**F**rom the moment the first telecast made its way into a handful of living rooms, audiences were entranced, entertained and enlightened. Now, television is in nearly every household. Viewers receive more channels and have more choices than ever before. Television. It's the media choice that reaches 98% of all households. That's why advertisers invest a whopping 21 billion dollars each year. How do we know? We've been watching audiences watch TV since 1949—longer than *anyone*. And, as the medium and the audience grow and change, so do we. Developing new ways to define and describe who they are and what they watch. Arbitron. We know the territory.

# The Best Way To Get To Pittsburgh

## Three Million Reasons To Get To Pittsburgh

Three million people make Pittsburgh the 13th largest city, and the 13th largest television market. For you, that's three million customers with an average buying income of \$28,000 in the metro area.

## Pittsburgh Is KD Country

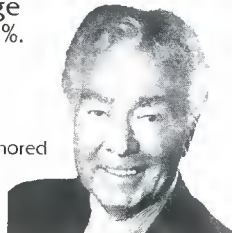

In the Pittsburgh ADI, the two daily newspapers have a combined reach of 28%, compared with television's 99% reach. In fact, you'd have to buy 28 local newspapers and who-knows-how-many radio stations to reach the same number of Pittsburghers as just ONE TV station: KDKA-TV.

KDKA-TV is Pittsburgh's first and strongest TV station. Our prime time numbers start at lunch time, with the highest-rated Noon News in the top twenty markets - always delivering better than at 55% share.

"Eyewitness News at Six" consistently beats the COMBINED news ratings of the other two affiliate stations. And in prime access, "Evening (PM) Magazine" continues to improve on its Number One status.

In Pittsburgh, CBS prime time is invariably number one because it's on KDKA-TV - outperforming CBS's national rating by 20%. On an average day, our circulation is 68% of metro households, and in the average week, it's 93%.

Bill Burns has anchored KDKA-TV's Noon News since the '50's - about the same number as his average audience share.

We'll Even Give You Directions

When you get to Pittsburgh, you won't get lost. We offer the Pittsburgh Consumer Market Profile - an exclusive demographic and psychographic portrait of the region, developed with Leigh Stowell & Company. We offer all the data and analysis services you need to keep your buy on target.

And if you're looking for a special place to showcase your client, consider KDKA-TV's special broadcasts - like Pirate Baseball, among the highest-rated local major league telecasts. Or exclusive coverage of the annual Pittsburgh Marathon. Or very special projects like our Peabody Award-winning organ donor project, "Second Chance."

Call or write our sales office. KDKA-TV2, Advertising Sales, One Gateway Center, Pittsburgh, PA 15222. (412) 392-2274.

Stacy Smith, Ray Tannehill, and Patti Burns draw more adult news viewers than the two competing stations combined.

## TV Assignments

Note—UHF and VHF TV assignments have been made by the FCC to the following cities. A plus or minus after a channel indicates that a station occupying the channel must operate with its carrier frequencies offset 10 kilohertz above or below, respectively, the normal carrier frequencies.

Asterisks (\*) indicate channels reserved for non-commercial use. Footnotes: <sup>1</sup> Following the decision in Docket 18261 (amendment of rules regarding geographic reallocation of channels 1-20 to land mobile radio in the 25 largest urbanized areas of the U.S.) channels so indicated will not be available for use until further action by the FCC. <sup>2</sup> Channel 15 will not be available for television use until further action by the FCC. <sup>3</sup> This channel is not available for Elgin, Ill., unless FCC determines it is not needed at Joliet, Ill. <sup>4</sup> Stations using these assignments shall limit radiation toward stations on the same channel in Puerto Rico. <sup>5</sup> Operation on this channel is subject to the conditions, terms, and requirements set out in the report and order in docket 19075, RM-1645, adopted Jan. 5, 1972, released Jan. 76, 1972, FCC-72-19. (As of August, 1986). Reserved for land mobile use.

Resources on Foreign and International Electronic Media

Prepared by Christopher H. Sterling, Director, Telecommunications Policy Program, George Washington University.

Listed and briefly annotated here is a selection from the current English-language periodical and book-length material on broadcasting, cable and newer media in other parts of the world. The emphasis is on the most recent material available, so listings from previous YEARBOOKS should be consulted for older items. Citations are found under one of the following headings: general, policy and law, world journalism, Britain and Western Europe, the Soviet Sphere, general Third World, The Middle East, Asia and Oceania, Africa, the Americas, and International Communications and Propaganda. (For material on American electronic media, see the last section of this YEARBOOK.) Information listed here is current as of December 1986.

General

**COMBROAD.** London. Commonwealth Broadcasting Association. quarterly Issues cover technical, policy, and program developments in member countries of the British Commonwealth, especially in Africa

Gerbner, George, and Marsha Siefert, eds *World Communications: A Handbook.* New York: Longman, 1983 544 pp. \$35.00. It is not really a handbook, but it provides a very good collection of scholarly articles on all aspects of media around the world, arranged in topical rather than regional sections

Head, Sydney W *World Broadcasting Systems: A Comparative Analysis.* Belmont, CA Wadsworth, 1985 457 pp. Best place to begin for an analytic rather than a regional approach. Chapters on ownership types, ac-

cess, laws and regulation, economics, facilities, programs and programing, audience research, and international broadcasting.

Howell, W.J. Jr *World Broadcasting in the Age of the Satellite.* Norwood, NJ: Ablex, 1986. 322 pp. \$45.00/29.95. Basically descriptive assessment arranged by region (divided into four worlds, the fourth being culturally pluralistic societies), plus chapters on international organizations, international shortwave and satellite broadcasting, and national comparisons.

Lichty, Lawrence W, comp *World and International Broadcasting: A Bibliography.* Washington: Broadcast Education Association, 1971. 600 pp. Dated and not annotated—but a good starting point for material through the late 1960s on virtually any country of the world.

# Television Marketplace

## The ADI Market Atlas

The Area of Dominant Influence is a geographic market design that defines each television market exclusive of the others, based on measurable viewing patterns. Each market's ADI consists of all counties in which the home market stations receive a preponderance of viewing, and every county in the continental U.S. is allocated exclusively to one ADI—there is no overlap. The total of all ADI's represents the total television households in the U.S.

The ADI is a standard market definition. As a television buying tool it is a geographic and demographic means for maximum efficiency. As a station tool it has applications for sales, programming, and promotion planning.

Following, in alphabetical order, are Arbitron Television's 213 ADI markets for 1986-

87, with coverage maps for each; and county by county breakouts of TV households. Other data include the market's stations, their cities of license, channel numbers and network affiliations.

Coverage maps show total survey areas in white, the ADI's themselves in light crosshatching, and Arbitron Metro Rating Areas in heavier crosshatching. The survey areas consist of all counties in which the home market stations are viewed to any significant extent, including via cable. The Metro Areas usually conform to U.S. Census Standard Metropolitan Statistical Areas.

Non-ADI markets do not meet Arbitron's criteria for having an ADI of their own; they are completed with the ADI of which they are a part.

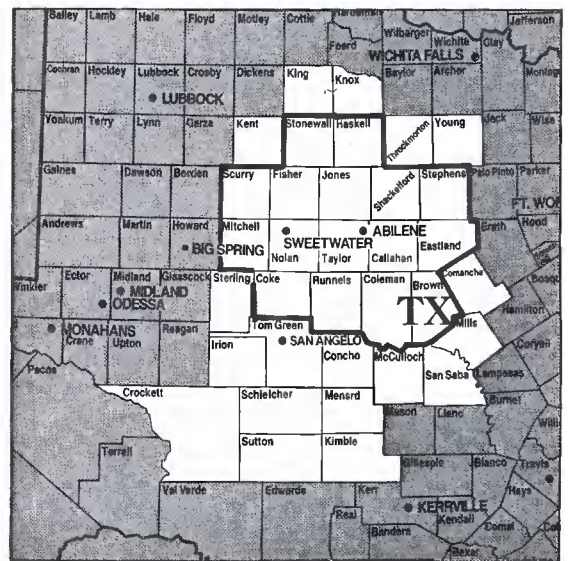

A complete listing of the non-ADI markets and a cross-reference list for cities in multi-city ADI's appear on page C-149.

## Non-ADI Markets

The following single-county markets did not achieve ADI status because the preponderance of viewing is not to the home-market station. Neither did they meet the criteria of the 10% Rule to become an ADI. The home counties in non-ADI markets are assigned to the ADIs that do receive the preponderance of viewing

## TV Markets by Nielsen Marketing Research Territory

Nielsen Marketing Research territory groupings are another standard way of reporting sales data. The following table ranks TV markets within each Nielsen Territory. This provides a yardstick for determining the number of spot markets needed to achieve a given coverage of a territory. For example, if the national media are not delivering sufficient advertising weight in

New England, the planner will find that three TV markets (Boston, Hartford and Providence) contain almost 80% of the New England territory households. Or, he can use the table to get a better idea of how and what TV markets are needed to cover all of New England. Data is from special Nielsen Station Index tabulation based on a January 1987 estimate.

## How Network Delivery Varies by Market

National advertisers use spot television to increase network advertising weight in specific markets to achieve a predetermined level. These market goals are derived from the advertising budget and the market's share of the brand's projected sales. Thus, a spot schedule is usually indicated where a market has an unusually high brand-sales potential, or where the network weight delivered for the brand is below the national average used in planning, or both.

The first factor, market brand potential, varies by product and is difficult to generalize. The second factor, local-market network audiences, must be generalized because planning is based upon next season's *anticipated* network performance. The prevalence of network package buys, which tend to deliver average audience levels, supports

the use of average data.

The following tabulation, chosen especially for the BROADCASTING/CABLECASTING YEARBOOK, shows Arbitron Television's Areas of Dominant Influence (ADI) in terms of percent of the total number of U.S. TV households. Also given, in like percentage terms, are the network audiences in each ADI market during prime-time hours. It is this market audience figure, when compared to the market's share of the population, that indicate whether the network commitment will perform above or below the national plan average in that market.

The figures are based on Arbitron Television's May 1986 Network Program Group Analysis.

# HOW THE SK-110D PUTS AN END TO THE REIGN OF ERROR.

With the SK-110D, Hitachi has created a studio broadcast camera with microprocessor technology so accurate that registration errors and time-consuming setup are things of the past.

Using a single button, now you can automatically set up RGB, color balance, and analog and digital registration—along with complete fault diagnosis—for up to 42 cameras simultaneously in just two minutes. And while you're shooting, the SK-110D keeps correcting realtime zoom and focusing errors, as well as registration changes caused by fluctuating prism temperatures.

The SK-110D performs magnificently.

Here's why: The 30-mm LOC diode gun Plumbicons and electronics yield 750 lines horizontal resolution, and greater than -56dB S/N. Dynamic focus provides for superb corner resolution. And detail signals are generated from both red and green.

The SK-110D is also today's most technologically advanced and versatile camera system. It offers iris and auto-setup by external chart. It has a high-resolution viewfinder with electronic markers.

The battery-backed head and CCU store up to four full-function files, eight lens files and 64 scene files. And add a smart RCU that controls those files, and you've got a camera that can precisely remember the "look" of every production shot you'll take.

Put an end to the reign of error in your studio today. And usher in a new era of image quality with the Hitachi SK-110D. For a demonstration in your studio contact Hitachi Denshi America Ltd., Broadcast and Professional Division, 175 Crossways Park West, Woodbury, NY 11797; (516) 921-7200 or (800) 645-7510. Canada: Hitachi Denshi, Ltd. (Canada), 65 Melford Drive, Scarborough, Ontario M1B 2G6; (416) 299-5900.
