(1) Station call letters as assigned by the Federal Communications Commission (FCC).

(2) Channel, power, antenna, location and construction permit. WOF-TV operates with 2,200 kilowatts (effective radiated power) visual and 20 kilowatts aural. Its antenna is 500 feet above average terrain and 300 feet above ground. "N36 49 21 W108 47 32" refers to the geographical coordinates (latitude and longitude) of the transmitter location. WOF-TV holds a construction permit for an antenna height change to 750 feet above average terrain, 550 feet above ground.

(3) Date station first went on the air (regardless of subsequent ownership changes).

(4) Address and zip code, telephone, Teletype Write Exchange number. Fax number may also be included.

(5) Licensee name.

(6) Ownership and date of acquisition (if not original owner). If a station has been sold, any available sale information is listed

following the acquisition date. WOF-TV is owned by Acme Stations, which also owns several other broadcast properties. For details on group owners, see *Group Ownership* listings in Section A. WOF-TV also has print media connections, which are detailed in the *Cross-Ownership* listings, also in Section A. Principal stockholders of independently owned stations may also be listed.

(6a) FTR date refers to *Broadcasting Magazine's* weekly "For the Record" column, where station sales are recorded as received from the FCC.

(7) Network and foreign language programming. The primary WOF-TV national network is CBS, the secondary affiliation is with NBC. The station broadcasts two hours of Spanish programming a week.

(8) Representatives and Washington attorney. Sales representatives are listed with the national rep first, then regional.

(9) Personnel.

(10) Cable systems, subscribers and translators. WOF-TV is carried on six cable TV systems with a total of 20,000 subscribers, and on 10 rebroadcasting translators.

(11) Co-owned radio. WOF-TV has the same licensee as WOF-AM-FM.

(12) Advertising rates. This data indicates the prices the station charges for a 30-second spot during the following time slots: primetime; early fringe; daytime, respectively. If a time slot is not applicable "na" replaces the rate.

An asterisk (*) indicates noncommercial stations.

Note: Listed immediately beneath every city heading is the ranked market Area of Dominant Influence (ADI) in which the city falls. ADI details are presented in the *ADI Atlas* on page C-133.

Television Assignments by State

The following table of assignments contains the channels designated for the listed communities in the United States, its territories, and possessions. Channels designated with an asterisk (*) are assigned for use by noncommercial educational broadcast stations only. A station on a channel identified by a plus (+) or minus (-) mark is required to operate with its carrier frequencies offset 10 kHz above or below, respectively, the nominal carrier frequencies. **Footnotes:** 1) Following the decision in Docket 18261 (amendment of rules regarding geographic reallocation of channels 1-20 to land mobile radio in the 25 largest urbanized areas of the U.S.) channels so indicated will not be available for use until further action by the FCC. 2) Operation of this channel is subject to the conditions, terms and requirements set out in the report and Order in Docket No. 19075, RM-1645, adopted Jan. 5, 1972, released Jan. 7, 1972, FCC 72-19 (Added 72-19, 1/7/72). 3) This channel is not available for Elgin, Ill., unless FCC determines it is not needed at Joliet, Ill. 4) Stations using these assignments shall limit radiation toward stations on the same channel in Puerto Rico to no more than the effective radiated power which would be radiated by an omnidirectional radio station using maximum permissible effective radiated power for antenna height above average terrain, at the minimum distances from such stations specified in 73.610(b). The FCC shall consider the status of the negotiations with the appropriate British authorities concerning these allotments when the applications for construction permits come before the FCC.

Non-ADI Markets

The following single-county markets did not achieve ADI status because the preponderance of viewing is not to the home-market station. Neither did they meet the criteria of the 10% Rule to become an ADI. The home counties in non-ADI markets are assigned to the ADIs that do receive the preponderance of viewing.

TV Markets by Nielsen Marketing Research Territory

Nielsen Marketing Research territory groups are another standard way of reporting sales data. The following table ranks TV markets, known as Designated Market Areas (DMAs), within each Nielsen territory. This provides a yardstick for determining the number of spot markets needed to achieve a given coverage of territory. For example, if the national media are not delivering sufficient advertising weight in New England, the planner will find that three TV markets (Boston, Hartford and Providence) contain over 75% of New England territory households. Or the planner can use the table to get a better idea of what TV markets are needed to cover all of New England. Data is from the Nielsen Station Index, tabulations based on a January 1993 estimate.

The Top 100 Companies

The following chart lists the top 100 companies publicly reporting electronic communications-related operations for 1991. ECI revenue comprises a company's business interest in radio, TV, cable, satellite, allied services and manufacturing. Items not included in ECI revenue for programmers include revenue from theatrical releases and the home video market. For manufacturers, it includes revenue from sales of television sets or products for the general public not built specifically or primarily for Fifth Estate commercial use. All data was obtained from *Broadcasting Magazine's* "Top 100 Companies in Electronic Communications". ECI estimates were provided by the companies, securities analysts and industry associations.

How Network Delivery Varies by Market

National advertisers use spot television to increase network advertising weight in specific markets to achieve a predetermined level. These market goals are derived from the advertising budget and the market's share of the brand's projected sales. Thus, a spot schedule is usually indicated where a market has an unusually high brand-sales potential, or where the network weight delivered for the brand is below the national average used in planning, or both.

The first factor, market brand potential, varies by product and is difficult to generalize. The second factor, local market network audiences, must be generalized because planning is based upon next season's *anticipated* network performance. The prevalence

of network package buys, which tends to deliver average audience levels, supports the use of average data.

The following tabulation, chosen especially for *Broadcasting & Cable Yearbook* shows Arbitron Television's Areas of Dominant Influence (ADI) in total number of U.S. TV households. Also listed, in percentage, are the network audiences in each ADI market during prime-time hours. It is this market audience figure, when compared to the market's share of the population, that indicates whether the network commitment will perform above or below the national plan average in that market.

All figures are based on Arbitron Television's May 1992 Network Program Group Analysis.

Prior to 1971, data reflects factory sales by U.S. manufacturers plus those products imported directly by distributors or dealers for resale. All import statistics are based upon average value as published by the U.S. Department of Commerce, which is F.O.B. and therefore excludes U.S. import duties, freight charged from the foreign country to the United States, and insurance.

Broadcasting is your business!

It's all your business — television, cable, radio, satellite . . . the entire industry. Everything is connected. And when you read **Broadcasting** every week, you stay connected.

Broadcasting is the industry's leading publication — with the broadest coverage, biggest editorial staff, and the most experience. Over 60 years.

Broadcasting — and only **Broadcasting** — gives you the whole picture. It ties everything together. It can help you make decisions. Do deals. Scoop the competition. Advance your career.

You don't get all this anywhere else — only in Broadcasting ... every week!

TV PROGRAMS. What's hot? What's not? What's available? What strategies seem to work?

THE TV NETWORKS. Sell the networks to the affiliates — does it make sense? How can the networks tap new revenue sources? Is affiliate ownership a viable idea?

RATINGS. Weekly ratings roundup for the four networks — Fox included. The latest prime-time

shuffle. Syndication — what's doing well ... and where?

LOCAL TV. How are local stations boosting hometown sales?

CABLE. Will signal compression mean a boom in cable revenues? How to push pay — how to change viewer attitudes toward PPV.

RADIO. What formats are working now? The stations making money — what are they doing right?

BUDGET CUTS. How others are doing more with less in the newsroom. And elsewhere.

TECHNOLOGY. HDTV — what will it cost to gear up? DBS — who gets the remaining frequencies? New equipment — how quickly will you recoup the cost?

WASHINGTON. More wrangling over fin-syn. The issue of cable deregulation. The latest court decisions and FCC moves — who is helped, who might be hurt.

CHANGING HANDS. Which broadcast properties and cable systems have changed hands, and for how much?

Broadcasting is the publication of record!
