# All we need is a minute of your time.

Just :60 of prime time to get our recruiting message out. Because more than ever before, it's a message that deserves to be heard.

The National Guard makes up about one-half of our nation's combat forces. And we need men and women to help keep us strong—ready to protect your community and defend your country.

It's a commitment that takes dedication. Guardsmen give at least two weeks a year and two days every month to the Guard—and to you. Is a minute of your time really too much to ask?

Run our spots whenever possible. And if you can't spare a minute, we'll settle for :30. Even :20 or :10.

To obtain free dubs of Air and Army National Guard PSAs write: National Guard Bureau, Advertising Distribution Center, P.O. Box 1776, Edgewood, Maryland 21040, Attn: SMSgt Pat Campbell.

# WHEN YOU KNOW EQUIPMENT BEST, YOU CAN BUILD SYSTEMS BEST.

At Camera Mart, we get the latest state-of-the-science equipment first. Because we rent and sell them first.

So we get to know which components are best—so that we can design, engineer, build and install the video system that's best for you. Whether your system is a simple off-line unit or a complex broadcast studio, you get our total support and a complete "turn-key" operation.

What's more, since we're not compelled to "push" any particular manufacturer, we can recommend what equipment will work for you—within your budget.

Come, design a system with us. The best.

# Index to Contents of Television & Cable Factbook No. 57

## Stations Volume

<b>SECTION A — STATIONS VOLUME</b>	
Index to Contents (Stations Volume)	A-x
An alphabetical index of all companies and organizations listed in the Stations Volume. Included are the names of all sections with page reference numbers.	
Television Market Rankings	A-3
A listing of television markets (in ascending order by rank) according to Arbitron Area of Dominant Influence (ADI) Television Households based on the 1987-1988 Arbitron Television Markets and Rankings Guide.	
Alphabetical List of Television Market Rankings	A-6
An alphabetical listing of Arbitron TV Markets based on the 1987-1988 Arbitron Television Markets and Rankings Guide.	
U.S. Television Station Call Letters	A-7
An alphabetical listing of commercial and non-commercial television station call letters including market name and channel number. Included are call letter assignments to CP holders.	
Canadian Call Letters	A-12
An alphabetical listing of Canadian commercial and non-commercial television station call letters including market name and channel number.	
Description of Station Directory Section	A-14
A detailed description of the kinds of information that can be found on each station page as well as definitions of terms used throughout this section.	
U.S. Television Station Directory	A-16
State by state listings of commercial television stations including coverage maps and Arbitron Net Weekly Circulation levels (where available), personnel and technical facilities for each station listed. Also listed are CP holders reported due to begin operating by late 1988. At the beginning of each state is a map containing the rankings of Arbitron's Area of Dominant Influence that fall within that state as well as those that fall within bordering states. Listed below the map are the ADI market names, Arbitron ADI TV Households for that ADI, the ADI rank and the television stations that fall within it. Total operating commercial and educational TV stations—both UHF and VHF—are shown for each state in a status report located on each state page.	
Public/Educational Television Stations	A-1238
State by state listings of public/educational television stations including personnel and technical facilities for each station listed. Also listed are call letters and addresses of commercially operated outlets plus CP holders reported due to begin operating by late 1988.	
Construction Permits	A-1313
A state by state listing of commercial and non-commercial construction permits with probable starting dates as reported by principals. Included are stations that were operating but have reverted back to CP status.	
Applications Pending for New TV Stations	A-1330
A state by state listing of applications pending for new commercial and non-commercial television stations.	
Group Ownership of Television Stations	A-1349
An alphabetical listing, by company name, of television station owners that have interests in 2 or more commercial and/or non-commercial and/or low power television stations.	
Newspaper Ownership of Television Stations	A-1361
An alphabetical listing, by company name, of newspaper owners that have interests in 2 or more commercial and/or non-commercial and/or low power television stations. Included are interlocking ownerships, in whole or part.	
Book & Periodical Ownership of Television Stations	A-1364
An alphabetical listing, by company name, of book & periodical publishing firms that have interests in 2 or more commercial and/or non-commercial and/or low power television stations.	
<b>SECTION B — STATIONS VOLUME</b>	
National Sales Representatives of Television Stations	B-1
An alphabetical listing, by company name, of U.S., Canadian, Foreign-Language and Overseas Station Representatives. Included is a list of stations represented as of September 1988.	
Low Power Television Stations	B-12
A state by state listing of low power television (LPTV) stations including licensee name and technical facilities. Also listed are LPTV construction permits and lottery grantees.	
Ownership of Low Power Television Stations	B-80
An alphabetical listing, by company name, of low power television station owners that have interests in 2 or more low power television stations. Included are licensees and permittees. Lottery grants not included.	

## SECTION B — STATIONS VOLUME

Television Translator Stations	B-103
A state by state listing of VHF and UHF television translator stations including licensee name, channel number (contained in call letters), transmitter power output (TPO), call letters and location of the station(s) repeated. Included are translators owned & operated by television stations as well as applications and construction permits.	
Translators Owned & Operated by Television Stations	B-185
A state by state listing of television translator stations owned and operated by television stations listed by primary station call letters. Also listed are stations with CP status.	
Instructional Television Stations	B-190
A state by state listing of instructional television stations (2,500 MHz) including licensee name, channel number (contained in call letters) and technical data. Also listed are applications and construction permits.	
Foreign-Language Programming on U.S. Commercial TV Stations	B-209
An alphabetical listing, by call letters within state, of U.S. commercial television stations carrying foreign language programming. Each listing contains the language(s) carried and the number of hours/week the programming is aired.	
Foreign-Language Programming on U.S. Public/Educational TV Stations	B-210
An alphabetical listing, by call letters within state, of U.S. public/educational television stations carrying foreign language programming. Each listing contains the language(s) carried and the number of hours/week the programming is aired.	
Canadian Television Stations	B-211
An alphabetical listing, by call letters within province, of Canadian television stations including personnel, technical facilities and BBM weekly reach figures for each station listed. Listed at the end of each province are repeater stations listed alphabetically by city of license, with call letters, channel number, licensee, station or network repeated (in parenthesis) & power.	
International Directory of TV Stations & Sets	B-255
An alphabetical listing, by country, of television stations on air, under construction, planned and operating experimentally throughout the world (based on best available information from U.S. & foreign govt. agencies). Also listed are Sets-in-Use as of August 1988. Characteristics of World Television Systems, Channel Frequencies and Color Television Systems in Use of Planned.	
American Forces Television Stations	B-279
A listing of television stations operated by the military departments under the jurisdiction of the Department of the Defense.	
Color Television Systems in Use or Planned	B-280
An alphabetical listing, by country, of the type of color television system in use within that country.	
TV Systems of United Kingdom & IBA Commercial Program Contractors	B-281
Companies listed include Directors, Executives and Staff.	
World TV Stations and Sets	B-284
An alphabetical listing, by country, of the total number of stations/transmitters, black & white and color television sets for each country.	
<b>SECTION C — STATIONS VOLUME</b>	
Television & Cable Program Sources & Services	C-3
An alphabetical listing, by company name, of companies producing/distributing television and/or cable programming or offering specialized programming services.	
Management & Technical Consulting Services	C-38
An alphabetical listing, by company name, of companies involved in marketing, market surveys, promotion, public relations, engineering, research, management consulting for television stations, radio stations, cable systems and other communications properties.	
Brokerage & Financing	C-53
An alphabetical listing, by company name, of companies involved in sales, financing, appraisals, consulting, mergers, etc. of television stations, radio stations, newspapers, cable systems or other communications properties.	
Manufacturers & Suppliers of Broadcasting & Cable Television Equipment	C-67
An alphabetical listing, by company name, of companies involved in manufacturing and/or distribution of television/cable equipment.	
Buyers Guide of Products and Services	C-111
A complete listing of television & cable related products and services as well as companies listed in the Factbook that manufacture, distribute and/or service the products or offer the various services listed in the SERVICES section of the Buyers Guide.	
Buyers Guide Product Index	C-230
An alphabetical index of all products and services listed in the Buyers Guide. Included is a page reference number as well as a product reference number for each entry.	

## Services Volume

### SECTION A — SERVICES VOLUME

Index to Contents (Services Volume)	Index
An alphabetical index of companies and organizations listed in the Services Volume. Included are the names of all sections with page reference numbers.	
U.S. Call Letters	Section A
An alphabetical listing of commercial and non-commercial television station call letters including market name and channel number. Included are call letter assignments to CP holders.	
Federal Communications Commission Directory	Section A
A listing of FCC departments and personnel including major bureau heads and staff.	
Congressional Committees	Section A
A listing of congressional committees handling TV, radio, and cable matters.	
Television Networks	Section A
An alphabetical listing, by company name, of U.S. and Canadian television networks. Listed are departments and personnel as well as network affiliates.	
Public & Educational TV Networks	Section A
An alphabetical listing of Public/Educational television networks. Officers and personnel are listed as well as a state by state list of member stations.	
Network Parent Companies	Section A
Capital Cities/ABC Inc. CBS Inc. General Electric Company. Listings include key personnel and major departments and divisions.	
Attorneys Practicing Before the FCC	Section A
An alphabetical list of law firms, attorneys active in communications, and members of the Federal Communications Bar Association.	
Consulting Engineers	Section A
An alphabetical list of engineering firms and engineers specializing in television, radio and cable matters.	
Network Engineering Departments	Section A
A listing of the major television network engineering departments and their key personnel.	
Communications Satellite Corporation (COMSAT)	Section A
A listing of COMSAT officers, divisions and departments.	
Satellite Communications Services	Section A
An alphabetical list, by company name, of companies involved in satellite communications services. Listed are the satellites operated by each company as well as their location and number of transponders. Also listed are companies involved in direct broadcast satellite operations.	
Multipoint Distribution Service (MDS)	Section A
An alphabetical list, by company name, of companies involved in Multipoint Distribution Service—a common carrier, super-high frequency service authorized to transmit specialized private TV programming or data and facsimile transmissions to customer-selected locations within a metropolitan area. Included in each listing is a list of licenses, construction permits (CPs) held and/or the primary service areas in which they have applied; followed by licensees, permittees & applicants arranged alphabetically in state and city order. Channel numbers, station locations, latitudes & longitudes, tariffs & power have been included.	
Multichannel Multipoint Distribution Service (MMDS)	Section A
An alphabetical list, by city within state, of cities where MMDS service is in operation. MMDS is a common-carrier, super-high frequency service authorized by the FCC in 1983 to transmit specialized private TV programming or data and facsimile transmissions to customer selected locations within a metropolitan area.	
Publications in Television & Related Fields	Section A
An alphabetical list of publications concerned with communications and related fields.	
Market and Audience Research Organizations	Section A
An alphabetical list, by company name, of U.S. and Canadian companies and organizations involved in market and audience research. Included are firms involved in commercials & program evaluation, national monitoring and other related services.	

### SECTION A — SERVICES VOLUME

National Association of Broadcasters (NAB)	Section A
A listing of NAB personnel, committees, television and radio boards of directors.	
State & Regional Associations of Broadcasters	Section A
A state by state listing of State & Regional Associations of Broadcasters. Included are the president and executives involved in the operation of each association.	
Labor Unions and Guilds	Section A
An alphabetical listing, by company name, of labor unions and guilds involved in television and related fields.	
Electronic Industries Association (EIA)	Section A
A listing of the EIA board of governors, officers and senior staff. Included are groups, divisions and departments and relevant personnel.	
Associations and Other Organizations	Section A
An alphabetical listing, by name, of associations and other organizations involved in television, cable and related fields.	
European Broadcasting Union (EBU)	Section A
A listing of EBU headquarters personnel and administrative council as well as a country by country listing of active and associate members.	
NCTA, CATA, Regional and State Cable Associations	Section A
A listing of NCTA and CATA personnel, committees and chairmen as well as an alphabetical listing of regional cable associations. Following the regional associations is a state by state list of state regulatory agencies for cable television.	
Sales & Transfers of Television Stations 1949—1988	Section A
A state by state listing of television stations that have been sold or had a transfer in major ownership since 1949. Included are volume references to issues of <b>Television Digest</b> reporting details of deals.	

### SECTION B — SERVICES VOLUME

Directory of Cable Systems	Section B
A state by state listing of operating cable systems throughout the U.S., Puerto Rico, Guam, Marianas and Virgin Islands. Included are franchises that have been awarded and are under construction as well as applications pending for franchises. Listings include basic and pay subscribers, programming, equipment in operation, personnel, ownership and more. At the beginning of each state is a summary of the total number of cable systems for that state, total communities served, franchises not yet operating, applications pending, communities with applications, total number of basic subscribers and total number of pay units.	
Cable Systems Reporting Addressability	Section B
A state by state listing of cable systems offering addressable services.	
Cable Group Ownership—U.S.	Section B
An alphabetical listing, by company name, of persons or companies which have interest in 2 or more cable systems or franchises. Listings include officers, systems/franchises owned, legal/sales/engineering reps., total basic and total pay subscribers.	
Broadcasters with Cable Holdings	Section B
An alphabetical listing, by company name, of broadcasters with cable holdings or interests in cable systems.	
Canadian Cable Group Ownership	Section B
An alphabetical listing, by company name, of Canadian persons or companies which have interest in 2 or more cable systems or franchises. Listings include officers, systems/franchises owned, legal/sales/engineering reps., total basic and total pay subscribers.	

### SECTION C — SERVICES VOLUME

Pay TV & Satellite Services	Section C
An alphabetical listing, by company name, of companies offering Pay-TV & Satellite Services. Included are categories for Pay-TV Programmers, Pay-per-View Services, Satellite Programming Services, Audio Only Services, Text Services, Regional Programming, Planned Services and Canadian Satellite Programming Services.	
Television & Cable Program Sources & Services	Section C
An alphabetical listing, by company name, of companies producing/distributing television and/or cable programming or offering specialized programming services.	

<b>Management &amp; Technical Consulting Services</b>	<b>Section C</b>
An alphabetical listing, by company name, of companies involved in marketing, market surveys, promotion, public relations, engineering, research, management consulting for television stations, radio stations, cable systems and other communications properties.	
<b>Brokerage &amp; Financing</b>	<b>Section C</b>
An alphabetical listing, by company name, of companies involved in sales, financing, appraisals, consulting, mergers, etc. of television stations, radio stations, newspapers, cable systems or other communications properties.	
<b>Public Relations &amp; Promotion</b>	<b>Section C</b>
An alphabetical list, by company name, of major companies involved in public relations & promotion.	
<b>Cable TV Construction &amp; Installation Services</b>	<b>Section C</b>
An alphabetical listing, by company name, of companies involved in cable television system construction & installation.	
<b>Security Services</b>	<b>Section C</b>
An alphabetical listing, by company name, of companies involved in cable television security services for systems & subscribers.	
<b>TV Set Makers</b>	<b>Section C</b>
An alphabetical listing, by company name, of companies that manufacture television receivers. Included are U.S. subsidiaries of foreign manufacturers.	
<b>Manufacturers &amp; Suppliers of Broadcasting &amp; Cable Television Equipment</b>	<b>Section C</b>
An alphabetical listing, by company name, of companies involved in manufacturing and/or distribution of television/cable equipment.	
<b>Cable Sales Representatives and Interconnects</b>	<b>Section C</b>
A complete listing of cable sales representatives and interconnects including companies representing cable systems in advertising sales.	

<b>Buyers Guide of Products and Services</b>	<b>Section C</b>
A complete listing of television & cable related products and services as well as companies listed in the Factbook that manufacture, distribute and/or service the products or offer the various services listed in the SERVICES section of the Buyers Guide.	
<b>Buyers Guide Product Index</b>	<b>Section C</b>
An alphabetical index of all products and services listed in the Buyers Guide. Included is a page reference number as well as a product reference number for each entry.	
<b>Industry Charts</b>	<b>Section C</b>
Statistics and charts and graphs containing information concerning television, radio and cable.	
<b>Channel Allocations—VHF &amp; UHF By City &amp; State</b>	<b>Section C</b>
An alphabetical listing, by city within state, of VHF & UHF channel allocations. Channels reserved for non-commercial educational use are identified as are offset carrier positions.	
<b>VHF Channel Allocations</b>	<b>Section C</b>
A numeric listing, by channel number, of VHF channel allocations. Listed beneath each channel number is list of cities (alphabetical by state) that have television stations allocated to that channel number.	
<b>UHF Channel Allocations</b>	<b>Section C</b>
A numeric listing, by channel number, of UHF channel allocations. Listed beneath each channel number is list of cities (alphabetical by state) that have television stations allocated to that channel number.	
<b>Channel Allocations for Canada and Mexico</b>	<b>Section C</b>
An alphabetical listing, by city within province, of VHF & UHF channel allocations within 250 miles of the Canadian and Mexican borders as agreed upon by U.S. and respective countries through exchange of diplomatic notes. Mexico reports VHF within 250 miles, UHF within 200 miles.

# 93%

## of people who use the Television & Cable Factbook are upper-level or mid-level managers.

The rest are clearly on the way up.

It surprised even us. Frankly, while we knew we had the best organized and the most widely used resource in the industry (*Multichannel News* survey), we lacked the specifics to back up our convictions. Then, a blind survey we conducted this past year showed that, on average, 4.31 different people use each **Television & Cable Factbook** more than 10.18 times each month. Put another way, 23,705 different decision-makers and influencers refer to this important tool over 241,000 times monthly! Over 63% are in upper-level management, and some 30% have mid-level management positions. Corporate managers, programmers, engineers, marketers and financial people had the job responsibilities that most often appeared in our study.

It's hard to imagine that an advertising message that will receive nearly 3 million impressions in the course of a year won't be seen by the people you want to sell your products and services. Where else can people get information and the names and numbers they need quickly, accurately, and in one place? Only the **Television & Cable Factbook** has

Grade A and B contour maps of every commercial station in the U.S. And if you think our *Buyer's Guide* isn't the first place they go to find the products they need each day, maybe you'd better ask some of the thousands of subscribers who write or call us each year to make sure their company is listed.

The **Television & Cable Factbook** is the primary source for information about the total industry. A single ad will be seen all year by the men and women who can say "Yes" when you ask them to buy.

If the **Television & Cable Factbook** isn't part of your advertising plan, it should be. Now is the time to be planning for next year's placement in the industry's most respected resource... with less waste circulation than any other publication in television and cable. For a media kit that contains rates, ad sizes, and details on the research we talked about, call or write Gene Edwards, Advertising Director. It's not too early to start planning for next year...while some good positions are still available!

# “We treat it like gold.”

**Russ Pope**  
Vice President & Director of  
Engineering  
&  
**Dino Corbin**  
General Station Manager  
KHSL-TV  
Chico-Redding, CA

Russ and Dino are among the thousands of engineers, programmers, general managers and financial people who get and regularly use the **Television & Cable Factbook**.

“Of all the elements that are so integral and important to our operations, the **TV Factbook** is one of our most useful tools.

“It allows a quick and detailed reference to all aspects of our business from equipment needs to station and market information.”

They are two of the most important people in our business because they can say, “*Yes, we’ll buy!*”

KHSL-TV is one of hundreds of stations that use this important resource. In fact, more than 4.31 different decision-makers and influencers refer to each **Television & Cable Factbook** 10.18 times each month. In other words, 23,705 top-level executives will see your advertising message more than

241,000 times monthly! Over 63% are in upper-level management, and 30% have mid-level management positions.

Your ad in the **Television & Cable Factbook** costs about the same as those placed in weeklies and monthlies. Yet a single ad will represent your company all year long.

If you want to reach the men and women who can say “*Yes*” to you, plan now to have a space like this in next year’s book while good positions are still available. Contact Gene Edwards, Advertising Director, and get our media kit which will have all the details on our rates, availabilities and research.

*(If you’re wondering why the VP/Engineering is mentioned before the General Manager, it’s because Dino always puts his people first!)*

# Description of Station Directory Section

## THE STATION MAPS

The only official and uniform rough guide to a station's physical coverage is found in the files of the Federal Communications Commission. Each TV station grantee is required to submit to the Commission its coverage contours predicted on the basis of engineering formulas designated by the Commission. The FCC specifies three grades of service as a general indication of the probable quality of reception.

The FCC does not intend or expect the predicted coverage contours, submitted by each station, to reflect whether a signal is received or not received at any specific location. Rather, the Commission regards the contours as a general guide to probable reception. The basic use made by the Commission of the contours is as a tool to determine where to allocate channels to minimize interference among stations.

Though all stations and applicants are required to submit predicted contours to the FCC, stations may also file contours based on actual measurements of transmitted signals. Under FCC rules, such filings are not mandatory, and only a relatively few stations have offered such measurements voluntarily. The Commission has no official and uniform rules for measuring service contours; such submissions are associated with stations' files but are not given official status by the Commission.

The maps are intended to serve as guides. It should be emphasized that the use of maps for legal proceedings, such as those before the FCC, may require precision greater than that reasonably obtainable in maps of the size employed in the *Factbook*.

On May 29, 1975 the FCC amended Section 73.699 of the rules providing revised charts for the prediction of field strengths of TV stations and requiring licensees to file new contours with renewal applications filed after the effective date. When a revised map was not available from the station or the FCC, a note to that effect appears on the station page.

The three grades of predicted contours required by the FCC are as follows:

**Grade B Service:** The quality of picture expected to be satisfactory to the median observer at least 90% of the time for at least 50% of the receiving locations within the contour, in the absence of interfering co-channel and adjacent-channel signals.

**Grade A Service:** Satisfactory service expected at least 90% of the time for at least 70% of the receiving locations.

**Principal City Service:** Satisfactory service expected at least 90% of the time for at least 90% of the receiving locations.

We obtained the predicted contour maps from the FCC files or from the stations. We publish two contour lines, "Grade A" and "Grade B."

## ARBITRON TV STATION CIRCULATION

The counties listed on the station pages represent the home market Arbitron Metro area plus those counties in which the station receives a Net Weekly Circulation of at least 5% according to Arbitron circulation estimates. Each of these counties is then delineated by three circulation categories which include those in which the station's circulation is 50% or more, 25%-49% and 5%-24%. In some instances, counties listed do not appear on the maps, since the reduction in scale required to include them would impair the legibility of the maps.

The station circulation estimates which determined the allocation of each county to the proper category were derived from samples obtained over several survey periods. The estimates were based on Arbitron market surveys conducted during 1987 and 1988.

The Total Households and Television Households which are listed for each county qualifying for inclusion in one of the three circulation categories are current Arbitron projections as of January 1988 (see Definitions of Arbitron Terms).

Net Weekly and Average Daily Circulation totals for each station are based on the above surveys.

(Data from Arbitron Ratings are fully protected by copyright. Reproduction in whole or part is prohibited without written permission from the Arbitron Ratings Company, 142 West 57th St., New York, NY 10019.)

## DEFINITIONS OF ARBITRON TERMS

**Total Households**—A household is a single dwelling unit, which may be a house, an apartment, or a group of one or more rooms. The total households figures shown in the current study are Market Statistics estimates projected to January 1, 1988 and rounded to the nearest hundred. These estimates include households on military installations.

**Television Households**—A television household is an occupied dwelling unit having one or more television sets. Updated estimates of TV households in each county are prepared annually by the Arbitron Research Department.

**TV Penetration**—The percent of total homes having one or more television sets at the time of the surveys. TV penetration uses current regional penetration estimates derived by the Advertising Research Foundation from U.S. Bureau of the Census surveys conducted in accordance with ARF specifications.

**Net Weekly Circulation**—The estimated number of different television households viewing a particular station at least once per week, Monday-Sunday, Sign-on to Sign-off.

**Average Daily Circulation**—The estimated average number of different television households reached by a particular station on each day of the week, Sign-on to Sign-off.

**EDITOR'S NOTE:** Total Households listed for each station in this Volume of the *Television and Cable Factbook* do not include households in any county in which the station's circulation is less than 5%. The counties appearing in the circulation report are listed alphabetically by state. The states are arranged alphabetically by two-letter state abbreviations.

## SURVEY METHODS, Described by ARBITRON

Arbitron uses one-week, interviewer-supervised family viewing diaries to secure information for television audience estimates. Families are contacted initially by mail to inform them of their selection for the survey. They are then contacted by telephone to secure their cooperation in the survey and to elicit basic information as to television set ownership and number of sets owned in the household. Contact is maintained with the sample families through followup calls to encourage proper recording and prompt return of the diaries.

Sampling is controlled by geographic units of no larger than county size, and in some instances for reasons of population distribution, terrain or technical control a county is divided into two sampling units. Sample homes are selected by computer from all available households with listed telephones in the sampling universe through a systematic interval selection technique with random selection occurring within each interval.

In the Metro and ADI Rating Area, households with unlisted telephones are included in the sample universe by using a list of potential telephone numbers. Known listed numbers, business numbers, nonresidential business exchanges and unassigned number blocks have been eliminated.

The Arbitron family viewing diary measurement technique is used for both market surveys of television viewing and broadscale station circulation information by county. At least four times each year, Arbitron surveys every county to provide viewing information for every television market in the country. Further details on Arbitron sampling procedures are available from Arbitron.

## EXPLANATION OF FCC SYMBOLS

FCC Filing Symbols:

1. BPCT: Broadcast Permit Commercial Television.
2. BMPCT: Broadcast Modification of Permit Commercial Television.
3. DOC: Docket (designation applied by FCC to hearing cases).
4. GRANTED: Date of authorization by FCC.

Note: "BPCT" and "BMPCT" designations, accompanied by numbers, are affixed by the FCC to applications for new or changed station facilities to identify each when it is accepted for filing. They therefore constitute file numbers. Each map in the Factbook is accompanied with its file number to facilitate reference to the Commission's official files. In each case, the file number used is the one affixed to the application for facilities which were subsequently authorized by the FCC and in use at the time this Factbook was published. "Docket" numbers are used in those few cases where the application was in a hearing status and a file number hasn't been assigned. The "granted" date indicates when the FCC approved construction of facilities involved.

After a station is completed according to the terms of its construction permit, it receives a license; this is identified by a number with a "BLCT" (Broadcast License Commercial Television) prefix. When a license is renewed, a number with a "BRCT" (Broadcast Renewal Commercial Television) prefix is employed. Applications for licenses or license renewals do not include requests for changes in facilities, thus do not affect predicted Grade A & B contours. Therefore, they are not employed as references in the Factbook.

The Grade A & B contours on the maps are predicted by station engineers according to the formulas designated by the FCC, as previously explained. They are based on facilities authorized or in use by stations at the time of Factbook publication.

## BBM SURVEY METHODS

BBM is a non-profit tripartite association of advertising agencies, advertisers, broadcasters and broadcast representatives.

BBM conducts national surveys of television viewing and radio listening in all ten Canadian provinces.

A television market survey is taken over a seven day period and compiled and reported as the average of two or three weeks. Three week surveys are the designated sweep surveys. BBM identifies a range of dates during which a sweep survey can be taken. Toronto, Montreal and Vancouver are reported seven times yearly; markets four through twelve four times yearly; all others twice yearly. The individual weeks selected by BBM are not disclosed. Network television reports are produced for forty-eight weeks of each year.

BBM provides detailed survey data for fifty recognized markets across Canada. BBM divides the country into three hundred and forty-six mutually exclusive sampling cells which, when combined, cover all of Canada's ten provinces. Ten times yearly, household enumerations are conducted by telephone. A master file of all individuals aged two and over is compiled. From this master file, BBM draws its television sample, just prior to each survey interval. Households selected are not used again except as they may occur in the random selection of a sample. More than a half million Canadians are asked to participate in BBM television surveys each year, 350,000 of whom agree.

Randomly selected households are mailed a diary for each television set in the home. Household members are asked to record their personal television tuning by quarter hour for a specific seven day period to each set. The returned diaries are then weighted to represent the population within each sampling cell. Projections are made separately by age/sex group and by week of survey. In the bilingual markets of Montreal and Ottawa-Hull the intab diaries are also weighted by language group.

For each home station, BBM provides rating information by time periods and for each program for all specified markets in either central and/or extended markets. Full coverage audience data or total station tuning from all measured areas is also published. A reach report showing results by station and area is produced each Fall and Spring.

The definition of the central markets corresponds to Statistics Canada defined Census Metropolitan Areas (CMA) or Census Agglomerations (CA) from which the home stations broadcast. To be considered a central market, CA/CMA will normally contribute the largest of the total hours of tuning to a home station. All BBM central markets have one accompanying extended market (similar in definition to Designated Market Areas or an Area of Dominant Influence) except for some markets where no concentration of hours of tuning to home stations is found within the CA/CMA.

**Note:** In the Spring 1988 BBM Survey, results do not include stations which did not subscribe to the study.

# U.S. Television Station Directory

Data updated to October 15, 1988 unless otherwise indicated. Includes rate digests, personnel, facilities and other data. CP holders reported due by November 1988.

## THE STATE PAGES

Following the map of each state, rankings for Arbitron's Area of Dominant Influence Television Households are shown. ADI Household Rank is established by Arbitron.

The state pages also carry additional cross-reference material, indicating for example, those stations within the state that are identified with two or more cities, or with cities in another state.

Operating commercial and educational TV stations by VHF and UHF are shown for each state in a status report as of October 15, 1988.

## STATION PAGES

Rates, personnel and other data supplied by stations.

**RATE DIGESTS:** These show only the highest one-time rate charged by the stations. Most rates are also subject to frequency discounts, separate or additional rehearsal charges, talent & production charges, etc. For further details and for contract conditions, specifications etc., consult complete station rate cards, available from the stations on request.

**STATION POWER:** Powers shown are Effective Radiated Powers (ERP).

NETWORK SYMBOLS (registered trademarks)

The individual station tables show a complete listing of all counties grouped by Arbitron Net Weekly Circulation levels, with Total Households, and TV Penetration in each county individually. For definitions of Arbitron terms, see Introduction.

**SATELLITE STATIONS** are shown with a dash line pattern in relation to the parent listing. In the satellite listing the parent station is shown with a dash line pattern.

“It is clearly  
my most  
frequently  
used  
resource.”

Richard H. Miner  
Director of Production  
and Engineering Operations  
WWOR-TV  
New York, NY

Rick is one of thousands of engineers, programmers, general managers and financial people who get and regularly use the **Television & Cable Factbook**.

“I find that it’s the all-encompassing single source for up-to-date station information. Also traces the ever-changing world of group ownership.”

Rick is one of the most important people in our business because he can say, “*Yes, we’ll buy!*”

WWOR-TV is one of hundreds of stations that use this important resource. In fact, more than 4.31 different decision-makers and influencers refer to each **Television & Cable Factbook** 10.18 times each month. In other words, 23,705 top-level executives

will see your advertising message more than 241,000 times monthly! Over 63% are in upper-level management, and 30% have mid-level management positions.

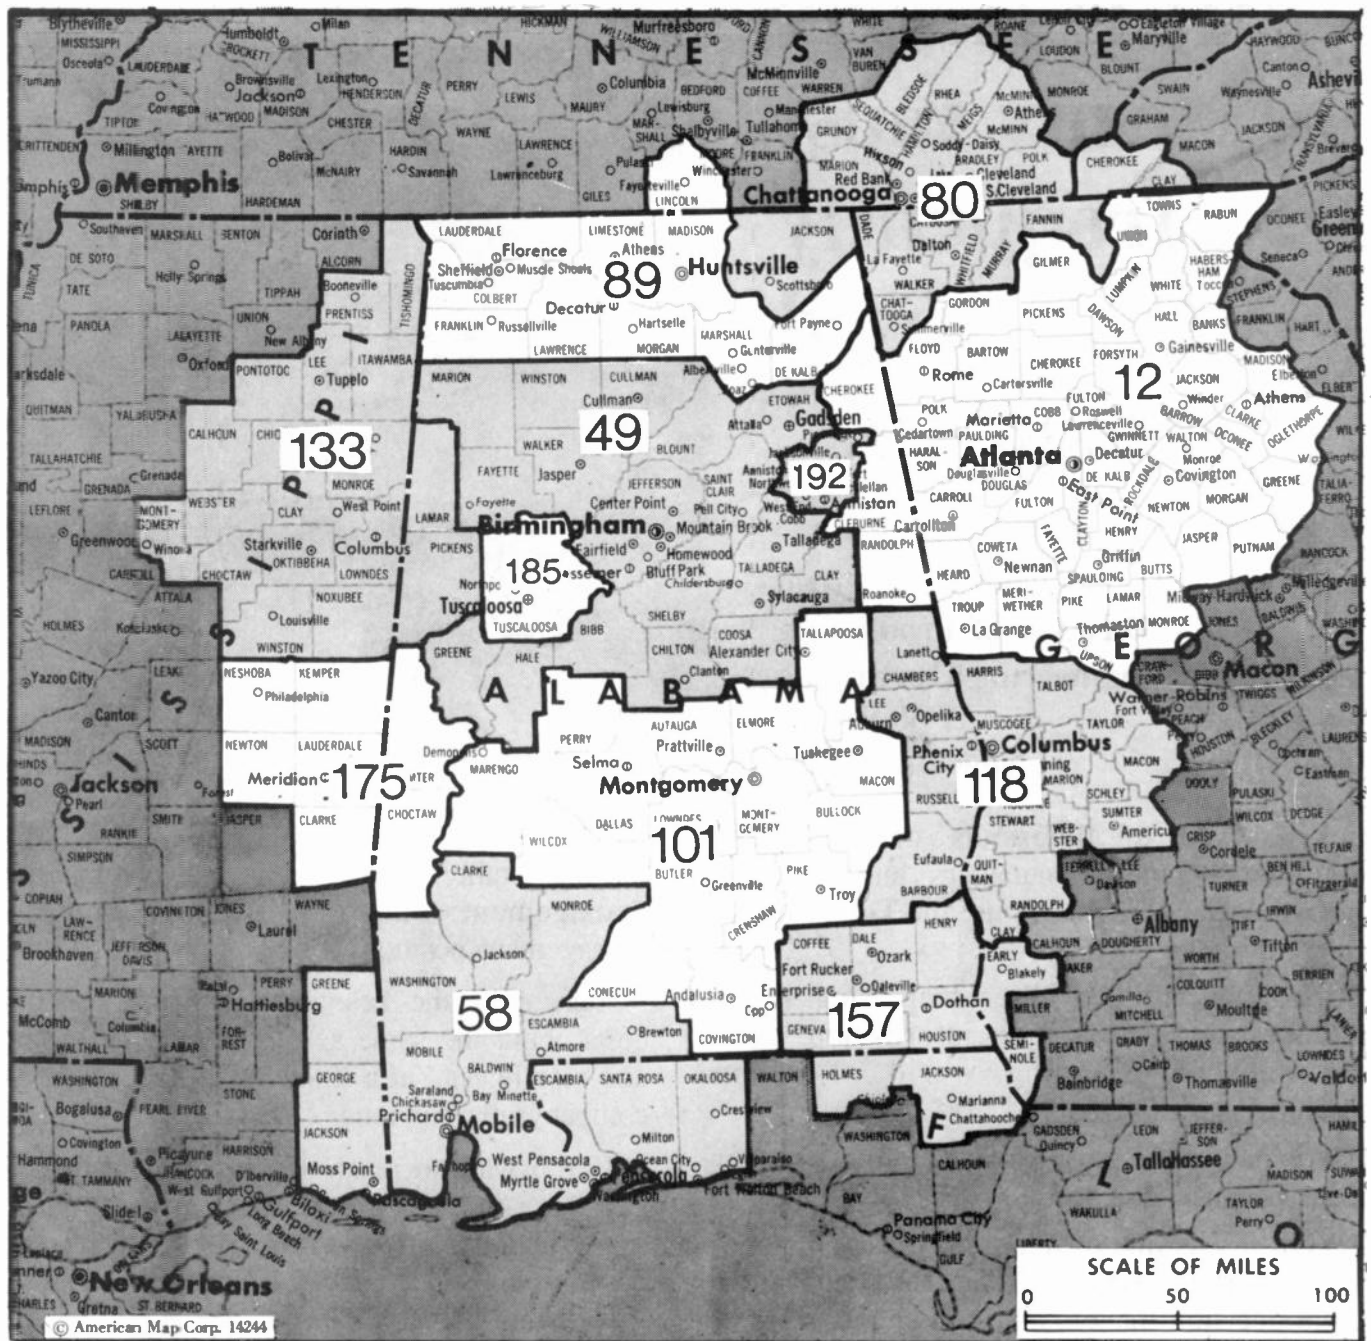

Your ad in the **Television & Cable Factbook** costs about the same as those placed in weeklies and monthlies. Yet a single ad will represent your company all year long.

If you want to reach the men and women who can say “*Yes*” to you, plan now to have a space like this in next year’s book while good positions are still available. Contact Gene Edwards, Advertising Director, for our media kit which will tell you even more about us. Make your space reservations for the next edition now.
