**** Based on 12+ Metro, 1/4 HR AVG, Broadcast Week. Calculated by dividing listening to non-listed stations by total listening to all radio stations. A large part of the non-listed listening is probably to public and non-commercial stations. Other listening to distant stations (clears). Other listening will be to local commercial stations which do not qualify for listing in the rating book. The importance of this table (and the table above) is that this is listening that is not going to local commercial outlets. This affects CPM's and the effectiveness of local radio.
