1985 Edition No. 53

This edition supersedes Television Factbook No. 52 (1983-84 Edition) and all Updates thereto. This Factbook also starts a series of weekly TV Action Updates, reporting on new station starts, FCC grants, applications, allocations changes, etc. The Updates enable subscribers to keep the facilities data current in the Stations Volume. Subscribers may purchase these Updates in combination with the Factbook. For details, see Service Order Cards in this volume.

"OUR NEWS IMAGE HAS NEVER BEEN BETTER."

-David Choate, News Director WSVN-TV, Miami

"Ranked as a competitive activity, TV news would probably fall somewhere between rugby and wild boar wrestling in terms of fierceness. Which is why we're constantly on the lookout for anything that might give us an edge.

"Our 6 Betacam camera-recorder systems are a good example. Their image quality is spectacular, so we look great on-air.

"But even better, the mobility Betacam offers is a real incentive to our photographers to go for that really dramatic, unusual shot. The kind you won't see on every channel at 6 and 11. Because at least for the time being every station doesn't have Betacam."

"THE ABILITY TO SEND OUT MORE CREWS ON MORE STORIES IS WHAT I CALL GOOD NEWS."

-Tom Kirby, VP/News WTCN-TV, Minneapolis

"Before coming here, I was with Gannett's Denver station, KUSA, which was the

winner of the NPPA's 1983 'Station of the Year' award. And frankly, my goal here is to get to the finals again. A not unrealistic objective when you consider the talent we have, and the fact that we recently purchased 23 Betacams.

"After all, it seems obvious, the more people you have on the street, the better your chances are of coming up with a winner. Providing, of course, you give those people equipment that's as performance-minded as they are."

"WITH SO MUCH LESS EQUIPMENT TO LUG AROUND, WE'RE SEEING A LOT MORE EXCITING TAPE."

-James Delmonico, President/General Manager WRGB-TV, Schenectady

"I don't care how inspired or dedicated a photographer is, eight hours of hauling sixty-plus pounds of camera, recorder, lights,

and cable all over hell and gone is bound to have a stifling effect on someone's creativity.

"That's what initially got us interested in Betacam, and ultimately, why we made the decision to invest in it. The simple fact that you don't have to be a gorilla to use it. The maneuverability of this system is tremendous. So naturally we're seeing shots you just couldn't get before. And, of course, the image quality itself is magnificent.

"In fact, I'd have to say from the looks of things, we'll be adding more Betacam systems

HOW THE PEOPLE WHO LIVE AND DIE BY THE RATINGS RATE THE SONY BETACAM.™

before long. If for no other reason than to stop our crews from fighting over who gets to use the ones we currently have."

"THIS IS CLEARLY A SYSTEM BUILT FOR THE REAL WORLD."

-Allan Howard, VP/General Manager KXTV-TV, Sacramento

"You rarely find news under ideal conditions. More likely you're getting jostled around by a huge crowd, buffeted by gale winds or caught in a very tense, fast-moving situation. All of which tend to play havoc with equipment life spans.

"Betacam, however, seems to have been designed especially for this environment. It's an extremely well-built, exceptionally rugged system, particularly for its weight. And the net result is that in the year we've had them, downtime has been virtually nil.

"Equally important, because Betacam is totally compatible with 3/4" systems, you can

move into this technology at your own pace. Which is another part of adapting to the real world, the world of equipment budgets."

These are just a few examples of the reports we're getting from stations that have made the move to Betacam. To hear more, or, better yet, to get a look at the system behind them, just give us a call. In the New York/New

Jersey area (201) 833-5350;

in the Northeast/Mid-Atlantic (201) 833-5375; in the Midwest (312) 773-6045; in the Southeast (404) 451-7671; in the Southwest (214) 659-3600; in the West (213) 841-8711.

Program In

VIDEO WEEK

for the most complete coverage of

- Home video program suppliers
- Crossover from cable to cassette & disc & vice versa
- Cassette rental vs. sales
- Disc vs. VCR — RCA vs. Pioneer
- New pay TV & basic cable services
- Fighting the pirates
- Much, much more

You need VIDEO WEEK when you need to know the latest information regarding home video services and the industry spawned by the demand for non-broadcast programming.

Each week, you'll get the latest reports and in-depth analyses of programming for cable, pay TV, videocassette and videodisc.

You'll have an expert source to keep you well-informed on the strategies of the Hollywood studios, distributors, retailers, mass merchandisers, videocassette and disc duplicators. And, VIDEO WEEK will keep you up-to-date as well on personnel changes, trade shows here and abroad and more.

SO — give yourself a business advantage and let VIDEO WEEK brief you on the important events and activities in the video industry.

SATELLITE WEEK

When you're in the satellite business, you can't afford a communications breakdown.

And —

You can't afford to miss out on the dynamic news reports carried exclusively in SATELLITE WEEK because:

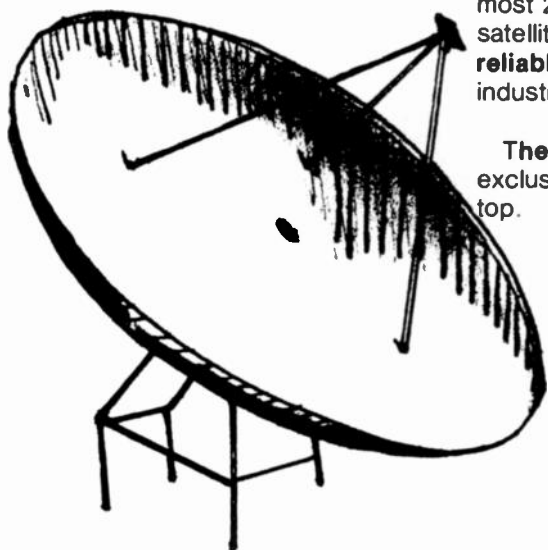

(1) SATELLITE WEEK is **unique**. It's the industry's **only** comprehensive weekly briefing **devoted entirely** to space communications and allied business. For us, satellite news isn't an afterthought — jammed in along with news that doesn't concern you. Satellite business news is **all** we cover.

(2) SATELLITE WEEK **saves you time**. Our unmatched early warning report is presented in a **crisp, concise** editorial style designed to cut through the fluff to the substance of the news.

(3) SATELLITE WEEK helps you **stay ahead of the game**. Our staff of experts in Washington, New York, Europe and Japan knows the players and understands the field of competition. (Some of our people have been covering satellite communications for almost 20 years — since Telstar first demonstrated the feasibility of satellite communications.) No other publication provides such a **reliable, timely and independent** assessment of this dynamic industry.

The bottom line: SATELLITE WEEK is the **only** source for the exclusive, hard-hitting news reports that managers need to stay on top.

**For more information,
call collect: 202-872-9200.**

"OUR SUCCESS STARTED WITH FINANCING FROM FIRSTMARK."

Ask Vince King how Communication Corporation of America got into the cable television business. He'll tell you how Firstmark Communications Finance provided the funds he needed to purchase cable systems in Ohio and Kentucky.

But more than that, he'll tell you how important Firstmark's flexibility is in developing and finalizing the transaction. How Firstmark's cable industry experience saved valuable time during the negotiations and how well Firstmark understands the needs of cable owners/operators.

Working with the Firstmark Communications staff, Vince King received the kind of personalized, professional service he needed from a broker/financier. So when he wants to expand his business, Firstmark is only a phone call away.

Take it from Vince King, President, Communication Corporation of America. Get in touch with Firstmark at 1-317-262-5858. Our fast, efficient approach to getting the right buyers, sellers and financing together has made us the preferred choice of cable owners/operators all across the country.

CHANGING ADDRESS?

PLEASE KEEP IN TOUCH!

We want you to get the best service possible and to do so, we need your help!

Because of the new format of TELEVISION & CABLE FACTBOOK, it's very important that we don't lose touch with you. To insure that you receive the next volume of this two-volume set as soon as it's published, we need to be advised of any address change that might affect delivery.

For your convenience, we have included the postage-paid card below.

Please change your records to reflect my new address and to insure that I will receive the second volume of my two-volume TELEVISION & CABLE FACTBOOK as soon as it's published.

What are all these people talking about?

"Anybody who's not reading (it) today doesn't belong in this industry."

President, TV Receiver Manufacturer

"Superb. Always concise yet informative."

Vice President, Major CATV System

"If I can find time for only one publication, this is it."

President, Broadcasting Company

"Peerless."

Senior Vice President, Industry Trade Assn.

"Good format for those in a hurry, allowing them to focus quickly on items of interest."

Bureau Chief, FCC

"I rely on your coverage over that of other trade papers."

Vice President, Broadcast Equipment Manufacturer

"Great. Authoritative. Timely. Easy to read."

President, Broadcasting Company

"I still like it after 29 years."

Partner, Law Firm (Communications Attorneys)

"Excellent - our best source of industry news."

Telecommunications Center Director, Major University

"Your annual cumulative index, coupled with your wide, all-inclusive coverage of news in the field, make this a unique and valuable long-term reference tool."

President, TV Film Production Company

"Excellent publication with sound inside information and knowledge of what's going on in broadcast industry and government."

General Attorney, TV Network

"Positively the most accurate source for the latest on our industry."

President, Electronics Retailer

"Good, quick way of acquainting oneself with issues."

Senate Commerce Committee Staff Member

"Excellent."

Vice President, TV Network

They're all talking about **Television Digest with Consumer Electronics**. Shouldn't **you** add this unique industry news service to your weekly "must read" list? Call or write:

Description of Station Directory Section

THE STATION MAPS

The only official and uniform rough guide to a station's physical coverage is found in the files of the Federal Communications Commission. Each TV station grantee is required to submit to the Commission its coverage contours predicted on the basis of engineering formulas designated by the Commission. The FCC specifies three grades of service as a general indication of the probable quality of reception.

The FCC does not intend or expect the predicted coverage contours, submitted by each station, to reflect whether a signal is received or not received at any specific location. Rather, the Commission regards the contours as a general guide to probable reception. The basic use made by the Commission of the contours is as a tool to determine where to allocate channels to minimize interference among stations.

Though all stations and applicants are required to submit predicted contours to the FCC, stations may also file contours based on actual measurements of transmitted signals. Under FCC rules, such filings are not mandatory, and only a relatively few stations have offered such measurements voluntarily. The Commission has no official and uniform rules for measuring service contours; such submissions are associated with stations' files but are not given official status by the Commission.

The maps are intended to serve as guides. It should be emphasized that the use of maps for legal proceedings, such as those before the FCC, may require precision greater than that reasonably obtainable in maps of the size employed in the *Factbook*.

On May 29, 1975 the FCC amended Section 73.699 of the rules providing revised charts for the prediction of field strengths of TV stations and requiring licensees to file new contours with renewal applications filed after the effective date. When a revised map was not available from the station or the FCC, a note to that effect appears on the station page.

The three grades of predicted contours required by the FCC are as follows:

Grade B Service: The quality of picture expected to be satisfactory to the median observer at least 90% of the time for at least 50% of the receiving locations within the contour, in the absence of interfering co-channel and adjacent-channel signals.

Grade A Service: Satisfactory service expected at least 90% of the time for at least 70% of the receiving locations.

Principal City Service: Satisfactory service expected at least 90% of the time for at least 90% of the receiving locations.

We obtained the predicted contour maps from the FCC files or from the stations. We publish two contour lines, "Grade A" and "Grade B."

(The composite maps and all other contents of this book are copyrighted by Television Digest, Inc., publishers of Television & Cable Factbook. The American Map Corp. (46-35 54th Rd., Maspeth, NY 11378), is the copyright owner of the base maps which are reprinted herein under Licenses #14244 and #14244-W. Reproduction in whole or part is prohibited without written permission of the copyright owners.)

1985 Edition

ARBITRON TV STATION CIRCULATION

The counties listed on the station pages represent the home market Arbitron Metro area plus those counties in which the station receives a Net Weekly Circulation of at least 5% according to Arbitron circulation estimates. Each of these counties is then delineated by three circulation categories which include those in which the station's circulation is 50% or more, 25%-49% and 5%-24%. In some instances, counties listed do not appear on the maps, since the reduction in scale required to include them would impair the legibility of the maps.

The station circulation estimates which determined the allocation of each county to the proper category were derived from samples obtained over several survey periods. The estimates were based on Arbitron market surveys conducted during 1983 and 1984.

The Total Households and Television Households which are listed for each county qualifying for inclusion in one of the three circulation categories are current Arbitron projections as of January 1984 (see Definitions of Arbitron Terms).

Net Weekly and Average Daily Circulation totals for each station are based on the above surveys.

(Data from Arbitron Ratings are fully protected by copyright. Reproduction in whole or part is prohibited without written permission from the Arbitron Ratings Company, 1350 Ave. of the Americas, New York, NY 10019.)

DEFINITIONS OF ARBITRON TERMS

Total Households—A household is a single dwelling unit, which may be a house, an apartment, or a group of one or more rooms. The total households figures shown in the current study are Market Statistics estimates projected to January 1, 1984 and rounded to the nearest hundred. These estimates include households on military installations.

Television Households—A television household is an occupied dwelling unit having one or more television sets. Updated estimates of TV households in each county are prepared annually by the Arbitron Research Department.

EDITOR'S NOTE: Total Households listed for each station in this Volume of the Television and Cable Factbook do not include households in any county in which the station's circulation is less than 5%.

TV Penetration—The percent of total homes having one or more television sets at the time of the surveys. TV penetration uses current regional penetration estimates derived by the Advertising Research Foundation from U.S. Bureau of the Census surveys conducted in accordance with ARF specifications.

Net Weekly Circulation—The estimated number of different television households viewing a particular station at least once per week, Monday-Sunday, Sign-on to Sign-off.

Average Daily Circulation—The estimated average number of different television households reached by a particular station on each day of the week, Sign-on to Sign-off.

Station Directory Description

SURVEY METHODS, Described by ARBITRON

Arbitron uses one-week, interviewer-supervised family viewing diaries to secure information for television audience estimates. Families are contacted initially by mail to inform them of their selection for the survey. They are then contacted by telephone to secure their cooperation in the survey and to elicit basic information as to television set ownership and number of sets owned in the household. Contact is maintained with the sample families through followup calls to encourage proper recording and prompt return of the diaries.

Sampling is controlled by geographic units of no larger than county size, and in some instances for reasons of population distribution, terrain or technical control a county is divided into two sampling units. Sample homes are selected by computer from all available households with listed telephones in the sampling universe through a systematic interval selection technique with random selection occurring within each interval.

In the Metro and ADI Rating Area, households with unlisted telephones are included in the sample universe by using a list of potential telephone numbers. Known listed numbers, business numbers, nonresidential business exchanges and unassigned number blocks have been eliminated.

The Arbitron family viewing diary measurement technique is used for both market surveys of television viewing and broadscale station circulation information by county.

At least four times each year, Arbitron surveys every county to provide viewing information for every television market in the country. Further details on Arbitron sampling procedures are available from Arbitron.

EXPLANATION OF FCC SYMBOLS

FCC Filing Symbols:

1. BPCT: Broadcast Permit Commercial Television.
2. BMPCT: Broadcast Modification of Permit Commercial Television.
3. DOC: Docket (designation applied by FCC to hearing cases).
4. GRANTED: Date of authorization by FCC.

Note: "BPCT" and "BMPCT" designations, accompanied by numbers, are affixed by the FCC to applications for new or changed station facilities to identify each when it is accepted for filing. They therefore constitute file numbers. Each map in the Factbook is accompanied with its file number to facilitate reference to the Commission's official files. In each case, the file number used is the one affixed to the application for facilities which were subsequently authorized by the FCC and in use at the time this Factbook was published. "Docket" numbers are used in those few cases where the application was in a hearing status and a file number hasn't been assigned. The "granted" date indicates when the FCC approved construction of facilities involved.

After a station is completed according to the terms of its construction permit, it receives a license; this is identified by a

number with a "BLCT" (Broadcast License Commercial Television) prefix. When a license is renewed, a number with a "BRCT" (Broadcast Renewal Commercial Television) prefix is employed. Applications for licenses or license renewals do not include requests for changes in facilities, thus do not affect predicted Grade A & B contours. Therefore, they are not employed as references in the Factbook.

The Grade A & B contours on the maps are predicted by station engineers according to the formulas designated by the FCC, as previously explained. They are based on facilities authorized or in use by stations at the time of Factbook publication.

BBM SURVEY METHODS

BBM is a non-profit tripartite association of advertising agencies, advertisers, broadcasters and broadcast representatives.

BBM conducts national surveys of television viewing and radio listening in all ten Canadian provinces.

A television market survey is taken over a seven day period and compiled and reported as the average of two or three weeks. Three week surveys are the designated sweep surveys. BBM identifies a range of dates during which a sweep survey can be taken. The individual weeks selected by BBM are not disclosed. Network television reports are also produced for fifty-two weeks of each year.

BBM provides detailed survey data for fifty recognized markets across Canada. BBM divides the country into three hundred and forty-six mutually exclusive sampling cells which, when combined, cover all of Canada's ten provinces. Ten times yearly, household enumerations are conducted by telephone. A master file of all individuals aged two and over is compiled. From this master file, BBM draws its television sample, just prior to each survey interval. More than a half million Canadians participate in BBM television surveys each year.

Randomly selected households are mailed a diary for each television set in the home. Household members are asked to record their personal television tuning by quarter hour for a specific seven day period to each set. The returned diaries are then weighted to represent the population within each sampling cell. Projections are made separately by age/sex group and by week of survey. In the bilingual markets of Montreal and Ottawa-Hull the intab diaries are also weighted by language group.

For each home station, BBM provides rating information by time periods and for each program for all specified markets in either central and/or extended markets. Furthermore, full coverage audience data or total station tuning from all measured areas is also published. A reach report is produced each Fall and Spring.

The definition of the central markets correspond to Statistics Canada defined Census Metropolitan Areas (CMA) or Census Agglomerations (CA) from which the home stations broadcast. To be considered a central market, CA/CMA will normally contribute the largest of the total hours of tuning to a home station. All BBM central markets have one accompanying extended market (similar in definition to an Area of Dominant Influence) except for some markets where no concentration of hours of tuning to home stations is found within the CA/CMA.

U. S. Television Station Directory

Data updated to August 15, 1984. Includes Rate Digests, personnel, facilities and other data. CP holders reported due by November 1984.

EXPLANATORY NOTES

Rates, personnel and other data supplied by stations. STA means Special Temporary Authorization pending license.

RATE DIGESTS: These show only the highest one-time rate charged by the stations. Most rates are also subject to frequency discounts, separate or additional rehearsal charges, talent & production charges, etc. For further details and for contract conditions, specifications etc., consult complete station rate cards, available from the stations on request.

STATION POWER: Powers shown are Effective Radiated Powers (ERP).

NETWORK SYMBOLS (registered trademarks)

indicate ABC, CBS and NBC TV network affiliation.

THE STATION PAGES

The individual station tables show a complete listing of all counties grouped by Arbitron Net Weekly Circulation levels, with Total Households, and TV Penetration in each county individually. For definitions of Arbitron terms, see Introduction.

SATELLITE STATIONS are shown with a dash line pattern in relation to the parent listing. In the satellite listing the parent station is shown with a dash line pattern.

THE STATE PAGES

Following the map of each state, rankings for Arbitron's Area of Dominant Influence Television Households are shown. ADI Households Rank is established by Arbitron.

The state pages also carry additional cross-reference material, indicating for example, those stations within the state that are identified with two or more cities, or with cities in another state.

Operating commercial and educational TV stations by VHF and UHF are shown for each state in a status report as of August 15, 1984.
