Russ and Dino are among the thousands of engineers, programmers, general managers and financial people who get and regularly use the **Television & Cable Factbook**.

“Of all the elements that are so integral and important to our operations, the **TV Factbook** is one of our most useful tools.

“It allows a quick and detailed reference to all aspects of our business from equipment needs to station and market information.”

They are two of the most important people in our business because they can say, “*Yes, we’ll buy!*”

KHSL-TV is one of hundreds of stations that use this important resource. In fact, more than 4.31 different decision-makers and influencers refer to each **Television & Cable Factbook** 10.18 times each month. In other words, 23,705 top-level executives will see your advertising message more than

241,000 times monthly! Over 63% are in upper-level management, and 30% have mid-level management positions.

Your ad in the **Television & Cable Factbook** costs about the same as those placed in weeklies and monthlies. Yet a single ad will represent your company all year long.

If you want to reach the men and women who can say “*Yes*” to you, plan now to have a space like this in next year’s book while good positions are still available. Contact Gene Edwards, Advertising Director, and get our media kit which will have all the details on our rates, availabilities and research.

(If you’re wondering why the VP/Engineering is mentioned before the General Manager, it’s because Dino always puts his people first!)

CORPORATE STRUCTURE

The Canadian Broadcasting Corp. is a Crown (that is, publicly owned) corporation established on November 2, 1936 by an Act of the Canadian Parliament to provide the national broadcasting service in Canada in the two official languages. Under this legislation, the CBC is responsible to Parliament, to which it reports each year on its operations through the Minister of Communications. The CBC is financed mainly by public funds voted annually by Parliament. Supplementary revenue is obtained from commercial advertising on CBC television. CBC radio is virtually free of commercial advertising.

The CBC operates several national services: A French television network; an English television network; English and French AM radio and FM stereo networks, maintaining high levels of Canadian content (in the 80 per cent range for television and even higher for radio). The CBC National Satellite Channel makes available to Canadians via cable the proceedings of the House of Commons and other special national events such as public hearings and provincial election coverage. Radio Canada International is a service of the CBC on shortwave. Broadcasting in 12 languages, RCI's information programming reflects Canada's political, economic, social and cultural spectrum to an international audience. RCI also produces programs for use by leading broadcasters in the world's major radio markets. Northern Service Television began in 1967 as a tape delay rebroadcast service in 14 northern communities. Northern based television production began in 1979 at Yellowknife. Today, Northern Service broadcasts on more than 100 northern television transmitters on two satellite channels across four time zones. Production facilities exist in Yellowknife, Whitehorse, Montreal and Ottawa. The service supplements network programs with shows produced by Northern Service, as well as programs procured from outside the corporation. Northern Service also assists independent native broadcasters operating under the federal "Northern Native Broadcast Access Program" to distribute their programming over its television. Northern Service produces programs in English, Inuktitut, Slavey, Dogrib, Chipewyan, Loucheux and Cree. The Northern Quebec Service provides most of CBC's French and English radio and television programming, as well as some programming in Cree, to residents of Quebec's north.

The CBC operates one of the most extensive distribution systems in the world — providing service across six time zones, using nine

Canadian satellite channels and more than 100,000 kilometres of microwave and land line.

At least 99% of both English-speaking and French-speaking Canadians have direct access to CBC television and mono radio services in their respective languages. Most television programming is in color, and as of January 1, 1988, 94% of Canadian households had color sets.

Public Broadcasting Service (PBS) is the national membership organization of 173 public television licensees, which operate 338 stations. It serves as the national distributor of public television programming, obtaining its programs from member stations, American independent producers & distributors, and foreign TV systems and distributors; PBS is not a production entity. The member stations support the private, non-profit corporation's service-oriented functions through annual membership assessments. Funding for PBS's operation of its satellite program distribution facilities is provided by the member stations, assisted, in part, by the Corporation for Public Broadcasting. PBS services include: Program acquisition, distribution and scheduling; education and video services; national program promotion; development & fundraising support; broadcast & technical operations; engineering & technology development & audience research. PBS is governed by a 35-member Board of Directors, which includes 17 lay directors representing stations' governing boards and 13 professional directors from station management elected by PBS member stations to three-year terms, four general directors elected by the lay & professional directors to three-year terms and the PBS president.

93%

**of people who use the
Television & Cable Factbook
are upper-level or mid-level managers.**

The rest are clearly on the way up.

It surprised even us. Frankly, while we knew we had the best organized and the most widely used resource in the industry (*Multichannel News* survey), we lacked the specifics to back up our convictions. Then, a blind survey we conducted this past year showed that, on average, 4.31 different people use each **Television & Cable Factbook** more than 10.18 times each month. Put another way, 23,705 different decision-makers and influencers refer to this important tool over 241,000 times monthly! Over 63% are in upper-level management, and some 30% have mid-level management positions. Corporate managers, programmers, engineers, marketers and financial people had the job responsibilities that most often appeared in our study.

It's hard to imagine that an advertising message that will receive nearly 3 million impressions in the course of a year won't be seen by the people you want to sell your products and services. Where else can people get information and the names and numbers they need quickly, accurately, and in one place? Only the **Television & Cable Factbook** has

Grade A and B contour maps of every commercial station in the U.S. And if you think our *Buyer's Guide* isn't the first place they go to find the products they need each day, maybe you'd better ask some of the thousands of subscribers who write or call us each year to make sure their company is listed.

The **Television & Cable Factbook** is the primary source for information about the total industry. A single ad will be seen all year by the men and women who can say "Yes" when you ask them to buy.

If the **Television & Cable Factbook** isn't part of your advertising plan, it should be. Now is the time to be planning for next year's placement in the industry's most respected resource... with less waste circulation than any other publication in television and cable. For a media kit that contains rates, ad sizes, and details on the research we talked about, call or write Gene Edwards, Advertising Director. It's not too early to start planning for next year...while some good positions are still available!
