months thereafter as the time for completion (or eight months in all). Application to make changes in an existing station is made on the same form used in seeking initial construction authorization (Form 301). Application to modify a broadcast construction authorization or to modify a license is made on form 301-A, "Request for Modification of Broadcast Station Authorization." If the permittee is unable to build his station within the time specified, he must apply for extension of time on Form 701 ("Application for Additional Time to Construct a Radio Station"), giving reasons. Upon completion of construction the permittee conducts equipment tests.

License

The final step is to apply for the actual license on Form 302 ("Application for New Broadcast Station License") or Form 341 (for noncommercial educational FM stations), Form 344 (for TV boosters), or Form 347 (for TV translators). Applicants must show compliance with all terms, conditions and obligations set forth in the original application and the construction permit. Not until he applies for a license can the holder of a construction permit request authority to conduct program tests. The license application form provides a space for program test request, or it can be made separately. A station license and program test authority are issued if no new cause or circumstance has come to the attention of the commission that would make operation of the station contrary to public interest.

Applicants for renewal of station licenses must show that they have operated according to the terms of their authorizations and the promises they made in obtaining them. Most renewal applications are made on Form 303 ("Application for Renewal of Broadcast Station License"). Noncommercial educational licensees use Form 342; and TV translators Form 348. Pending the disposition of any commission hearing or other proceeding involving license renewal or revocation, the station continues to operate even though its license term may have expired.

Sales and Transfers

If the holder of a construction permit or license desires to assign it to someone else, he makes application on Form 314 ("Application for Consent to Assignment of Radio Broadcast Station Construction Permit or License"). Should the permittee or licensee wish to transfer corporate control, he applies on Form 315 ("Application for Consent to Transfer Control of Corporation Holding Radio Broadcast Station Construction Permit or License"). Form 316 ("Application for Assignment or Transfer—Short Form") may be used when the transfer or assignment involves no substantial change in interest. Sales of stations held less than three years are subject to hearing except in case of death, hardship or other mitigating circumstances beyond the licensee's control.

Construction Changes

Applicants for authority to make construction changes in existing stations apply on the same form used for a construction permit for the type of station involved.

Application Fees

Since March 17, 1964, the commission has exacted fees for most application filings to comply with government policy to charge for certain federal services. The application fee for new station construction permits, major changes in existing stations, license renewals, assignment of license or transfer of control (exclusive of FCC Form 316), is \$75 for AM and FM stations, \$150 for TV stations, and \$10 for translators. Applicants using FCC Form 316 (the short form for transfer or assignment involving no substantial change in interest) pay \$30. There is no fee for translators and auxiliaries. A charge of \$30 is made for applications to change broadcast station call letters. The fee for other broadcast applications is \$30. Fees are not required for applications filed by tax-exempt organizations for operating noncommercial educational broadcast stations, whether or not such operation is on frequencies reserved for that use.

Printed Rules

FCC rules may be obtained only through the Government Printing Office, Washington, D. C. 20402. The rules on FCC practice and procedure are contained in Volume I, which is available at the Government Printing Office for \$4 a copy; the broadcast rules are contained in Volume III, for \$7. Orders should be sent to the Government Printing Office direct (not through the FCC). The printed rules are sold on a subscription basis, which entitles the purchaser to receive subsequent amendments to the rule part purchased.

NAB Television Code

Preamble

Television is seen and heard in every type of American home. These homes include children and adults of all ages, embrace all races and all varieties of religious faith, and reach those of every educational background. It is the responsibility of television to bear constantly in mind that the audience is primarily a home audience, and consequently that television's relationship to the viewers is that between guest and host.

The revenues from advertising support the free, competitive American system of telecasting and make available to the eyes and ears of the American people the finest programs of information, education, culture and entertainment. By law the television broadcaster is responsible for the programming of his station. He, however, is obliged to bring his positive responsibility for excellence and good taste in programming to bear upon all who have a hand in the production of programs, including networks, sponsors, producers of film and of live programs, advertising agencies, and talent agencies.

The American businesses which utilize television for conveying their advertising messages to the home by pictures with sound, seen free-of-charge on the home screen, are reminded that their responsibilities are not limited to the sale of goods and the creation of a favorable attitude toward the sponsor by the presentation of entertainment. They include, as well, responsibility for utilizing television to bring the best programs, regardless of kind, into American homes.

Television and all who participate in it are jointly accountable to the American public for respect for the special needs of children, for community responsibility, for the advancement of education and culture, for the acceptability of the program materials chosen, for decency and decorum in production, and for propriety in advertising. This responsibility cannot be discharged by any given group of programs, but can be discharged only through the highest standards of respect for the American home, applied to every moment of every program presented by television.

In order that television programming may best serve the public interest, viewers should be encouraged to make their criticisms and positive suggestions known to the television broadcasters. Parents in particular should be urged to see to it that out of the richness of television fare, the best programs are brought to the attention of their children.

I. Advancement of Education and Culture

1. Commercial television provides a valuable means of augmenting the educational and cultural influences of schools. Institutions of higher learning, the home, the church, museums, foundations, and other institutions devoted to education and culture.

2. It is the responsibility of a television broadcaster to call upon such institutions for counsel and cooperation and to work with them on the best methods of presenting educational and cultural materials by television. It is further the responsibility of stations, networks, advertising agencies and sponsors consciously to seek opportunities for introducing into telecasts factual materials which will aid in the enlightenment of the American public.

3. Education via television may be taken to mean that process by which the individual

is brought toward informed adjustment to his society. Television is also responsible for the presentation of overtly instructional and cultural programs, scheduled so as to reach the viewers who are naturally drawn to such programs, and produced so as to attract the largest possible audience.

4. The television broadcaster should be thoroughly conversant with the educational and cultural needs and desires of the community served.

5. He should affirmatively seek out responsible and accountable educational and cultural institutions of the community with a view toward providing opportunities for the instruction and enlightenment of the viewers.

6. He should provide for reasonable experimentation in the development of programs specifically directed to the advancement of the community's culture and education.

7. It is in the interest of television as a vital medium to encourage and promote the broadcast of programs presenting genuine artistic or literary material, valid moral and social issues, significant controversial and challenging concepts and other subject matter involving adult themes. Accordingly, none of the provisions of this code, including those relating to the responsibility toward children, should be construed to prevent or impede their broadcast. All such programs, however, should be broadcast with due regard to the composition of the audience. The highest degree of care should be exercised to preserve the integrity of such programs and to ensure that the selection of themes, their treatment and presentation are made in good faith upon the basis of true instructional and entertainment values, and not for the purposes of sensationalism, to shock or exploit the audience or to appeal to prurient interests or morbid curiosity.

II. Responsibility Toward Children

1. The education of children involves giving them a sense of the world at large. It is not enough that only those programs which are intended for viewing by children shall be suitable to the young and immature. In addition, those programs which might be reasonably expected to hold the attention of children and which are broadcast during times of the day when children may be normally expected to constitute a substantial part of the audience should be presented with due regard for their effect on children.

2. Such subjects as violence and sex shall be presented without undue emphasis and only as required by plot development or character delineation. Crime should not be presented as attractive or as a solution to human problems, and the inevitable retribution should be made clear.

3. The broadcaster should afford opportunities for cultural growth as well as for wholesome entertainment.

4. He should develop programs to foster and promote the commonly accepted moral, social and ethical ideals characteristic of American life.

5. Programs should reflect respect for parents for honorable behavior, and for the constituted authorities of the American community.

6. Exceptional care should be exercised with reference to kidnapping or threats of kidnapping of children in order to avoid terrorizing them.

7. Material which is excessively violent or would create morbid suspense, or other undesirable reactions in children, should be avoided.

8. Particular restraint and care in crime

or mystery episodes involving children or minors, should be exercised.

III. Community Responsibility

1. A television broadcaster and his staff occupy a position of responsibility in the community and should conscientiously endeavor to be acquainted fully with its needs and characteristics in order better to serve the welfare of its citizens.

2. Requests for time for the placement of public service announcements or programs should be carefully reviewed with respect to the character and reputation of the group, campaign or organization involved, the public interest content of the message, and the manner of its presentation.

IV. General Program Standards

1. Program materials should enlarge the horizons of the viewer, provide him with wholesome entertainment, afford helpful stimulation, and remind him of the responsibilities which the citizen has towards his society. The intimacy and confidence placed in television demand of the broadcaster, the network and other program sources that they be vigilant in protecting the audience from deceptive program practices.

2. Profanity, obscenity, smut and vulgarity are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words.

3. Words (especially slang) derivative of any race, color, creed, nationality or national derivation, except wherein such usage would be for the specific purpose of effective dramatization such as combating prejudice, are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words.

4. Racial or nationality types shall not be shown on television in such a manner as to ridicule the race or nationality.

5. Attacks on religion and religious faiths are not allowed. Reverence is to mark any mention of the name of God, His attributes and powers. When religious rites are included in other than religious programs the rites shall be accurately presented. The office of minister, priest or rabbi shall not be presented in such a manner as to ridicule or impair its dignity.

6. Respect is maintained for the sanctity of marriage and the value of the home. Divorce is not treated casually as a solution for marital problems.

7. In reference to physical or mental afflictions and deformities, special precautions must be taken to avoid ridiculing sufferers from similar ailments and offending them or members of their families.

8. Excessive or unfair exploitation of others or of their physical or mental afflictions shall not be presented as praiseworthy.

The presentation of cruelty, greed and selfishness as worthy motivations is to be avoided.

9. Law enforcement shall be upheld and, except where essential to the program plot, officers of the law portrayed with respect and dignity.

10. Legal, medical and other professional advice, diagnosis and treatment will be permitted only in conformity with law and recognized ethical and professional standards.

11. The use of animals both in the production of television programs and as part of television program content shall at all

NAB TV Code

times, be in conformity with accepted standards of humane treatment.

12. Care should be exercised so that cigarette smoking will not be depicted in a manner to impress the youth of our country as a desirable habit worthy of imitation.

13. Criminality shall be presented as undesirable and unsympathetic. The condoning of crime and the treatment of the commission of crime in a frivolous, cynical or callous manner is unacceptable.

The presentation of techniques of crime in such detail as to invite imitation shall be avoided.

14. The presentation of murder or revenge as a motive for murder shall not be presented as justifiable.

15. Suicide as an acceptable solution for human problems is prohibited.

16. Illicit sex relations are not treated as commendable.

Sex crimes and abnormalities are generally unacceptable as program material.

The use of locations closely associated with sexual life or with sexual sin must be governed by good taste and delicacy.

17. Drunkenness should never be presented as desirable or prevalent.

The use of liquor in program content shall be de-emphasized. The consumption of liquor in American life, when not required by the plot or for proper characterization, shall not be shown.

18. Narcotic addiction shall not be presented except as a vicious habit. The administration of illegal drugs will not be displayed. The use of hallucinogenic drugs shall not be shown or encouraged as desirable or socially acceptable.

19. The use of gambling devices or scenes necessary to the development of plot or as appropriate background is acceptable only when presented with discretion and in moderation, and in a manner which would not excite interest in, or foster, betting nor be instructional in nature.

20. Telecasts of actual sport programs at which on-the-scene betting is permitted by law should be presented in a manner in keeping with federal, state and local laws, and should concentrate on the subject as a public sporting event.

21. Program material pertaining to fortune-telling, occultism, astrology, phrenology, palm-reading, numerology, mind-reading or character-reading is unacceptable when presented for the purpose of fostering belief in these subjects.

22. Quiz and similar programs that are presented as contests of knowledge, information, skill or luck must, in fact, be genuine contests and the results must not be controlled by collusion with or between contestants, or any other action which will favor one contestant against any other.

23. No program shall be presented in manner which through artifice or simulation would mislead the audience as to any material fact. Each broadcaster must exercise reasonable judgment to determine whether a particular method of presentation would constitute a material deception, or would be accepted by the audience as normal theatrical illusion.

24. The appearances or dramatization of persons featured in actual crime news will be permitted only in such light as to aid law enforcement or to report the news event.

25. The use of horror for its own sake will be eliminated; the use of visual or aural effects which would shock or alarm the viewer, and the detailed presentation of brutality or physical agony by sight or by sound are not permissible.

26. Contests may not constitute a lottery.

27. The costuming of all performers shall be within the bounds of propriety and shall avoid such exposure or such emphasis on anatomical detail as would embarrass or offend home viewers.

28. The movements of dancers, actors, or other performers shall be kept within the bounds of decency, and lewdness and impropriety shall not be suggested in the positions assumed by performers.

29. Camera angles shall avoid such views of performers as to emphasize anatomical details indecently.

30. The use of the television medium to transmit information of any kind by the use of the process called "subliminal perception," or by the use of any similar technique whereby an attempt is made to convey information to the viewer by transmitting messages below the threshold of normal awareness, is not permitted.

31. The broadcasters shall be constantly alert to prevent activities that may lead to such practices as the use of scenic properties, the choice and identification of prizes,

the selection of music and other creative program elements and inclusion of any identification of commercial products or services, their trade names or advertising slogans, within a program dictated by factors other than the requirements of the program itself. The acceptance of cash payments or other considerations in return for including any of the above within the program is prohibited except in accordance with Sections 317 and 508 of the Communications Act.

32. A television broadcaster should not present fictional events or other non-news material as authentic news telecasts or announcements, nor should he permit dramatizations in any program which would give the false impression that the dramatized material constitutes news. Expletives, (presented aurally or pictorially) such as "flash" or "bulletin" and statements such as "we interrupt this program to bring you . . ." should be reserved specifically for news room use. However, a television broadcaster may properly exercise discretion in the use in non-news programs of words or phrases which do not necessarily imply that the material following is a news release.

33. Program content should be confined to those elements which entertain or inform the viewer and to the extent that titles, teasers and credits do not meet these criteria, they should be restricted or eliminated.

34. The creation of a state of hypnosis by act or demonstration on the air is prohibited and hypnosis as an aspect of "parlor game" antics to create humorous situations within a comedy setting cannot be used.

V. Treatment of News and Public Events

1. A television station's news schedule should be adequate and well-balanced.

2. News reporting should be factual, fair and without bias.

3. A television broadcaster should exercise particular discrimination in the acceptance, placement and presentation of advertising in news programs so that such advertising should be clearly distinguishable from the news content.

4. At all time pictorial and verbal material for both news and comment should conform to other sections of these standards, wherever such sections are reasonably applicable.

5. Good taste should prevail in the selection and handling of news:

Morbid, sensational or alarming details not essential to the factual report, especially in connection with stories of crime or sex, should be avoided. News should be telecast in such a manner as to avoid panic and unnecessary alarm.

6. Commentary and analysis should be clearly identified as such.

7. Pictorial material should be chosen with care and not presented in a misleading manner.

8. All news interview programs should be governed by accepted standards of ethical journalism, under which the interviewer selects the questions to be asked. Where there is advance agreement materially restricting an important or news-worthy area of questioning, the interviewer will state on the program that such limitation has been agreed upon. Such disclosure should be made if the person being interviewed requires that questions be submitted in advance or if he participates in editing a recording of the interview prior to its use on the air.

9. A television broadcaster should exercise due care in his supervision of content, format, and presentation of newscasts originated by his station, and in his selection of newscasters, commentators, and analysts.

Public Events

1. A television broadcaster has an affirmative responsibility at all times to be informed of public events, and to provide coverage consonant with the ends of an informed and enlightened citizenry.

2. The treatment of such events by a television broadcaster should provide adequate and informed coverage.

VI. Controversial Public Issues

1. Television provides a valuable forum for the expression of responsible views on public issues of a controversial nature. The television broadcaster should seek out and develop with accountable individuals, groups and organizations, programs relating to controversial public issues of import to his fellow citizens; and to give fair representation to opposing sides of issues which materially affect the life or welfare of a substantial segment of the public.

2. Requests by individuals groups or organizations for time to discuss their views

on controversial public issues, should be considered on the basis of their individual merits, and in the light of the contribution which the use requested would make to the public interest, and to a well-balanced program structure.

3. Programs devoted to the discussion of controversial public issues should be identified as such. They should not be presented in a manner which would mislead listeners or viewers to believe that the program is purely of an entertainment, news or other character.

4. Broadcasts in which stations express their own opinions about issues of general public interest should be clearly identified as editorials. They should be unmistakably identified as statements of station opinion and should be appropriately distinguished from news and other program material.

VII. Political Telecasts

1. Political telecasts should be clearly identified as such. They should not be presented by a television broadcaster in a manner which would mislead listeners or viewers to believe that the program is of any other character.

(Ref.: Communications Act of 1934, as amended, Secs. 315 and 317, and FCC Rules and Regulations, Secs. 3.654, 3.657, 3.663, as discussed in NAB's "A Political Catechism.")

VIII. Religious Programs

1. It is the responsibility of a television broadcaster to make available to the community appropriate opportunity for religious presentations.

2. Telecasting which reaches men of all creeds simultaneously should avoid attacks upon religion.

3. Religious programs should be presented respectfully and accurately and without prejudice or ridicule.

4. Religious programs should be presented by responsible individuals, groups and organizations.

5. Religious programs should place emphasis on broad religious truths, excluding the presentation of controversial or partisan views not directly or necessarily related to religion or morality.

6. In the allocation of time for telecasts of religious programs the television station should use its best efforts to apportion such time fairly among the representative faith groups of its community.

IX. General Advertising Standards

1. This Code establishes basic standards for all television broadcasting. The principles of acceptability and good taste within the Program Standards section govern the presentation of advertising where applicable. In addition, the Code establishes in this section special standards which apply to television advertising.

2. A commercial television broadcaster makes his facilities available for the advertising of products and services and accepts commercial presentation for such advertising. However, a television broadcaster should, in recognition of his responsibility to the public, refuse the facilities of his station to an advertiser, the truth of the advertising representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements.

3. Identification of sponsorship must be made in all sponsored programs in accordance with the requirements of the Communications Act of 1934, as amended, and the Rules and Regulations of the Federal Communications Commission.

4. Representations which disregard normal safety precautions shall be avoided. Children shall not be represented, except under proper adult supervision, as being in contact with, or demonstrating a product recognized as potentially dangerous to them.

5. In consideration of the customs and attitudes of the communities served, each television broadcaster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segments of the community. These standards should be applied with judgment and flexibility, taking into consideration the characteristics of the medium, its home and family audience, and the form and content of the particular presentation.

6. The advertising of hard liquor (distilled spirits) is not acceptable.

7. The advertising of beer and wines is acceptable only when presented in the best of good taste and discretion, and is acceptable only subject to federal and local laws. (See Television Code Interpretation No. 4)

8. The level of cigarette advertising on television will be reduced in progressive steps so that effective Sept. 1, 1973, all cigarette advertising will cease on sub-

scriber stations and networks. The base year of July 1, 1968-July 1, 1969 will be the measuring point for cigarette commercials. Each subscriber station and network will compute the total minutes of commercial time devoted to cigarette advertising during the base year.

Beginning Jan. 1970, each station and network will limit the total number of minutes available for sale to cigarette advertisers to the percentages of the base year minutes listed below:

Period Commencing	Pct.
Jan. 1, 1970	60%
Sept. 1, 1970	75%
Sept. 1, 1971	50%
Sept. 1, 1972	25%
Sept. 1, 1973	0

Each subscriber station and network will be required to file with the NAB Code Authority the total minutes of commercial time in its base year and to file periodic reports of cigarette commercials carried in the succeeding years.

The advertising of cigarettes shall not state or imply claims regarding health and shall not be presented in such a manner as to indicate to youth that the use of cigarettes contributes to individual achievement, personal acceptance or is a habit worthy of imitation.

No cigarette commercials shall be permitted in or adjacent to any program primarily directed to youth audiences.

9. Advertising by institutions or enterprises which in their offers of instruction imply promises of employment or make exaggerated claims for the opportunities awaiting those who enroll for courses is generally unacceptable.

10. The advertising of firearms/ammunition is acceptable provided it promotes the product only as sporting equipment and conforms to recognized standards of safety as well as all applicable laws and regulations. Advertisements of firearms/ammunition by mail order are unacceptable. The advertising of fireworks is acceptable subject to all applicable laws.

11. The advertising of fortune-telling, occultism, astrology, phrenology, character reading or subjects of a like nature is not permitted.

12. Because all products of a personal nature create special problems, acceptability of such products should be determined with special emphasis on ethics and the canons of good taste. Such advertising of personal products as is accepted must be presented in a restrained and obviously inoffensive manner.

13. The advertising of tip sheets, race track publications, or organizations seeking to advertise for the purpose of giving odds or promoting betting or lotteries is unacceptable.

14. An advertiser who markets more than one product should not be permitted to use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.

15. "Bait-switch" advertising, whereby goods or services which the advertiser has no intention of selling are offered merely to lure the customer into purchasing higher-priced substitutes, is not acceptable.

16. Personal endorsements (testimonials) shall be genuine and reflect personal experience. They shall contain no statement that cannot be supported if presented in the advertiser's own words.

X. Presentation of Advertising

1. Advertising messages should be presented with courtesy and good taste; disturbing or annoying material should be avoided; every effort should be made to keep the advertising message in harmony with the content and general tone of the program in which it appears.

2. The role and capability of television to market sponsors' products are well recognized. In turn, this fact dictates that great care be exercised by the broadcaster to prevent the presentation of false, misleading or deceptive advertising. While it is entirely appropriate to present a product in a favorable light and atmosphere, the presentation must not, by copy or demonstration, involve a material deception as to the characteristics, performance or appearance of the product.

3. The broadcaster and the advertiser should exercise special caution with the content and presentation of television commercials placed in or near programs designed for children. Exploitation of children should be avoided.

Commercials directed to children should in no way mislead as to the product's

performance and usefulness.

Appeals involving matters of health which should be determined by physicians should not be directed primarily to children.

4. Appeals to help fictitious characters in television programs by purchasing the advertiser's product or service or sending for a premium should not be permitted, and such fictitious characters should not be introduced into the advertising message for such purposes.

5. Commercials for services or over-the-counter products involving health considerations are of intimate and far-reaching importance to the consumer. The following principles should apply to such advertising:

a. Physicians, dentists, or nurses, or actors representing physicians, dentists or nurses, shall not be employed directly or by implication. These restrictions also apply to persons professionally engaged in medical services (e.g. physical therapists, pharmacists, dental assistants, nurses aides).

b. Visual representations of laboratory settings may be employed, provided they bear a direct relationship to bona fide research which has been conducted for the product or service. (See Code X. 10.) In such cases, laboratory technicians shall be identified as such and shall not be employed as spokesmen or in any other way speak on behalf of the product.

c. Institutional announcements not intended to sell a specific product or service to the consumer and public service announcements by nonprofit organizations may be presented by accredited physicians, dentists or nurses, subject to approval by the broadcaster. An accredited professional is one who has met required qualifications and has been licensed in his resident state.

6. Advertising should offer a product or service on its positive merits and refrain by identification or other means from discrediting, disparaging or unfairly attacking competitors, competing products, other industries, professions or institutions.

7. A sponsor's advertising messages should be confined within the framework of the sponsor's program structure. A television broadcaster should avoid the use of commercial announcements, which are divorced from the program either by preceding the introduction of the program (as in the case of so-called "cow-catcher" announcements) or by following the apparent sign-off of the program (as in the case of so-called trailer or "hitch-hike" announcements). To this end, the program itself should be announced and clearly identified both audio and video, before the sponsor's advertising material is first used, and should be signed off, both audio and video, after the sponsor's advertising material is last used.

8. Since advertising by television is a dynamic technique, a television broadcaster should keep under surveillance new advertising devices so that the spirit and purpose of these standards are fulfilled.

9. A charge for television time to churches and religious bodies is not recommended.

10. Reference to the results of bona fide research, surveys or tests relating to the product to be advertised shall not be presented in a manner so as to create an impression of fact beyond that established by the work that has been conducted.

XI. Advertising of Medical Products

1. The advertising of medical products presents considerations of intimate and far-reaching importance to the consumer because of the direct bearing on his health.

2. Because of the personal nature of the advertising of medical products, claims that a product will effect a cure and the indiscriminate use of such words as "safe," "without risk," "harmless," or terms of similar meaning should not be accepted in the advertising of medical products on television stations.

3. A television broadcaster should not accept advertising material which in his opinion offensively describes or dramatizes distress or morbid situations involving ailments, by spoken word, sound or visual effects.

XII. Contests

1. Contests shall be conducted with fairness to all entrants, and shall comply with all pertinent laws and regulations. Care should be taken to avoid the concurrent use of the three elements which together constitute a lottery—prize, chance and consideration.

2. All contest details, including rules, eligibility requirements, opening and termination dates should be clearly and completely announced and/or shown, or easily accessible to the viewing public, and the winners' names should be released and prizes awarded as soon as possible after the close of the contest.

3. When advertising is accepted which requests contestants to submit items of product identification or other evidence of purchase of products, reasonable facsimiles thereof should be made acceptable unless the award is based upon skill and not upon chance.

4. All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale or the sponsor's product or service, and all references to prizes or gifts offered in such connection should be considered a part of and included in the total time allowances as herein provided. (See Television Code, XIV.)

XIII. Premiums and Offers

1. Full details of proposed offers should be required by the television broadcaster for investigation and approval before the first announcement of the offer is made to the public.

2. A final date for the termination of an offer should be announced as far in advance as possible.

3. Before accepting for telecast offers involving a monetary consideration, a television broadcaster should satisfy himself as to the integrity of the advertiser and the advertiser's willingness to honor complaints indicating dissatisfaction with the premium by returning the monetary consideration.

4. There should be no misleading descriptions or visual representations of any premiums or gifts which would distort or enlarge their value in the minds of viewers.

5. Assurances should be obtained from the advertiser that premiums offered are not harmful to person or property.

6. Premiums should not be approved which appeal to superstition on the basis of "luck-bearing" powers or otherwise.

XIV. Time Standards for Non-Program Material

In order that the time for non-program material and its placement shall best serve the viewer, the following standards are set forth in accordance with sound television practice:

1. Non-Program Material

Definition: Non-program material, in both prime time and all other time, includes billboards, commercials, all credits in excess of 30 seconds and promotional announcements. Public service announcements and promotional announcements for the same program are excluded from this definition.

2. Allowable Time for Non-Program Material

(a) In prime time, non-program material shall not exceed 10 minutes in any 60-minute period.

Prime time is a continuous period of not less than three consecutive evening hours per broadcast day as designated by the station between the hours of 6 p.m. and midnight.

(b) In all other time, non-program material shall not exceed 16 minutes in any 60-minute period.

3. Program Interruptions.

(a) Definition: A program interruption is any occurrence of non-program material within any 30-minute program or within any 60-minute program.

(b) In prime time, the number of program interruptions shall not exceed two within any 30-minute program, or four within any 60-minute program.

Programs longer than 60 minutes shall be pro-rated at two interruptions per half-hour. The number of interruptions in 60-minute variety shows shall not exceed five.

(c) In all other time, the number of interruptions shall not exceed four within any 30-minute program period.

(d) In both prime time and all other time, the following interruption standard shall apply within programs of 15 minutes or less in length:

- 5-minute program—1 interruption;
- 10-minute program—2 interruptions;
- 15-minute program—2 interruptions;

(e) News, weather, sports and special events programs are exempt from the interruption standard because of the nature of such programs.

4. No more than four commercial announcements shall be scheduled consecutively within programs, and no more than three commercial announcements shall be scheduled consecutively during station breaks. The consecutive commercial message limitation shall not apply to a single sponsor who wishes to further reduce the number of

NAB TV, Radio Code

Interruptions in the program.

5. A multiple product announcement is one in which two or more products or services are presented within the framework of a single announcement.

A multiple product announcement shall be counted as a single announcement provided the products or services are so treated in audio and video throughout the announcement as to appear to the viewer as a single unit. Multiple product announcements not meeting this definition shall be counted as two or more announcements under this section of the code. This provision shall not apply to retail or service establishments.

6. The use of billboards, in prime time and all other time shall be confined to programs sponsored by a single or alternate week advertiser and shall be limited to the products advertised in the program.

7. Reasonable and limited identification of prizes and donors' names where the presentation of contest awards or prizes is a necessary part of program content shall not be included as non-program material as defined above.

8. Programs presenting women's service features, shopping guides, fashion shows, demonstrations and similar material provide a special service to the public in which certain material normally classified as non-program is an informative and necessary part of the program content. Because of this, the time standards may be waived by the code authority to a reasonable extent on a case-by-case basis.

9. Gratuitous references in a program to a non-sponsor's product or service should be avoided except for normal guest identification.

10. Stationary backdrops or properties in television presentations showing the sponsor's name or product, the name of his product, his trade-mark or slogan should be used only incidentally and should not obstruct program interest or entertainment.

Interpretation of the Television Code

No. 1, June 7, 1956, revised June 9, 1958

"Pitch" Programs

The "pitchman" technique of advertising on television is inconsistent with good broadcast practice and generally damages the reputation of the industry and the advertising profession.

Sponsored program-length segments, consisting substantially of continuous demonstration or sales presentation, violate not only the time standards established in the Code, but the broad philosophy of improvement implicit in the voluntary Code operation and are not acceptable.

No. 2 June 7, 1956

Hollywood Film Promotion

The presentation of commentary or film excerpts from current theatrical releases in some instances may constitute commercial material under the "Time Standards for Advertising." Specifically, for example, when such presentation, directly or by inference, urges viewers to attend, it shall be counted against the commercial allowance for the program of which it is a part.

No. 3, Jan. 23, 1959

Prize Identification

Aural and/or visual prizes identification of up to 10 seconds duration may be deemed "reasonable and limited" under the language of Paragraph 7 of the "Time Standards of Advertising." Where such identification is longer than 10 seconds, the entire announcement or visual presentation will be charged against the total commercial time for the program period.

No. 4, March 4, 1965

Drinking on Camera

Paragraph 7, Section IX, "General Advertising Standards," states that the "advertising of beer and wine is acceptable only when presented in the best of good taste and discretion." This requires that commercials involving beer and wine avoid any representation of on-camera drinking.

NAB Radio Code of Good Practices

Preamble

The radio broadcasters of the United States first adopted industry-wide standards of practice in 1937. The purpose of such

standards, in this as in other professions, is to establish guideposts and to set forth minimum tenets for performance.

Standards for broadcasting can never be final or complete. Broadcasting is a creative art and it must always seek new ways to achieve greater advances. Therefore, any standards must be subject to change. In 1945, after two years devoted to reviewing and revising the 1937 document, new standards were promulgated. Further revisions were made in 1948, 1954, 1955, 1958, 1960, 1961, 1962, 1964, 1965, 1966 and 1967, and now there follows a new and revised Fourteenth Edition of The Radio Code of the National Association of Broadcasters.

Through this process of self-examination broadcasters acknowledge their obligation to the American family.

The growth of broadcasting as a medium of entertainment, education and information has been made possible by its force as an instrument of commerce.

This philosophy of commercial broadcasting as it is known in the United States has enabled the industry to develop as a free medium in the tradition of American enterprise.

The extent of this freedom is implicit in the fact that no one censors broadcasting in the United States.

Those who own the nation's radio broadcasting stations operate them—pursuant to this self-adopted Radio Code—in recognition of the interest of the American People.

The Radio Broadcasters' Creed We Believe:

That radio broadcasting in the United States of America is a living symbol of democracy; a significant and necessary instrument for maintaining freedom of expression, as established by the First Amendment to the Constitution of the United States;

That its influence in the arts, in science, in education, in commerce, and upon the public welfare is of such magnitude that the only proper measure of its responsibility is the common good of the whole people;

That it is our obligation to serve the people in such manner as to reflect credit upon our profession and to encourage aspiration toward a better estate for all mankind; by making available to every person in America such programs as will perpetuate the traditional leadership of the United States in all phases of the broadcasting art;

That we should make full and ingenious use of man's store of knowledge, his talents, and his skills and exercise critical and discerning judgment concerning all broadcasting operations to the end that we may, intelligently and sympathetically:

Observe the proprieties and customs of civilized society;

Respect the rights and sensitivities of all people;

Honor the sanctity of marriage and the home;

Protect and uphold the dignity and brotherhood of all mankind;

Enrich the daily life of the people through the factual reporting and analysis of news, and through programs of education, entertainment, and information;

Provide for the fair discussion of matters of general public concern; engage in works directed toward the common good; and volunteer our aid and comfort in times of stress and emergency;

Contribute to the economic welfare of all by expanding the channels of trade, by encouraging the development and conservation of natural resources, and by bringing together the buyer and seller through the broadcasting of information pertaining to goods and services.

Toward the achievement of these purposes we agree to observe the following:

I. PROGRAM STANDARDS

A. News

Radio is unique in its capacity to reach the largest number of people first with reports on current events. This competitive advantage bespeaks caution—being first is not as important as being right. The following standards are predicated upon that viewpoint.

1. News Sources. Those responsible for news on radio should exercise constant professional care in the selection of sources—for the integrity of the news and the consequent good reputation of radio as a dominant news medium depend largely upon the reliability of such sources.

2. News Reporting. News reporting shall be factual and objective. Good taste shall prevail in the selection and handling of news. Morbid, sensational, or alarming details not essential to factual reporting should be avoided. News should be broadcast in such a manner as to avoid creation of panic and unnecessary alarm. Broadcast-

ers shall be diligent in their supervision of content, format, and presentation of news broadcasts. Equal diligence should be exercised in selection of editors and reporters who direct news gathering and dissemination since the nation's performance in this vital informational field depends largely upon them.

3. Commentaries and Analyses. Special obligations devolve upon those who analyze and/or comment upon news developments, and management should be satisfied completely that the task is to be performed in the best interest of the listening public. Programs of news analysis and commentary shall be clearly identified as such, distinguishing them from straight news reporting.

4. Editorializing. Broadcasts in which stations express their own opinions about issues of general public interest should be clearly identified as editorials and should be clearly distinguished from news and other program material.

5. Coverage of News and Public Events. In the coverage of news and public events the broadcaster has the right to exercise his judgment consonant with the accepted standards of ethical journalism and especially the requirements for decency and decorum in the broadcast of public and court proceedings.

6. Placement of Advertising. A broadcaster should exercise particular discrimination in the acceptance, placement and presentation of advertising in news programs so that such advertising should be clearly distinguishable from the news content.

B. Controversial Public Issues

1. Radio provides a valuable forum for the expression of responsible views on public issues of a controversial nature. The broadcaster should develop programs relating to controversial public issues of importance to his fellow citizens; and give fair representation to opposing sides of issues which materially affect the life or welfare of a substantial segment of the public.

2. Requests by individuals, groups or organizations for time to discuss their views on controversial public issues should be considered on the basis of their individual merits, and in the light of the contributions which the use requested would make to the public interest.

3. Programs devoted to the discussion of controversial public issues should be identified as such. They should not be presented in a manner which would create the impression that the program is other than one dealing with a public issue.

C. Community Responsibility

1. A broadcaster and his staff occupy a position of responsibility in the community and should conscientiously endeavor to be acquainted with its needs and characteristics in order to serve the welfare of its citizens.

2. Requests for time for the placement of public service announcements or programs should be carefully reviewed with respect to the character and reputation of the group, campaign or organization involved, the public interest content of the message, and the manner of its presentation.

D. Political Broadcasts

1. Political broadcasts, or the dramatization of political issues designed to influence an election, shall be properly identified as such.

2. They should be presented in a manner which would properly identify the nature and character of the broadcast.

3. Because of the unique character of political broadcasts and the necessity to retain broad freedoms of policy void of restrictive interference, it is incumbent upon all political candidates and all political parties to observe the canons of good taste and political ethics, keeping in mind the intimacy of broadcasting in the American home.

E. Advancement of Education and Culture

1. Because radio is an integral part of American life, there is inherent in radio broadcasting a continuing opportunity to enrich the experience of living through the advancement of education and culture.

2. The radio broadcaster, in augmenting the educational and cultural influences of the home, the church, schools, institutions of higher learning, and other entities devoted to education and culture:

(a) Should be thoroughly conversant with the educational and cultural needs and aspirations of the community served;

(b) Should cooperate with the responsible and accountable educational and cultural entities of the community to provide enlightenment of listeners;

(c) Should engage in experimental efforts

designed to advance the community's cultural and educational interests.

F. Religion and Religious Programs

1. Religious programs shall be presented by responsible individuals, groups or organizations.
2. Radio broadcasting, which reaches men of all creeds simultaneously, shall avoid attacks upon religious faiths.
3. Religious programs shall be presented respectfully and without prejudice or ridicule.
4. Religious programs shall place emphasis on religious doctrines of faith and worship.

G. Dramatic Programs

1. In determining the acceptability of any dramatic program containing any element of crime, mystery, or horror, proper consideration should be given to the possible effect on all members of the family.
2. Radio should reflect realistically the experience of living, in both its pleasant and tragic aspects, if it is to serve the listener honestly. Nevertheless, it holds a concurrent obligation to provide programs which will encourage better adjustments to life.
3. This obligation is apparent in the area of dramatic programs particularly. Without sacrificing integrity of presentation, dramatic programs on radio shall avoid:
 - (a) Techniques and methods of crime presented in such manner as to encourage imitation, or to make the commission of crime attractive, or to suggest that criminals can escape punishment;
 - (b) Detailed presentation of brutal killings, torture, or physical agony, horror, the use of supernatural or climactic incidents likely to terrify or excite unduly;
 - (c) Sound effects calculated to mislead, shock, or unduly alarm the listener;
 - (d) Disrespectful portrayal of law enforcement;
 - (e) The portrayal of suicide as a satisfactory solution to any problem.

H. Responsibility Toward Children

The education of children involves giving them a sense of the world at large. It is not enough that programs broadcast for children shall be suitable for the young and immature. In addition, programs which might reasonably be expected to hold the attention of children and which are broadcast during times when children may be normally expected to constitute a substantial part of the audience should be presented with due regard for their effect on children.

1. Programs specifically designed for listening by children shall be based upon sound social concepts and shall reflect respect for parents, law and order, clean living, high morals, fair play, and honorable behavior.
2. They shall convey the commonly accepted moral, social and ethical ideals characteristic of American life.
3. They should contribute to the healthy development of personality and character.
4. They should afford opportunities for cultural growth as well as for wholesome entertainment.
5. They should be consistent with integrity of realistic production, but they should avoid material of extreme nature which might create undesirable emotional reaction in children.
6. They shall avoid appeals urging children to purchase the product specifically for the purpose of keeping the program on the air or which, for any reason, encourage children to enter inappropriate places.
7. They should present such subjects as violence and sex without undue emphasis and only as required by plot development or character delineation. Crime should not be presented as attractive or as a solution to human problems, and the inevitable retribution should be made clear.
8. They should avoid reference to kidnapping or threats of kidnapping of children.

I. General

1. The intimacy and confidence placed in radio demand of the broadcaster, the networks and other program sources that they be vigilant in protecting the audience from deceptive program practices.
2. Sound effects and expressions characteristically associated with news broadcasts (such as "bulletin," "flash," "we interrupt this program to bring you," etc.) shall be reserved for announcement of news, and the use of any deceptive techniques in connection with fictional events and nonnews programs shall not be employed.
3. The acceptance of cash payments or other considerations for including identification of commercial products or services,

trade names or advertising slogans including the identification of prizes, etc. must be disclosed in accordance with provisions of the Communications Act.

4. When plot development requires the use of material which depends upon physical or mental handicaps, care should be taken to spare the sensibilities of sufferers from similar defects.
5. Stations should avoid broadcasting program material which would tend to encourage illegal gambling or other violations of federal, state and local laws, ordinances and regulations.
6. Simulation of court atmosphere or use of the term "court" in a program title should be done only in such manner as to eliminate the possibility of creating the false impression that the proceedings broadcast are vested with judicial or official authority.
7. Quiz and similar programs that are presented as contests of knowledge, information, skill or luck must in fact be genuine contests, and the results must not be controlled by collusion with or between contestants, or any other action which will favor one contestant against any other.
8. No program shall be presented in a manner which through artifice or simulation would mislead the audience as to any material fact. Each broadcaster must exercise reasonable judgment to determine whether a particular method of presentation would constitute a material deception, or would be accepted by the audience as normal theatrical illusion.
9. Legal, medical and other professional advice will be permitted only in conformity with law and recognized ethical and professional standards.
10. Narcotic addiction shall not be presented except as a vicious habit. The misuse of hallucinogenic drugs shall not be presented or encouraged as desirable or socially acceptable.
11. Program material pertaining to fortune-telling, occultism, astrology, phrenology, palm-reading, numerology, mind-reading, character-reading, or subjects of a like nature, is unacceptable when presented for the purpose of fostering belief in these subjects.
12. The use of cigarettes shall not be presented in a manner to impress the youth of our country that it is a desirable habit worthy of imitation in that it contributes to health, individual achievement or social acceptance.
13. Profanity, obscenity, smut and vulgarity are forbidden. From time to time, words which have been acceptable acquire undesirable meanings, and broadcasters should be alert to eliminate such words.
14. Words (especially slang) derivative of any race, color, creed, nationality or national derivation, except wherein such usage would be for the specific purpose of effective dramatization such as combating prejudice, are forbidden.
15. Respect is maintained for the sanctity of marriage and the value of the home. Divorce is not treated casually as a solution for marital problems.
16. Broadcasts of actual sporting events at which on-the-scene betting is permitted should concentrate on the subject as a public sporting event and not on the aspects of gambling.

II. ADVERTISING STANDARDS

Advertising is the principal source of revenue of the free, competitive American system of radio broadcasting. It makes possible the presentation to all American people of the finest programs of entertainment, education and information.

Since the great strength of American radio broadcasting derives from the public respect for and the public approval of its programs, it must be the purpose of each broadcaster to establish and maintain high standards of performance, not only in the selection and production of all programs, but also in the presentation of advertising.

This code establishes basic standards for all radio broadcasting. The principles of acceptability and good taste within the program standards section govern the presentation of advertising where applicable. In addition, the code establishes in this section special standards which apply to radio advertising.

A. General Advertising Standards

1. A commercial radio broadcaster makes his facilities available for the advertising of products and services and accepts commercial presentations for such advertising. However, he shall, in recognition of his responsibility to the public, refuse the facilities of his station to an advertiser where he has good reason to doubt the integrity of the advertiser, the truth of the advertising

NAB Radio Code

representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements.

2. In consideration of the customs and attitudes of the communities served, each radio broadcaster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community. These standards should be applied with judgment and flexibility, taking into consideration the characteristics of the medium, its home and family audience, and the form and content of the particular presentation.

B. Presentation of Advertising

1. The advancing techniques of the broadcast art have shown that the quality and proper integration of advertising copy are just as important as measurement in time. The measure of a station's service to its audience is determined by its overall performance.
2. The final measurement of any commercial broadcast service is quality. To this, every broadcaster shall dedicate his best effort.

3. Great care shall be exercised by the broadcaster to prevent the presentation of false, misleading or deceptive advertising. While it is entirely appropriate to present a product in a favorable light and atmosphere, the presentation must not, by copy or demonstration, involve a material deception as to the characteristics or performance of a product.

4. The broadcaster and the advertiser should exercise special caution with the content and presentation of commercials placed in or near programs designed for children. Exploitation of children should be avoided. Commercials directed to children should in no way mislead as to the product's performance and usefulness.

Appeals involving matters of health which should be determined by physicians should be avoided.

5. Reference to the results of research, surveys or tests relating to the product to be advertised shall not be presented in a manner so as to create an impression of fact beyond that established by the study. Surveys, tests or other research results upon which claims are based must be conducted under recognized research techniques and standards.

C. Acceptability of Advertisers and Products

In general, because radio broadcasting is designed for the home and the entire family, the following principles shall govern the business classifications listed below:

1. The advertising of hard liquor shall not be accepted.
2. The advertising of beer and wines is acceptable when presented in the best of good taste and discretion.
3. The advertising of fortune-telling, occultism, astrology, phrenology, palm-reading, character-reading, or subjects of a like nature, is not acceptable.

4. Because the advertising of all products of a personal nature raises special problems, such advertising, when accepted, should be treated with emphasis on ethics and the canons of good taste, and presented in a restrained and inoffensive manner.

5. The advertising of tip sheets, publications, or organizations seeking to advertise for the purpose of giving odds or promoting betting or lotteries is unacceptable.

6. The level of cigarette advertising on radio will be reduced in progressive steps so that effective September 1, 1973, all cigarette advertising will cease on subscriber stations and networks. The base year of July 1, 1968-July 1, 1969 will be the measuring point for cigarette commercials. Each subscriber station and network will compute the total minutes of commercial time devoted to cigarette advertising during the base year.

Beginning January 1, 1970, each station and network will limit the total number of minutes available for sale to cigarette advertisers to the percentages of the base year minutes listed below:

Period Commencing	Percentage
January 1, 1970	80%
September 1, 1970	75%
September 1, 1971	50%
September 1, 1972	25%
September 1, 1973	0

Each subscriber station and network will be required to file with the NAB Code

Code, Talent Agents

Authority the total minutes of commercial time in its base year and to file periodic reports of cigarette commercials carried in the succeeding years.

The advertising of cigarettes shall not state or imply claims regarding health and shall not be presented in such a manner as to indicate to the youth of our country that the use of cigarettes contributes to individual achievement, personal acceptance or is a habit worthy of imitation.

7. An advertiser who markets more than one product shall not be permitted to use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.

8. Care should be taken to avoid presentation of "bait-switch" advertising whereby goods or services which the advertiser has no intention of selling are offered merely to lure the customer into purchasing higher-priced substitutes.

9. Advertising should offer a product or service on its positive merits and refrain from discrediting, disparaging or unfairly attacking competitors, competing products, other industries, professions or institutions. Any identification or comparison of a competitive product or service, by name, or other means, should be confined to specific facts rather than generalized statements or conclusions, unless such statements or conclusions are not derogatory in nature.

10. Advertising testimonials should be genuine and reflect an honest appraisal of personal experience.

11. Advertising by institutions or enterprises offering instruction with exaggerated claims for opportunities awaiting those who enroll, is unacceptable.

12. The advertising of firearms/ammunition is acceptable provided it promotes the product only as sporting equipment and conforms to recognized standards of safety as well as all applicable laws and regulations.

Advertisements of firearms/ammunition by mail order are unacceptable.

D. Advertising of Medical Products

Because advertising for over-the-counter products involving health considerations are of intimate and far-reaching importance to the consumer, the following principles should apply to such advertising:

1. When dramatized advertising material involves statements by doctors, dentists, nurses or other professional people, the material should be presented by members of such profession reciting actual experience, or it should be made apparent from the presentation itself that the portrayal is dramatized.

2. Because of the personal nature of the advertising of medical products, the in- discriminate use of such words as "safe," "without risk," "harmless," or other terms of similar meaning, either direct or implied, should not be expressed in the advertising of medical products.

3. Advertising material which offensively describes or dramatizes distress or morbid situations involving ailments is not acceptable.

E. Time Standards for Advertising Copy

1. The amount of time to be used for advertising should not exceed 18 minutes within any clock hour. The code authority, however, for good cause may approve advertising exceeding the above time standard for special circumstances.

2. The maximum time to be used for advertising allowable to any single sponsor beyond mention of sponsor's name and address at the opening and close of the program shall be:

5 minute program	1:30
10 " "	2:30
15 " "	3:00

3. Any reference to another's products or services under any trade name, or language sufficiently descriptive to identify it, shall, except for normal guest identifications, be considered as advertising copy.

4. For the purpose of determining advertising limitations, such program types as "classified," "swap shop," "shopping guides," and "farm auction" programs, etc., shall be regarded as containing one and one-half minutes of advertising for each five-minute segment.

F. Contests

1. Contests shall be conducted with

fairness to all entrants, and shall comply with all pertinent laws and regulations.

2. All contest details, including rules, eligibility requirements, opening and termination dates, should be clearly and completely announced or easily accessible to the listening public; and the winners' names should be released as soon as possible after the close of the contest.

3. When advertising is accepted which requests contestants to submit items of product identification or other evidence of purchase of products, reasonable facsimiles thereof should be made acceptable. However, when the award is based upon skill and not upon chance, evidence of purchase may be required.

4. All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale of the sponsor's product or service, and all references to prizes or gifts offered in such connection should be considered a part of and included in the total time limitations heretofore provided. (See Time Standards for Advertising Copy.)

G. Premiums and Offers

1. The broadcaster should require that full details of proposed offers be submitted for investigation and approved before the first announcement of the offer is made to the public.

2. A final date for the termination of an offer should be announced as far in advance as possible.

3. If a consideration is required, the advertiser should agree to honor complaints indicating dissatisfaction with the premium by returning the consideration.

4. There should be no misleading descriptions or comparisons of any premiums or gifts which will distort or enlarge their value in the minds of the listeners.

ASCAP can supply you with over 3 million songs.

Those not given to excesses and impatience, will find, however, that a discerning selection suited to their program policy, from among the works of ASCAP's 14,000 members, provides the most judicious solution. (Since you can't play a judicious solution, it will also, of course, provide the music you selected.)

And what a repertoire to select from! From Bach to Country. Or even a combination of both, such as, "Bach Home Again In Indiana". From Western to Jazz. From Pop to Musical Theatre. From Symphonies to Solos. From "Peter and the Wolf" to "Peter and the Paul and Mary. From ASCAP to you. From this moment on — you and I babe.....

(How you play them all in one program is another matter.)

Seventh-Day Adventists (See General Conference of.)

Name another business magazine that's quoted oftener than we are.

Come up and look at our scrapbooks some time. Or better yet, come up and help us paste clippings. We fall behind. It's hard to keep up when they're coming from points as far-flung as the "Chicago Tribune" and "Los Angeles Times," "The New York Times" and "The Birmingham News," "The Wichita Sunday Eagle and Beacon" and the "Battle Creek Enquirer and News"—to drop a few names from a page picked at random in our current scrapbook.

We regard these clippings as endorsements of our editorial quality. And so may you, if you're an advertiser looking for an environment that will add importance to your message.

Take our word for it. Just as journalists everywhere take our word for what is going on in your business.

*we've
 come
 a long
 way...
 baby!*

A year ago we were just an idea. A few months ago the International Film and Television Festival of New York awarded us this silver medal for excellence in commercial television production. Between then and now we've built and equipped Miami's only independent video tape production center—complete with dubbing and editing lab, studio and mobile facilities. We've won awards with our commercials, produced full length dramas and originated everything from roller derby to Apollo 12.

When you think production, think Miami. When you think Miami, think MRP*. Call or write for complete information.

Broadcasting

is the marketplace

Whether you concentrate in the printed media or in sky-writing, it's good business to understand broadcasting—its impact, its costs, its inherent value to you, your client. BROADCASTING is the one book that keeps you on the inside of broadcasting. It tells you when, why, where it happens—as it happens. This coverage—accurate, intensive, thorough—gives you the facts you need for your workaday, money-making use.

From a recording studio or a rehearsal or concert hall—from the musical theater—from television and radio—the sound of music written and performed by talented people can be heard everywhere today. *℘* BMI in a little over a quarter of a century has developed an organization through which more than 18,000 writers and 8,000 publishers have chosen to license their music for public performance. And their number is in-

creased every day. *℘* Through BMI new talents have found an audience. New music has been able to gain a hearing. New vitality has been brought to traditional forms of music. The result has been an enrichment of the store of music to which music users and the public have access

ABC Radio Network Rates

The rates shown below are for fixed-position minutes. The first figure in each case is for one minute scheduled from one to 12 consecutive weeks; the second is for one minute scheduled for 52 or more consecutive weeks (between these extremes are graduated prices, again based on length of contract). Prices for 30-second units and combinations of 60's and 30's are somewhat less than those shown for 60's. Rates are based on 100% coverage of total U.S. retail sales and are adjusted to coverage of less than 100%. Rates for a number of features are set separately and are available from ABC on request.

American Contemporary Radio Network: \$2,500; \$2,250.

American Information Radio Network: \$1,500; \$1,350.

American Entertainment Radio Network: \$1,250; \$1,125.

American FM Radio Network: \$650; \$585.

The thousands of Main Streets located beyond the major metropolitan areas account for nearly one-third of the nation's annual retail sales of \$340 billion.

Small market radio stations are the dominant media in this important market.

Keystone Broadcasting System, with over 1,100 affiliated Non-Metro, small market radio stations has specialized in serving this market for nearly 30 years.

The current KBS Station List contains

more data on small market radio than is provided by any wired network or representative firm, including individual Pulse '68 Circulation data for each of the 1,100 plus affiliates. Print-outs on network demographics are available by state, region, or the entire list of affiliates.

The Pulse report shows that Keystone affiliates serve 2,101, or 77% of the Non-Metro counties accounting for 19 million homes with a potential of 49,780,500 listeners weekly.

Are you getting your share of this \$88 billion market?

Voice of America Fact Sheet

The Voice of America, a part of the U. S. Information Agency, has the following directive: "The long-range interests of the United States are served by communicating directly with the peoples of the world by radio. To be effective, the Voice of America must win the attention and respect of listeners. These principles will govern VOA broadcasts:

"1 VOA will establish itself as a consistently reliable and authoritative source of news. VOA news will be accurate, objective and comprehensive.

"2 VOA will represent America, not any single segment of American society. It will therefore present a balanced and comprehensive projection of significant American thought and institutions.

"3 As an official radio, VOA will present the policies of the United States clearly and effectively. VOA will also present responsible discussion and opinion on these policies."

Implementation of this directive has resulted in approximately half of the word output being devoted to news and news related items such as news analyses, commentaries, press reviews. The other half consists of round-table discussions, documentary programs, features and special events covering American political, economic, social and cultural topics so as to provide overseas audiences a balanced and accurate concept of the United States and clear information regarding United States policies. The VOA also broadcasts music programs.

Facilities

The Voice has a network of 109 transmitters, of which 41 are in the continental United States. These are short wave and medium wave stations ranging in power from 35 kw to 1,000 kw, owned and operated by the USA. The largest transmitter complex is at Greenville, North Carolina. There 18 transmitters feed programs received via microwave from the Washington studios to audiences and relay bases abroad over 73 directional antennas. Total power at Greenville is 4,800 kw. Other domestic facilities are at Bethany, Ohio; Marathon, Fla. (MW); Delano and Dixon, both Calif.

Overseas relay stations are at: Munich, Germany; Thessaloniki and Rhodes, Greece; Tangier, Morocco; Monrovia, Liberia; Okinawa; Tinang and Poro, the Philippines; Wofferton, England; Colombo, Ceylon; Bangkok, Thailand; Hue, Vietnam. These include short and medium wave transmitters among which are three one-megawatt transmitters.

In addition to its network of fixed transmitters, the Voice has seven transportable transmitters. These are all 50 kw, six shortwave and one medium wave. They are designed to be moved quickly, to wherever they are needed by land sea or air. The medium wave transportable transmitter is on Marathon Key, Florida, broadcasting Spanish language programs to Cuba. The six shortwave transportables are in the Philippines, where they augment existing facilities in relaying Voice programs to Southeast Asia and the Far East. An additional station is under construction in Northern Greece. When it is completed in FY 1972, the short and medium wave facilities of VOA will total 23,000 kw.

Voice of America

Local Placement

Many VOA transcribed programs, music recordings and script material are furnished by U.S. Information Agency offices throughout the free world for local distribution and broadcast. Other relays and rebroadcasts are made through arrangements with local broadcasters in West Europe, Africa, the Near East, South Asia, the Far East and Latin America. Currently some 4,000 stations overseas are rebroadcasting more than 15,000 hours of USIA programming weekly.

RIAS

In West Berlin the USIA operates RIAS (Radio in the American Sector), which broadcasts an average of 240 hours per week in German over medium and short wave facilities as well as FM. Its purpose is to reach the population of East Berlin and East Germany.

Audiences

The USIA estimates its current world radio audience is in the range of from 17 to 26 million on an average day, and about double that amount for an average week. During times of international crisis, or for such special events as an American space launch, the audience increases considerably.
