RATINGS REPORT

MARKET INDEX

The top 302 markets ranked by Arbitron are listed on one page, with the page number on which each appears in this directory.

Page 2

FORMAT FOCUS

The Media Audit provides profiles of listeners aged 18+ in the primary radio formats in this report. The data was gathered from 72 markets during the 2007 measurement year.

Page 3

HOW TO USE THE RATINGS INFORMATION

This step-by-step guide will help you use and understand R&R's comprehensive ratings data. The National Rep Firm abbreviation key is also on this page.

Page 16

MARKET RATINGS

The top 100 markets rated by Arbitron have one-year trends and are ranked in five key demos. Ownership info and rep affiliations, along with 12+ cume numbers are included for each station listed. Metros 101+ contain top 10 stations, formats, owners and a two-book trend. Houston and Philadelphia PPM ratings are also included.

Page 18

EASTLAN RATINGS

R&R also includes ratings information provided by Eastlan Ratings for markets not rated by Arbitron.

Page 116

In your hands is the spring edition of the radio industry's most trusted and complete published directory of ratings, group owners, record companies, program suppliers, networks, consultants, broadcasting-related services, FCC information and more. For decades the R&R Directory has been the No. 1 reference book for radio executives. Published twice per year, the directory is automatically included in the standard R&R subscription package. Additionally, the directory is available online as a convenient supplement to the printed edition at www.radioandrecords.com.

Since 1973 it has been our honor to serve the radio and record communities. We value your partnership and thank you for your continued support of Radio & Records.

How To Use The Ratings Information

As you examine the ratings section of the **R&R Directory**, Vol. 1, '09, you'll find the following highlights featured in the detailed breakouts for markets 1-100:

1 SHARE TRENDS

All stations in the Top 50 markets that earned at least a 1.0 share and the Top 10 stations in markets 51-100 (according to the spring '08 Arbitron) are listed. Trends read left to right, with the most recent results on the right. Up to five rating periods are included in any market's trend report, which covers the past year. Stations are ranked according to their Monday-Sunday (total persons 12+) Average Quarter-Hour share.

2 STATION/FORMAT

The call letters are printed in bold type, with the station format in the next column to the right.

3 FREQUENCY/POWER

The frequency and power for each radio signal are shown as listed in the spring '08 Arbitron.

4 AUDIENCE RANKINGS

The six rankings to the right of the frequency/power column will help you determine a station's core strength. The first listing shows the 12+ cume in hundreds; then five AQH demo ranks.

5 TIME SPENT LISTENING

This column shows the average number of minutes the audience spent listening to the station each week. Based on 12+ total-week listening.

6 OWNER & REP INFORMATION

Station owners (as of July '08) and their national rep affiliations as listed in the spring '08 Arbitron report.

7 NOTATIONS

Updates are listed noting format and call-letter changes, as well as LMA activity.

8 OWNERSHIP SHARE

At the end of each top 50 market page are three bar graphs ranking owner share. Owner totals are computed by combining the respective spring '08 Monday-Sunday AQH numbers of the stations owned by the respective company.

9 MARKET POPULATION

The 12+ population for each market is shown, with the black and Hispanic percentages in parentheses. In those markets where the ethnic populations do not achieve established thresholds, the code N/A is used.

How To Use The Ratings Information

As you examine the ratings section of the R&R Directory, Vol. 1, '09, you'll find that it holds both the markets done under the new PPM system and the traditional diary system. Here is a detailed breakout for those markets done Via PPM

1 SHARE TRENDS

All stations in the Top 50 markets that earned at least a 1.0 share are listed. Trends read left to right, with the most recent results on the right. Up to five rating periods are included in any market's trend report, which covers the past year. Stations are ranked according to their Monday-Sunday (total persons 6+) Average Quarter-Hour share.

2 STATION/FORMAT

The call letters are printed in bold type, with the station format in the next column to the right.

3 OWNER INFORMATION

Station owners (as of January 2009).

4 FREQUENCY/POWER

The frequency and power for each radio signal are shown as listed in the January 2009 PPM Report.

5 CUME

This column shows the average weekly cumulative total of persons 6+ that listened to the station for at least five minutes.

6 REP INFORMATION

The national rep affiliations of the station as listed in the January 2009 PPM report.

7 NOTATIONS

Updates are listed noting format and call-letter changes, as well as LMA activity.

8 MARKET POPULATION

The 6+ population for each market is shown, with the black and Hispanic percentages in parentheses.

IS YOUR RADIO SAMPLE TRULY REPRESENTATIVE?

WANT THE ANSWER? JUST ASK NIELSEN.

.....

Answer: NO! Unless you're including cellphone-only (CPO) households in your sample, you're ignoring almost 20% of the population. In fact, if you're not using Nielsen's True Address Based Sampling (ABS), you're missing 30% of the market, as our True ABS includes all CPO, unlisted landline phones and no telephone access households, covering an unprecedented 98% of the U.S. population.

Our recent pilot study in Lexington, KY shows that CPO households are heavy radio listeners, listening to an average of 23 hours of radio per week, compared to 19 hours for the total sample.

What's at risk? When 44% of the CPO sample audience is 18-34, you obviously lose the ability to understand demographics that are essential to several major formats and advertisers. When you miss these listeners, you miss an important part of the truth.

We also over-sample on key demographics for better proportionality, so you get a clearer picture of who is actually listening.

Start from a representative sample to ensure representative results.

IS YOUR RADIO SAMPLE TRULY REPRESENTATIVE?

WANT THE ANSWER? JUST ASK NIELSEN.

Answer: NO! Unless you're including cellphone-only (CPO) households in your sample, you're ignoring almost 20% of the population. In fact, if you're not using Nielsen's True Address Based Sampling (ABS), you're missing 30% of the market, as our True ABS includes all CPO, unlisted landline phones and no telephone access households, covering an unprecedented 98% of the U.S. population.

Our recent pilot study in Lexington, KY shows that CPO households are heavy radio listeners, listening to an average of 23 hours of radio per week, compared to 19 hours for the total sample.

What's at risk? When 44% of the CPO sample audience is 18-34, you obviously lose the ability to understand demographics that are essential to several major formats and advertisers. When you miss these listeners, you miss an important part of the truth.

We also over-sample on key demographics for better proportionality, so you get a clearer picture of who is actually listening.

Start from a representative sample to ensure representative results.
