The run-of-the-mill TV viewer never realizes how much work we put into producing our news.

He has no idea that we have more people putting together our news than any Houston station.

Or that our air personalities are writers and reporters as well as personalities.

He probably isn't aware that the KPRC-TV news staff has won more awards than all other Houston stations combined.

Or that we just won the National Press Photographers first place award for the best news film of 1971.

He may not know we have one of the newest and most advanced broadcasting facilities in America.

But if he watches Channel 2 News he knows these things because our viewers aren't run-of-the-mill.

There's more to our news than meets the eye.

TV Allocations, State, City

Note: UHF and VHF TV allocations have been made by the FCC to the following cities. A plus or minus after a channel indicates that a station occupying the channel must operate with its carrier frequencies offset 10 kilocycles above or below, respectively, the normal carrier frequencies. The offset indicators are not shown for UHF assignments, which were the subject of a rule-making adopted June 4, 1965. The designators were to be added in a later order, but had not been published by time the Yearbook went to press. Meanwhile, the appropriate designators are shown on construction permits and licenses issued for UHF stations.

Asterisks (*) indicate channels reserved for noncommercial use. Footnotes: 1) Following the decision in Doc 18261 (amendment of rules regarding geographic reallocation of channels 14-20 to land mobile radio in the 25 largest urbanized areas of the U.S.) channels so indicated will not be available for use until further action by the FCC. 2) This channel is not available for Elgin, Ill., unless FCC determines it is not needed at Joliet, Ill. 3) This channel is not available for Asbury Park, N.J., unless FCC determines it is not needed at New Brunswick, N.J. 4) Channel 15 will not be available for television use until further action by the FCC. 5) Stations using these assignments shall limit radiation toward stations on the same channel in Puerto Rico.
