QUICK REFERENCE INDEX

U.S. AM Broadcasting Stations Listed Alphabetically by Call Letters.....162	World-Wide Short-Wave Stations Listed by Frequency.....185
Canadian AM Broadcasting Stations Listed Alphabetically by Call Letters.....169	Canadian Short-Wave Stations Listed by Frequency.....187
U.S. and Canadian AM Stations Grouped According to Frequency.....169	U.S. FM Broadcasting Stations Listed Alphabetically by Location within States....187
Mexican AM Stations Listed Alphabetically by Location within States...177	Canadian FM Broadcasting Stations Listed Alphabetically by Location.....189
U.S. and Canadian AM Stations Listed Alphabetically by Location.....178	U.S. Television Stations Listed Alphabetically by Location.....189
Canadian Television Stations Listed Alphabetically by Location.....191	

History of White's Radio Log

White's Radio Log was founded in Providence, R. I., by Charles DeWitt White as an extension of his earlier publishing activities which, in turn, were a continuation of the business established by his father: the publication of city directories, street guides and municipal tax guides.

In the early days of broadcasting, the compilation of a list of operating stations and their frequencies was no simple task. Prior to the Dill-White Radio Act of 1927, if a feed merchant, auto dealer, barber or undertaker wanted to advertise his wares or services, he had only to select a frequency and go on the air.

Nevertheless, Mr. White's directory publishing experience had convinced him that he could successfully assemble a radio log, and in 1924 he justified this conviction with *The Rhode Island Radio Call Book*, following this shortly after with *White's Triple List of Radio Broadcasting Stations*.

In 1927 the two publications were merged, nation-wide distribution was established and in ensuing years related publications, such as *Sponsored Radio Programs*, *Radio Announcer's Guide*, *Short-Wave Schedule Guide* and a special Canadian edition of *White's Radio Log* (which had its title shortened to the one it bears today), were also issued. The Log reached a combined circulation of well over 1,000,000 copies at one time.

The Fall-Winter number of the 1927 Log listed 701 U.S. Stations. Most powerful were WEAJ (now WRCA), N.Y., with 50,000 watts, KDKA, Pittsburgh, WGY, Schenectady, and WJZ (now WABC), N. Y., each with 30,000 watts; WGN-WLIB, Chicago, with 15,000 watts; and Boston's WBZ, also with 15,000. Five stations listed (one a Junior

High School in Norfolk, Va.) operated on a mighty 5 watts.

In 1957, Mr. White, who was then 76 years old, died in his sleep. His heirs sold all rights in and to the Log to Science and Mechanics Publishing Company and in January of this year the first edition of *White's Radio Log* released under our auspices—Vol. 35, No. 1—was published as a special supplement to the *Radio-TV Experimenter* (Vol. 6).

This current edition of the Log—Vol. 35, No. 2—cross-indexes over 3100 U.S. standard broadcast (AM) stations, separately lists U.S. frequency modulation (FM) and television stations, has a complete compilation of Canadian broadcasters and, in addition, has a greatly expanded list of world-wide short-wave stations that identifies those stations beaming regular evening broadcasts to the United States. Completely new to the Log with this edition is a list grouped by state and city of Mexican stations that can be heard in the United States. Finally, over 2000 changes (2438 precisely) have been made in this edition to bring the listings up-to-date, and to make them as complete, as is humanly possible.

White's Radio Log is under continuous revision as new stations come on the air and others go off. Work on revision to make the next edition even more complete and useful has already begun. To this end, any changes that you, as a user of the Log, have to suggest will be greatly appreciated.

SPRAYBERRY

**25 BIG, COMPLETE KITS
of PARTS & EQUIPMENT**

To help you learn the practical side of Radio-Television, we send you expertly engineered training kits to test and assemble for interesting, valuable shop-bench practice!

The new Sprayberry Training Television Receiver, built and tested in 5 sections.

A New feature... the first modern oscilloscope.

You build the powerful two-band superheterodyne radio receiver.

**CATALOG
FREE!**

*** This great industry is begging for trained men... to step into good paying jobs or a profitable business of their own! Our new plan opens the doors of Radio-Television wide to every ambitious man who is ready to act at once!

Men by the thousands... trained Radio-Television Service Technicians... are needed at once! Perhaps you've thought about entering this interesting, top paying field, but lack of ready money held you back. Now — just \$6 enrolls you for America's finest, most up to date home study training in Radio-Television! Unbelievable? No, the explanation is simple! We believe Radio-Television must have the additional men it needs as quickly as possible. We are willing to do our part by making Sprayberry Training available for less money down and on easier terms than ever before. This is your big opportunity to get the training you need... to step into a fine job or your own Radio-Television Service Business.

Complete Facts Free — Act Now; Offer Limited

Only a limited number of students may be accepted on this liberal and unusual basis. We urge you to act at once... mail the coupon below and get complete details plus our big new catalog and an actual sample lesson — all free. No obligation... no salesman will bother you.

HOME STUDY TRAINING IN SPARE TIME

Under world-famous 27-year old Sprayberry Plan, you learn entirely at home in spare time. You keep on with your present job and income. You train as fast or as slowly as you wish. You get valuable kits of parts and equipment for priceless shop-bench practice. And everything you receive, lessons and equipment alike, is all yours to keep.

LET US PROVE HOW EASILY YOU CAN LEARN!

Radio-Television needs YOU! And Sprayberry is ready to train you on better, easier terms, than any ambitious man can afford. Just \$6 starts you! Mail coupon today... let the facts speak for themselves. You have everything to gain. Let us prove the kind of opportunity in store for you!

SPRAYBERRY Academy of Radio-Television

1512 Jarvis Avenue, Dept. 212-L, Chicago 26, Illinois

Mail This Coupon Now — No Salesman Will Call

Sprayberry Academy of Radio-Television

Dept. 212-L, 1512 W. Jarvis Ave., Chicago 26, Ill.

Please rush all information on your ALL-NEW Radio-Television Training Plan. I understand this does not obligate me and that no salesman will call upon me. Include New Catalog and Sample Lesson FREE.

United States and Canadian

Amplitude-Modulation (AM) Broadcasting Stations Grouped by Frequency; U.S. stations listed alphabetically by location within groups, Canadian stations precede U.S.

Abbreviations: Kc., frequency in kilocycles; W.P., watt power. Wave length is given in meters (all AM stations broadcasting at a higher frequency than 1600 Kc. are listed under Short-Wave Stations, see p. 185 and p. 187)

Kc.	Wave Length	W.P.	Kc.	Wave Length	W.P.	Kc.	Wave Length	W.P.	Kc.	Wave Length	W.P.

Watch for the SCIENCE EXPERIMENTER—

HERE it is, a collection of science project articles for amateur scientists, hobbyists, educators and experimenters of every age—but especially valuable to younger adults, in school or out, now engaged in the study of some phase of modern science. The scope of the projects in this book for which detailed, show-how plans and step-by-step text are given embraces the entire area of the physical sciences . . . And in addition to the two-score projects included in this book—projects which can be used as points of departure for Science Fair entries—there are also authoritative, informative general articles on varied aspects of scientific research and on practical application and demonstration of scientific theory. If you cannot obtain a copy of the SCIENCE EXPERIMENTER (Handbook No. 557) from your newsdealer after October 30th, let us know and we will see that he is supplied. Or send 75¢ direct to Science and Mechanics, Dept. 5559, 450 East Ohio Street, Chicago 11, Illinois, and we will fill your order.

➔ On Sale October 30th

GET YOUR First Class Commercial F.C.C. LICENSE IN 12 WEEKS!

Our FREE booklet, *Careers in Electronics*, gives complete details of our training - either home study or resident classes. This booklet tells how we prepare you, quickly, to pass F.C.C. examinations. For your free copy of this booklet, clip the coupon below and mail it to the Grantham School nearest you.

WASHINGTON D.C. Grantham School of Electronics
821-19th Street, N.W.
Washington 6, D.C.

HOLLYWOOD CALIF. Grantham School of Electronics
1505 N. Western Avenue
Hollywood 27, California

SEATTLE WASH. Grantham School of Electronics
408 Marion Street
Seattle 4, Washington

MAIL TO SCHOOL NEAREST YOU

(Mail in envelope or paste on postal card)

TO: GRANTHAM SCHOOL OF ELECTRONICS
Desk E-8 • Washington • Hollywood • Seattle

Gentlemen

Please send me your free booklet telling how I can get my commercial F.C.C. license quickly. I understand there is no obligation and no salesman will call.

Name _____ Age _____

Address _____

City _____ State _____

I am interested in: Home Study, Resident Classes

F.C.C. LICENSE—THE KEY TO BETTER JOBS

An F.C.C. *commercial* (not amateur) license is your ticket to higher pay and more interesting employment. This license is Federal Government evidence of your qualifications in electronics. Employers are eager to hire *licensed* technicians.

WHICH LICENSE FOR WHICH JOB?

The **THIRD CLASS** radiotelephone license is of value primarily in that it qualifies you to take the second class examination. The scope of authority covered by a third class license is extremely limited.

The **SECOND CLASS** radiotelephone license qualifies you to install, maintain and operate most all radiotelephone equipment except commercial broadcast station equipment.

The **FIRST CLASS** radiotelephone license qualifies you to install, maintain and operate every type of radiotelephone equipment (except amateur) including all radio and television stations in the United States, its territories and possessions. This is the highest class of radiotelephone license available.

GRANTHAM TRAINING PREPARES YOU

The Grantham Communications Electronics Course prepares you for a **FIRST CLASS** F.C.C. license, and it does this by **TEACHING** you electronics. Each point is covered simply and in detail, with emphasis on making the subject easy to understand. The organization of the subject matter is such that you progress, step-by-step, to your specific objective—a first class F.C.C. license.

CORRESPONDENCE OR RESIDENCE CLASSES

Grantham training is available by correspondence or in resident classes. Either way (residence or correspondence), we train you quickly and well—NO previous training required. A beginner may qualify for his first class license in as little as 12 weeks.

HERE'S PROOF...

that Grantham students prepare for F.C.C. examinations in a minimum of time. Here is a list of a few of our recent graduates, the class of license they got, and how long it took them:

	License	Weeks
Henry M. Best, 1003 Vermont St., Fremont, N.C.	1st	11
Harold V. Jones, P.O. Box 705 Alamogordo, N. Mex.	1st	13
Michael F. Aperio, 916 Townsend St., Chester, Pa.	1st	12
Norman R. Cook, 130 Olive St., Neodeska, Kan.	1st	12
Antone Mello, 68 Union Street, Nantucket, Mass.	1st	10
John Ward, 407 E. Cowden Ave., Midland, Texas	1st	10
F. T. Verga, 538-7th Street, Buffalo, N.Y.	1st	12
Philip J. Hooks, 4825 N. Capitol, N.W., Washington, D.C.	1st	12

THREE COMPLETE SCHOOLS: To better serve our many students throughout the entire country, Grantham School of Electronics maintains three complete schools—one in Washington, D.C., one in Hollywood, Calif., and one in Seattle, Wash. All schools offer the same rapid courses in F.C.C. license preparation, either home study or resident classes.

Get your First Class Commercial F.C.C. License in 12 weeks by training at
