DEPARTMENT OF COMMERCE,
BUREAU OF NAVIGATION,
Washington, August 1, 1919.

To collectors of customs, radio inspectors, and others concerned:

This publication, which was discontinued during the war, is issued monthly by the Bureau of Navigation, Department of Commerce, and distributed to the United States officers engaged in or concerned with the enforcement of the radio laws for their guidance and instruction, and to those concerned with the operation of Government and commercial radio stations for their information.

The Radio Service Bulletin supersedes the quarterly supplements to the List of Radio Stations of the United States and contains information concerning Government, commercial, and special stations only.

The Bulletin contains tables of new stations, alterations, and corrections under headings, so that the List of Radio Stations of the United States and the List of Radiotelegraph Stations published by the international bureau at Berne, may be brought up to date. Additions, alterations, and corrections should be entered in these two publications promptly on receipt of the Bulletin.

Amendments to or changes in the Radio Laws and Regulations of the United States (edition of Aug. 15, 1919) are printed in this Bulletin in such a manner that they may be clipped and pasted in their proper places in that publication.

Items of general interest concerning the enforcement of the radio laws are printed in the Bulletin from time to time, as occasion warrants.

E. T. CHAMBERLAIN,
Commissioner of Navigation.

Approved:

WILLIAM C. REDFIELD,
Secretary of Commerce.

MISCELLANEOUS.

The following information has been received from the Berne International Bureau:

RADIO ACCOUNTS FOR GERMAN SHIPS.

The German Wireless Telegraph Co., known as Debeg, is prepared to assume, as formerly, the liquidation of accounts for radiotelegrams exchanged between German ships (Debeg system) and foreign coast stations. The company requests administrators and companies which approve this special method of procedure to forward to it accounts relative to charges.

AUSTRALIAN POST OFFICE NOW ADMINISTERING RADIO LAW.

Hereafter the Postmaster General's Department and not the Department of the Navy will be in charge of the application of the radiotelegraph law as well as in control of coast stations and ship stations in the jurisdiction of the Australian Federation. Communications hereafter relative to wireless telegraphy should be addressed accordingly to the Secretary, Postmaster's Department, Melbourne, Australia.

INCREASE IN CANADIAN RATES.

Beginning November 8, 1920, Canadian land lines will increase their relative share of the charges for radiotelegrams. The increase will vary from 1 to 4 cents a word. Until the Berne International Bureau has printed a revised table of charges under the heading "Canada" in the third part of the nomenclature of telegraph stations ships communicating with Canadian stations can obtain from them on request all necessary instructions.

NEW CALL LETTERS FOR JAPAN.

Owing to insufficient call letters which have been reserved for Japan, the general administration of posts and telegraphs of Japan will assign hereafter to ship stations under direction of the Japanese administration and to those of Japanese possessions call letters composed of four letters by means of the addition of the letter "A" at the end of combinations of three letters commencing with "J."

NEW CALL LETTERS FOR CZECHOSLOVAKIA.

The call letters OKA to OKZ have been reserved for this Republic.

ADDITIONAL INFORMATION REGARDING RADIO STATION AT DEVIZES.

The British post office advises that the Government station at Devizes, call signal GKU, is open for communication with ships by means of continuous wave wireless telegraphy. The wave length used is 2100 meters. The station will normally be open at all times for the receipt of messages from ships, but it will, as a rule, call ships only during the following periods: 1 to 1.30 a. m., 5 to 5.30 a. m., 9 to 9.30 a. m., 1 to 1.30 p. m., 5 to 5.30 p. m., and 9 to 9.30 p. m., Greenwich mean time. The station will not, however, be available for communication during the period of 3 minutes every half hour commencing at 15 and 45 minutes past the hour (G. m. t.), as British ships using wave lengths other than 600 meters for any special purpose are required during these periods to keep watch on a wave length of 600 meters.

The rates of charge for messages sent through Devizes radio are the same as those for messages through other Government shore stations of Great Britain.

ARTICLE XLV OF THE INTERNATIONAL CONVENTION.

The Bureau is informed that section 3 of this article is being constantly violated by careless operators. For the information of all concerned it is herewith printed:

Time signals and meteorological radiograms shall be transmitted one after the other in such a way that the total time occupied in their transmission shall not exceed 10 minutes. As a general rule, all radio stations whose transmissions might interfere with the reception of such signals and radiograms shall remain silent during the transmission in order that all stations desiring it may be able to receive the same. Exception shall be made in cases of distress calls and of state telegrams.

OPERATOR'S LICENSE SUSPENDED.

License No. 22042, issued at Baltimore, June 26, 1920, has been suspended for a period of three months on account of the holder of the license violating section 4 of the act of August 13, 1912, in that he interfered with a distress message.

DESIGNATING LETTERS SHOWING COMPANIES CONTROLLING STATION ON AMERICAN VESSELS.

Beginning February 1, this year, the following letters should be inserted between the number of the message and the check so as to designate the radio company controlling the station and responsible for the tolls:

- M.. Radio Corporation of America.
- S.. Ship Owners Radio Service.
- T.. Tropical Radio Telegraph Co.
- I.. Independent Wireless Telegraph Co.
- C.. Cutting & Washington Radio Corp.
- H.. American-Hawaiian S. S. Co.
- L.. International Radio Telegraph Co.

To illustrate:

Present method: "Radio SS ZULIA 1 9 Tenth 410pm"

Proposed method: "Radio SS ZULIA 1M 9 Tenth 410pm"

When a station relays a message, it should use the designating letter of the station from which the message originates.

This practice will apply to all traffic originating on board ship irrespective whether a message is destined to another ship or to a shore station in the United States.
