### Name another business magazine that's quoted oftener than we are.

Come up and look at our scrapbooks some time. Or better yet, come up and help us paste clippings. We fall behind. It's hard to keep up when they're coming from points as far-flung as the "Chicago Tribune" and "Los Angeles Times," "The New York Times" and "The Birmingham News," "The Wichita Sunday Eagle and Beacon" and the "Battle Creek Enquirer and News"—to drop a few names from a page picked at random in our current scrapbook.

We regard these clippings as endorsements of our editorial quality. And so may you, if you're an advertiser looking for an environment that will add importance to your message.

Take our word for it. Just as journalists everywhere take our word for what is going on in your business.

# Color Calisthenics?

Up Down, Up Down . . . despite all the advances in color receivers and broadcasting techniques, the only way the viewer can cope with color variations from one program segment to the next is to keep adjusting the hue control on his set. Even an athlete can't keep up with it! Now, the CBS Laboratories' Color Corrector changes all that. For the first time the broadcaster can correct encoded signals at a single viewing point to achieve consistent color values from a variety of signal sources. Program material from cameras, tapes and film with wide ranging color values can be matched to each other to reduce the viewer's subjective shock from one program segment to the next. The Color Corrector can be installed with cameras or VTR's or film chains or in the program line.

Let your audience relax.
