# The TV Marketplace

## The ADI Market Atlas

The Area of Dominant Influence is a geographic market design that defines each television market exclusive of the others, based on measurable viewing patterns. Each market's ADI consists of all counties in which the home market stations receive a preponderance of viewing, and every county in the U.S. (excluding Hawaii and part of Alaska) is allocated exclusively to only one ADI—there is no overlap. The estimated television households are therefore additive, and the total of all ADI's represents the total television households in the U.S.

The ADI is a standard market definition. As a television buying tool it is a geographic and demographic means for maximum efficiency. As a station tool it has numerous applications for more effective sales efforts, and for programing and promotion planning.

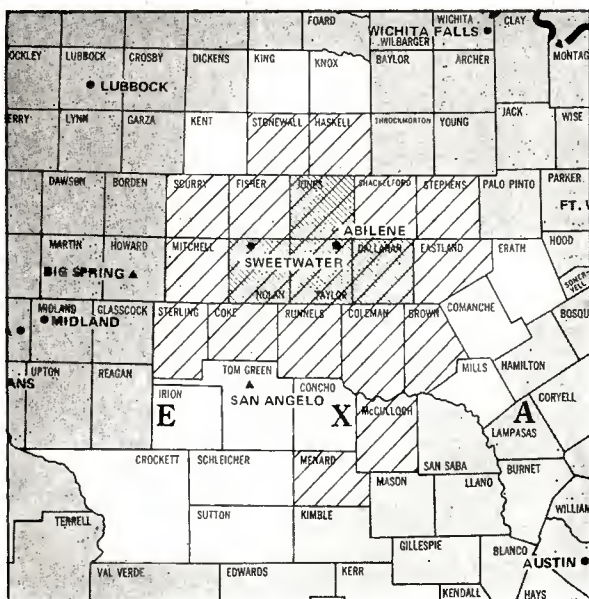

Following, in alphabetical order, are Arbitron Television's 208 ADI markets for 1975, with coverage maps for each; county-by-county break-outs of TV households; and totals of women, men, teens and children in the ADI audience. Other data include the market's stations, and their cities of license, channel numbers and network affiliations. (Networks in

parentheses indicate secondary affiliations.)

Coverage maps show total survey areas in white, the ADI's themselves in light crosshatching, and Arbitron Metro Rating Areas in heavier cross-hatching. The survey areas consist of all counties in which the home market stations are viewed to any significant extent, including via cable. The Metro Areas, save for an occasional deviation caused by geographical or historical factors, conform to the U.S. Census Standard Metropolitan Statistical Areas.

Arbitron has also designated several "supplementary markets"—TV-station home counties where the stations of a different market receive the preponderance of viewing. Supplementary markets therefore do not meet Arbitron's criteria for having an ADI of their own; they are listed in this atlas next to the ADI of which they are a part. (Note—The survey area of a supplementary market usually differs from that of the neighboring ADI market.)

A complete list of the supplementary markets appears on page B-79, and a cross-reference list for cities in a multi-city ADI on B-80.

# Producing Commercials? We'll make it easy for you!

The Mississippi River, the Memphis skyline and its bridges, a landscaped patio, or a grassy slope . . . they're all a part of our new studios. We're right on the river bank and we move outside with our cameras as easily as we shoot inside our two (50' x 70' and 40' x 40') completely independently equipped studios. Thus you go

right on tape with your outside shots just like you were in the studio. There's even a 14-foot lift for high angle work . . . and every other modern aid you'd expect in an all-new facility. Give our production manager, Cal Crowell, a

call and let him show you how we can really make it easy for you! That number is (901) 525-3333.

# in a class by itself

If ever a market were made-to-order for the tv advertiser, that market is KELO-LAND. It is uniquely television-oriented. Its one-third million families live in 92 counties, embracing 74,000 square miles of four states. Yet its total

coverage television facility, KELO-LAND TV, enables you to display your product to its entire population—as easily as though you had every man, woman and child assembled in one room. With the doors locked. By that, we mean

the KELO-LAND market is virtually unpenetrable from the outside. Minneapolis stations can't get in. Omaha stations can't get in. KELO-LAND is a market apart. In a class by itself. No advertising campaign is a national campaign without it.

## Supplementary markets

The following supplementary markets have no ADI. Reports for these non-ADI markets may be produced in the November, February and/or May surveys. Data on each market is listed in the preceding atlas adjacent to the ADI in which it falls (third column, below). TV household estimates for supplementary markets are nonadditive, since these markets are composed of counties which are a part of other markets' ADI's.

## TV Markets by Nielsen Retail Index Territory

Nielsen Retail Index territory groupings are another standard way of reporting sales data. The following table ranks TV markets within each Nielsen Territory. This provides a yardstick for determining the number of spot markets needed to achieve a given coverage of a territory. For example, if the national media are not delivering sufficient advertising weight in New England, the planner will find that three TV markets

(Boston, Hartford and Providence) contain more than 80% of the New England territory households. Or, he can use the table to get a better idea of how and what TV markets are needed to cover all of New England. Data is from a special Nielsen Station Index tabulation based on a September 1975 estimate.

## How Network Delivery Varies by Market

National advertisers use spot television to increase network advertising weight in specific markets to achieve a predetermined level. These market goals are derived from the advertising budget and the market's share of the brand's projected sales. Thus, a spot schedule is usually indicated where a market has an unusually high brand-sales potential, or where the network weight delivered for the brand is below the national average used in planning, or both.

The first factor, market brand potential, varies by product and is difficult to generalize. The second factor, local-market network audiences, must be generalized because planning is based upon next season's *anticipated* network performance. The prevalence of network "package" buys, which tend to deliver average audience levels, supports

the use of average data.

The following tabulation, chosen especially for the *BROADCASTING Yearbook*, shows Arbitron Television's Areas of Dominant Influence (ADI) in terms of percent of the total number of U.S. TV households. Also given, in like percentage terms, are the network audiences in each ADI market during prime-time hours. It is this market audience figure, when compared to the market's share of population, that indicates whether the network commitment will perform above or below the national plan average in that market.

The figures are based on Arbitron Television's May 1975 Network Program Group Analysis.

(1) Channel, power and antenna. WOF-TV operates with 200 kilowatts (effective radiated power) visual and 20 kilowatts aural. Its antenna is 500 feet above average terrain and 300 feet above the ground; it holds a construction permit for a height increase.

(2) Date station first went on air (regardless of subsequent ownership changes).

(3) Address and zip code, telephone, Teletype Writer Exchange number.

(4) Licensee name and date of acquisition (if not original owner).

(5) Ownership. Acme Stations owns WOF-TV and several other broadcast properties, all detailed in the Group Ownership directory in section A. The station additionally has print media connections, explained in the Newspaper directory (also in section A). Principal stockholders are listed for independently owned stations.

(6) Network, foreign language, rep and Washington attorney. The primary WOF-TV national affiliate is CBS, the secondary is NBC. The station broadcasts two hours of Spanish a week. Sales representatives are listed with national rep first, then regional.

(7) Personnel.

(8) Cable and translators. WOF-TV is carried on six cable TV systems with a total of 20,000 subscribers, and on 10 rebroadcasting translators.

(9) Co-owned radio. WOF-TV has the same licensee as WOF-AM-FM.

(10) Advertising rates. The prices the station charges national advertisers for a 30-second spot are shown for each of three day-parts:

Prime time; early fringe; daytime

in that order. If a day-part is inapplicable a dash (—) replaces the rate.

\* An asterisk indicates noncommercial stations.

**ADI.** Immediately beneath every city heading is the ranked market Area of Dominant Influence into which the city falls. ADI details are presented in the preceding ADI Atlas.

# Our guests love us for our view.

How many New York hotels can boast an unobstructed view of Union Carbide? Pan Am? Grand Central Station?

We don't catch a whole lot of sunsets. But that's okay. Because our guests don't want sunsets.

Our guests want zip! Dash! Service! They're here to get jobs done. So they can get home fast and enjoy sunsets.

They pick the Roosevelt. In the middle of mid-town. They can get up later, get to work earlier.

If the view looks good to you, you ought to see it in person. At the Roosevelt, Madison at 45th, New York City.

# BOOKS FOR BROADCASTERS

**500. Crosby, P: THE ART OF GETTING YOUR OWN SWEET WAY.** Here is a book written for the person who realizes that we are all "managers of situations" and that how well we manage situations—including overcoming roadblocks set up by others—determines our success in business and personal life. Explains what situations are, how they affect us individually, and why it is important to resolve them according to the author's "Laws of Situation Management."  
1972 192 pp. \$10.00

**501. Sampson, R: HOW TO SURVIVE THE BUSINESS RAT RACE.** The author offers a total program for the total man, showing the reader (1) how to survive in the business rat race, (2) how to reduce it where possible, and (3) how to survive beyond the business rat race. The book is solidly based on the findings of the behavioral sciences but written in a readable, down-to-earth manner.  
1970 288 pp. \$6.50

**502. Humble, J: MANAGEMENT BY OBJECTIVES IN ACTION.** This practical source book of case material shows how Management By Objectives works in reality, and how it is evolving. Discusses difficulties in applying MBO in marketing and selling, and in research and development.  
1970 320 pp. \$9.95

**503. Blake, R and Mouton, J: THE GRID FOR SALES EXCELLENCE: Benchmarks for Effective Salesmanship.** The "sales grid" is a set of theories about human relationships between salesmen and customers, and the authors demonstrate specifically how these theories apply to every step in the selling process: prospecting, the sales presentation, objections and complaints, maintaining and strengthening established accounts.  
1970 256 pp. \$11.50

**504. Koontz, H: APPRAISING MANAGERS AS MANAGERS.** Here, from a leading practitioner, is a system of appraising managers as managers. It supplements the present programs of appraising managers by their performance against verifiable objectives. *Effective* managers must be able not only to perform in setting and achieving objectives, but also for their assurance of effectiveness over the long run, must be appraised on their *quality* of managing.  
1971 200 pp. \$13.00

**505. Levitt, T: MARKETING FOR BUSINESS GROWTH, 2nd Ed.** In this new edition of *Marketing for Business Growth* (formerly titled *The Marketing Mode*) the author presents a money-making view of the whole business operation. Included are many ingeniously practical schemes that show how to foresee important trends, how to influence them, and how to make them yield the greatest gains.  
1974 288 pp. \$11.50

**506. Lewis, H: THE BUSINESSMAN'S GUIDE TO ADVERTISING AND SALES PROMOTION.** This six-chapter "how-to" book emphasizes the practical application of professional advertising rules by the retailer or small businessman who must prepare an advertising campaign without the benefit of an agency. There is no other manual available which looks at advertising, sales promotion, and positive communications from the small businessman's vantage point of cost control, budget, media selection, and production problems.  
1974 224 pp. \$6.95

**507. Margerison, C: MANAGERIAL PROBLEM SOLVING.** This down-to-earth approach to managerial problem-solving; the process of talking with others in groups of varying size in order to resolve difficulties, outlines the principles of the process and the nature and content of problem-solving sessions. Case studies included illustrate problem-solving in the worlds of production, marketing, finance, and many others.  
1975 176 pp. \$9.95

**508. Keefe, W: LISTEN, MANAGEMENT! Creative Listening for Better Managing.** Dedicated to better communication and more profitable enterprise, this book shows how to communicate well so that the business of the organization will get done more quickly, more efficiently, with less problems and difficulty.  
1971 224 pp. \$11.50

**509. Jennings, E: ROUTES TO THE EXECUTIVE SUITE.** Based on first-hand research into the changing patterns of executive advancement in industry, and drawing on experience in the nation's 100 largest corporations, Dr. Jennings shows that the routes to the top are many and that the last decade has produced new avenues of advancement and a new breed of executive.  
1971 288 pp. \$9.95

## Television Billings 1948-1974

Figures for the years 1949 through 1967 are net time sales by stations and networks after all frequency and promotional discounts but before deduction of commissions to agencies and representatives. Figures for 1968 through 1974 were computed under a new formula and represent total amounts paid by advertisers for

the use of broadcast facilities. They include commissions paid to advertising agencies and representatives and payments for broadcast time and programs, materials, facilities and services supplied by broadcast stations and networks in connection with the sale of time. Figures are based on FCC data.

\*In 1948 FCC reported only "total revenues" (from time, talent and services) from "network programs" and from business "sold directly by stations." Hence figures for that first year of financial reporting are not comparable with time sales in ensuing years.

## TV Channel Allocations

### TV Allocations

**Note**—UHF and VHF TV allocations have been made by the FCC to the following cities. A plus or minus after a channel indicates that a station occupying the channel must operate with its carrier frequencies offset 10 kilohertz above or below, respectively, the normal carrier frequencies.

Asterisks (\*) indicate channels reserved for non-commercial use. Footnotes: 1) Following the decision in Docket 18261 (amendment of rules regarding geographic reallocation of channels 14-20 to land mobile radio in the 25 largest urbanized areas of the U.S.) channels so indicated will not be available for use until further action by the FCC. 2) This channel is not available for Elgin, Ill., unless FCC determines it is not needed at Joliet, Ill. 3) This channel is not available for Asbury Park, N.J., unless FCC determines it is not needed at New Brunswick, N.J. 4) Channel 15 will not be available for television use until further action by the FCC. 5) Stations using these assignments shall limit radiation toward stations on the same channel in Puerto Rico. 6) Operation on this channel is subject to the conditions, terms, and requirements set out in the report and order in docket 19075, RM-1645, adopted Jan. 5, 1972, released Jan. 7, 1972. FCC-72-19. (As of Aug. 1, 1975)
