DUNCAN'S COMMENTS:

Birmingham has been an average medium-sized radio market. The addition of seven new viable FM's in the last 10 years has not helped. Notice how the number of viable stations declined during the 1980's as a number of AM stations lost viability. Then during the 1990's a number of new FM'S moved in and the number of viable stations grew rapidly.

WZZK is the station in Birmingham which I most admire. Yes, it has declined in audience share of late but for 20 years WZZK was clearly the most important station in the market. Credit should also go to Cox for the way they have developed WBHT and WBHK.
