

INSTALLATION OF MODEL 642 IN  
MODEL 326 SHOCK MOUNT

SEE TWO LEGS (A) FROM BRACKET (B) AS SHOWN IN FIG. 1  
INSERT FACET OF MICROPHONE THROUGH SHOCK CORD (C)  
PULL SHOCK CORD (C) ON REAR OF MICROPHONE AND  
REPLACE LEGS (A) IN BRACKET (B).

FIG. 1

MODEL 642  
CARDLINE MICROPHONE

SERIAL # 6713 WGM AM

ADJUSTABLE IMPEDANCE  
ADJUSTMENT ON MICROPHONE PERMITS SELECTION  
OF ONE OF THREE IMPEDANCES, 50, 150, 250 OHMS.

ADJUSTABLE FREQUENCY RESPONSE  
ADJUSTMENT ON MICROPHONE PERMITS CHANGE OF  
FREQUENCY RESPONSE AS FOLLOWS - SEE FIG. 2  
91 - FLAT RESPONSE

WGN-TV

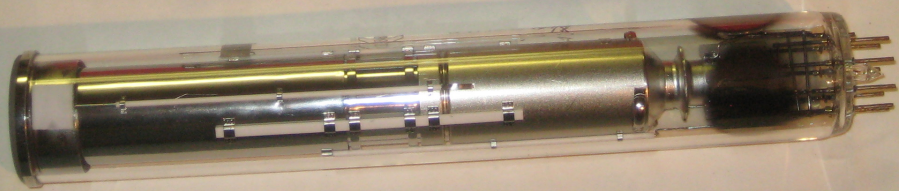

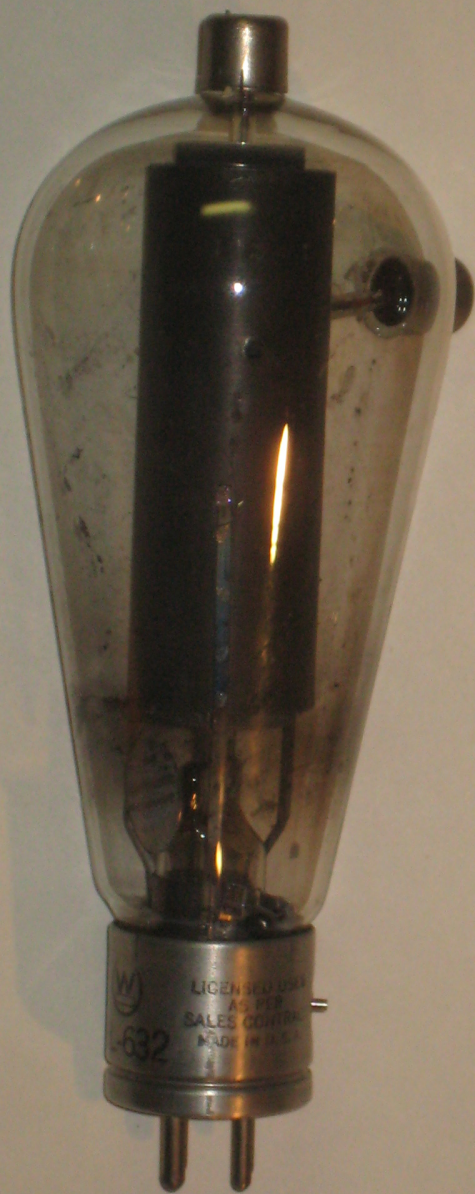

**Carl Meyers**  
Engineer

**Career Highlights:**

- Joined WGN Radio on Christmas Day, 1925
- Remained with the station into the 1960s
- Built his first crystal radio at the age of 15 in 1912. Ten years later, he was building radio stations, including WFAS in Elgin, which was soon acquired by Tribune.
- In March, 1929, Meyers (far left in picture above) implemented a project to broadcast police calls to squad cars over WGN's airwaves. WGN would interrupt its programming to carry the messages to officers in the field. This would quickly lead to the police radio systems that are now commonplace.
- Received the National Association of Broadcasters Engineering Achievement Award.
- Jack Linschmeisler is reported to have said "Meyers was teaming with radio fifteen years before Marconi even invented it." While not literally true, it reflects the respect Meyers earned among his colleagues.
- Meyers' son Jack would also have a long career with the company, working as a cameraman at WGN-TV for over 30 years.
